Leuthold Grizzly Short Fund**GRZZX**

This Statement of Additional Information (“SAI”) relates to the Funds and Classes identified above (each a “Fund” and together the “Funds”). Each Fund is the successor to a corresponding series of Leuthold Funds, Inc., Leuthold Core Investment Fund, Leuthold Global Fund and Leuthold Grizzly Short Fund (“Core Predecessor Fund”, “Global Predecessor Fund”, or “Grizzly Predecessor Fund”, together, the “Predecessor Funds”). This Statement of Additional Information is not a prospectus and should be read in conjunction with the Prospectus for the Leuthold Funds dated January 28, 2026, as amended and supplemented from time to time. Requests for copies of the Prospectus should be made by writing to Leuthold Funds at the address above or by calling 1-800-273-6886.

The [Form N-CSR](#) of the Funds for the fiscal year ended September 30, 2025 is a separate document and the financial statements, accompanying notes and report of the independent registered public accounting firm appearing therein, are incorporated by reference into this SAI. To obtain a copy of the prospectus and/or annual report, free of charge, please write or call the Funds at the address or toll-free telephone number above, or visit the Funds’ website at <https://funds.leutholdgroup.com>.

THE TRUST AND THE FUNDS

The Trust is a Delaware statutory trust organized on January 27, 2011, and is registered with the U.S. Securities and Exchange Commission (“SEC”) as an open-end management investment company under the Investment Company Act of 1940, as amended, (the “1940 Act”) and the offering of the Funds’ shares is registered under the Securities Act of 1933, as amended (the “Securities Act”).

Each Fund is series of the Trust, including, the Leuthold Core Investment Fund (“Core Fund”), the Leuthold Global Fund (“Global Fund”), and the Leuthold Grizzly Short Fund (“Grizzly Fund”). Effective January 17, 2025, the Core Predecessor Fund reorganized into the Core Fund, the Global Predecessor Fund reorganized into the Global Fund, and the Grizzly Predecessor Fund reorganized into the Grizzly Fund. The Funds have the same investment objectives and substantially similar investment strategies as the corresponding Predecessor Funds. Each Fund is managed by The Leuthold Group, LLC (d/b/a Leuthold Weeden Capital Management) (the “Adviser”). Each Fund is a diversified series of the Trust and has its own investment objective and policies.

Shares of other series of the Trust are offered in separate prospectuses and SAIs. The Funds do not hold themselves out as related to any other series within the Trust, nor do they share the same investment adviser with any other series of the Trust. The Funds’ Prospectus and this SAI are a part of the Trust’s Registration Statement filed with the SEC. Copies of the Trust’s complete Registration Statement may be obtained from the SEC upon payment of the prescribed fee, or may be accessed free of charge at the SEC’s website at www.sec.gov. As permitted by Delaware law, the Trust’s Board of Trustees (the “Board”) may create additional series (and classes thereof) of the Trust and offer shares of these series and classes under the Trust at any time without the vote of shareholders.

All shares of a series shall represent an equal proportionate interest in the assets held with respect to that series (subject to the liabilities held with respect to that series and such rights and preferences as may have been established and designated with respect to classes of shares of such series), and each share of a series shall be equal to each other share of that series.

Shares are voted in the aggregate and not by series or class, except in matters where a separate vote is required by the 1940 Act, or when the matters affect only the interest of a particular series or class. When matters are submitted to shareholders for a vote, each shareholder is entitled to one vote for each full share owned and fractional votes for fractional shares owned.

The Trust does not normally hold annual meetings of shareholders. Meetings of the shareholders shall be called by any member of the Board upon written request of shareholders holding, in the aggregate, not less than 10% of the shares, such request specifying the purpose or purposes for which such meeting is to be called.

The Board has the authority from time to time to divide or combine the shares of any series into a greater or lesser number of shares of that series without materially changing the proportionate beneficial interest of the shares of that series in the assets belonging to that series or materially affecting the rights of shares of any other series. In case of the liquidation of a series, the holders of shares of the series being liquidated are entitled to receive a distribution out of the assets, net of the liabilities, belonging to that series. Expenses attributable to any series (or class thereof) are borne by that series (or class). Any general expenses of the Trust not readily identifiable as belonging to a particular series are allocated by, or under the direction of, the Board to all applicable series (and classes thereof) in such manner and on such basis as the Board in its sole discretion deems fair and equitable. No shareholder is liable to further calls for the payment of any sum of money or assessment whatsoever with respect to the Trust or any series of the Trust without his or her express consent.

All consideration received by the Trust for the issue or sale of a Fund's shares, together with all assets in which such consideration is invested or reinvested, and all income, earnings, profits and proceeds thereof, including any proceeds derived from the sale, exchange or liquidation of such assets, and any funds or payments derived from any reinvestment of such proceeds, subject only to the rights of creditors, shall constitute the underlying assets of the Fund.

INVESTMENT RESTRICTIONS

Leuthold Core Investment Fund

The Leuthold Core Investment Fund has adopted the following investment restrictions which are matters of fundamental policy. The Fund's investment restrictions cannot be changed without approval of the holders of the lesser of: (i) 67% of that Fund's shares present or represented at a shareholder's meeting at which the holders of more than 50% of such shares are present or represented; or (ii) more than 50% of the outstanding shares of that Fund.

1. The Fund will diversify its assets in different companies and will not purchase securities of any issuer if, as a result of such purchase, the Fund would own more than 10% of the outstanding voting securities of such issuer or more than 5% of the Fund's assets would be invested in securities of such issuer (except that up to 25% of that value of the Fund's total assets may be invested without regard to this limitation). This restriction does not apply to obligations issued or guaranteed by the United States Government, its agencies or instrumentalities.

2. The Fund will not buy securities on margin (except for such short term credits as are necessary for the clearance of transactions); provided, however, that the Fund may (i) borrow money to the extent set forth in investment restriction no. 4; (ii) purchase or sell futures contracts and options on futures contracts; (iii) make initial and variation margin payments in connection with purchases or sales of futures contracts or options on futures contracts; and (iv) write or invest in put or call options.

3. The Fund may sell securities short to the extent permitted by the Act and may write put and call options to the extent permitted by the Act.

4. The Fund may borrow money or issue senior securities to the extent permitted by the Act. (The Act permits the Fund to borrow money or issue senior securities so long as it maintains continuous asset coverage of at least 300% of all amounts borrowed. For purposes of this investment restriction, securities held in escrow or separate accounts in connection with the Fund's investment practices are not considered to be a borrowing. For purposes of this investment restriction, hedging transactions in which the Fund may engage and similar investment strategies are not treated as senior securities when permitted under the rules and regulations of the Act.).

5. The Fund may pledge or hypothecate its assets to secure its borrowings. For purposes of this investment restriction assets held in a segregated account or by a broker in connection with short sales effected by the Fund are not considered to be pledged or hypothecated.

6. The Fund will not act as an underwriter or distributor of securities other than of its shares (except to the extent the Fund may be deemed to be an underwriter within the meaning of the Securities Act of 1933, as amended (the "1933 Act"), in the disposition of restricted securities).

7. The Fund will not make loans, except the Fund may enter into repurchase agreements or acquire debt securities from the issuer or others which are publicly distributed or are of a type normally acquired by institutional investors and except that the Fund may make loans of portfolio securities if any such loans are secured continuously by collateral at least equal to the market value of the securities loaned in the form of cash and/or securities issued or guaranteed by the U.S. Government, its agencies or instrumentalities and provided that no such loan will be made if upon the making of that loan more than 30% of the value of the Fund's total assets would be the subject of such loans.

8. The Fund will not concentrate 25% or more of its total assets in securities of issuers in any one industry. This restriction does not apply to obligations issued or guaranteed by the United States Government, its agencies or instrumentalities.

9. The Fund will not make investments for the purpose of exercising control or management of any company.

10. The Fund will not purchase or sell real estate or real estate mortgage loans and the Fund will not make any investments in real estate limited partnerships.

11. The Fund may purchase and sell commodities and commodity contracts, including futures contracts and options on futures contracts. For purposes of this investment restriction number 11, the terms “commodities” and “commodity contracts” shall include only those items specifically enumerated as commodities or commodity contracts within Section 1a and Section 2(a)(1) of the Commodity Exchange Act (namely, subject to the jurisdiction of the Commodity Futures Trading Commission).

12. The Fund will not purchase or sell any interest in any oil, gas or other mineral exploration or development program, including any oil, gas or mineral leases. This investment restriction does not prohibit investments in securities of companies that engage in, invest in or sponsor oil, gas or mineral exploration or development programs.

The Leuthold Core Investment Fund has adopted certain other investment restrictions which are not fundamental policies and which may be changed by the Trust’s Board of Trustees without shareholder approval. These additional restrictions are as follows:

1. The Fund will not acquire or retain any security issued by a company, an officer or director of which is an officer or trustee of the Trust or an officer, director or other affiliated person of the Fund’s investment adviser.

2. The Fund will not purchase illiquid securities if, as a result of such purchase, more than 15% of the value of its total assets would be invested in such securities.

3. The Fund will not purchase the securities of other investment companies except: (a) as part of a plan of merger, consolidation or reorganization approved by the stockholders of the Fund; (b) securities of registered open-end investment companies; or (c) securities of registered closed-end investment companies on the open market where no commission results, other than the usual and customary broker’s commission. Purchases described in (b) and (c) must be made in compliance with Section 12(d)(1)(A) and Section 12(d)(1)(C) of the Act or pursuant to an applicable exemption or exemptive order, and the Fund may not invest more than 25% of its net assets in shares of registered investment companies.

Leuthold Global Fund and Leuthold Grizzly Short Fund

The Leuthold Global Fund and the Leuthold Grizzly Short Fund have adopted the following investment restrictions which are matters of fundamental policy. Each Fund’s investment restrictions cannot be changed without approval of the holders of the lesser of: (i) 67% of that Fund’s shares present or represented at a shareholder’s meeting at which the holders of more than 50% of such shares are present or represented; or (ii) more than 50% of the outstanding shares of that Fund.

1. Each Fund will diversify its assets in different companies and will not purchase securities of any issuer if, as a result of such purchase, the Fund would own more than 10% of the outstanding voting securities of such issuer or more than 5% of the Fund’s assets would be invested in securities of such issuer (except that up to 25% of that value of each Fund’s total assets may be invested without regard to this limitation). This restriction does not apply to obligations issued or guaranteed by the United States Government, its agencies or instrumentalities.

2. Each Fund will not buy securities on margin (except for such short term credits as are necessary for the clearance of transactions); provided, however, that each of these Funds may (i) borrow money to the extent set forth in investment restriction no. 4; (ii) purchase or sell futures contracts and options on futures contracts; (iii) make initial and variation margin payments in connection with purchases or sales of futures contracts or options on futures contracts; and (iv) write or invest in put or call options.

3. Each Fund may sell securities short to the extent permitted by the Act and may write put and call options to the extent permitted by the Act. The Leuthold Grizzly Short Fund does not have any present intention of writing put or call options. (The Act permits the applicable

Funds to sell securities short and write put and call options to the extent permitted by the rules and regulations under the Act)

4. Each Fund may borrow money or issue senior securities to the extent permitted by the Act. (The Act permits the applicable Funds to borrow money or issue senior securities so long as they maintain continuous asset coverage of at least 300% of all amounts borrowed. For purposes of this investment restriction, securities held in escrow or separate accounts in connection with the Funds' investment practices are not considered to be a borrowing. For purposes of this investment restriction, hedging transactions in which the Funds may engage and similar investment strategies are not treated as senior securities when permitted under the rules and regulations of the Act.)

5. Each Fund may pledge or hypothecate its assets to secure its borrowings. For purposes of this investment restriction assets held in a segregated account or by a broker in connection with short sales effected by a Fund are not considered to be pledged or hypothecated.

6. No Fund will act as an underwriter or distributor of securities other than of its shares (except to the extent a Fund may be deemed to be an underwriter within the meaning of the Securities Act of 1933, as amended (the "1933 Act"), in the disposition of restricted securities).

7. No Fund will make loans, except each Fund may enter into repurchase agreements or acquire debt securities from the issuer or others which are publicly distributed or are of a type normally acquired by institutional investors and except that each Fund may make loans of portfolio securities if any such loans are secured continuously by collateral at least equal to the market value of the securities loaned in the form of cash and/or securities issued or guaranteed by the U.S. government, its agencies or instrumentalities and provided that no such loan will be made if upon the making of that loan more than 30% of the value of the Fund's total assets would be the subject of such loans.

8. No Fund will concentrate 25% or more of its total assets in securities of issuers in any one industry. This restriction does not apply to obligations issued or guaranteed by the U.S. government, its agencies or instrumentalities.

9. No Fund will make investments for the purpose of exercising control or management of any company.

10. No Fund will purchase or sell real estate or real estate mortgage loans and no Fund will make any investments in real estate limited partnerships.

11. The Leuthold Grizzly Short Fund will not purchase or sell commodities or commodity contracts, except that the Fund may enter into futures contracts and options on futures contracts. The Leuthold Grizzly Short Fund does not have any present intention of entering into futures contracts or options on futures contracts. The Leuthold Global Fund may purchase and sell commodities and commodity contracts, including futures contracts and options on futures contracts. For purposes of this investment restriction number 11, the terms "commodities" and "commodity contracts" shall include only those items specifically enumerated as commodities or commodity contracts within Section 1a and Section 2(a)(1) of the Commodity Exchange Act (namely, subject to the jurisdiction of the Commodity Futures Trading Commission).

12. No Fund will purchase or sell any interest in any oil, gas or other mineral exploration or development program, including any oil, gas or mineral leases. This investment restriction does not prohibit investments in securities of companies that engage in, invest in or sponsor oil, gas or mineral exploration or development programs.

Each of the Leuthold Global Fund and the Leuthold Grizzly Short Fund has adopted certain other investment restrictions which are not fundamental policies and which may be changed by the Trust's Board of Trustees without shareholder approval. These additional restrictions are as follows:

1. No Fund will acquire or retain any security issued by a company, an officer or director of which is an officer or trustee of the Trust or an officer, director or other affiliated person of any Fund's investment adviser.

2. No Fund will purchase illiquid securities if, as a result of such purchase, more than 15% of the value of its total assets would be invested in such securities.

3. No Fund will purchase the securities of other investment companies except: (a) as part of a plan of merger, consolidation or reorganization approved by the stockholders of such Fund; (b) securities of registered open-end investment companies; or (c) securities of registered closed-end investment companies on the open market where no commission results, other than the usual and customary broker's commission. Purchases described in (b) and (c) must be made in compliance with Section 12(d)(1)(A) and Section 12(d)(1)(C) of the Act or pursuant to an applicable exemption or exemptive order, and no Fund may invest more than 25% of its net assets in shares of registered investment companies.

Section 12(d)(1)(A) of the Act provides that shares of an investment company may not be purchased by a Fund if as a result of such purchase (i) the Fund and its affiliated persons would hold more than 3% of the total outstanding voting stock of such investment company; (ii) more than 5% of the Fund's total assets would be invested in any class of securities of such investment company; and (iii) more than 10% of the Fund's total assets would be invested in any class of securities of such investment company and of any other investment company.

Section 12(d)(1)(C) makes it unlawful for a Fund to purchase or otherwise acquire any security, whether voting or nonvoting, whether representing equity or debt, issued by a registered closed-end investment company, if immediately after the purchase or acquisition 10% or more of the voting securities of the closed-end investment company are owned by the Funds on an aggregate basis.

Section 12(d)(1)(F) of the Act allows the Funds to exceed the 5% limitation and the 10% limitation described above. Section 12(d)(1)(F) of the Act, provides that the provisions of Section 12(d)(1) shall not apply to securities purchased or otherwise acquired by a Fund if (1) immediately after such purchase or acquisition not more than 3% of the total outstanding stock of such registered investment company is owned by the Fund and all affiliated persons of the Fund; and (2) the Fund has not offered or sold after January 1, 1971, and is not proposing to offer or sell any security issued by it through a principal underwriter or otherwise at a public or offering price which includes a sales load of more than 1½%. An investment company that issues shares to a Fund pursuant to Section 12(d)(1)(F) will not be required to redeem its shares in an amount exceeding 1% of such investment company's total outstanding shares in any period of less than thirty days. A Fund relying on Section 12(d)(1)(F) (or the investment adviser acting on behalf of the Fund) must comply with the following voting restrictions: when the Fund exercises voting rights, by proxy or otherwise, with respect to investment companies owned by the Fund, the Fund will vote the shares held by the Fund in the same proportion as the vote of all other holders of such security.

Rule 12d1-4 provides an exemption from Section 12(d)(1) that allows funds to invest in other investment companies in excess of certain of the limitations discussed above, subject to certain limitations and conditions, including, among other conditions, that the acquiring fund and its advisory group will not control (individually or in the aggregate) an acquired fund. An acquiring fund relying on Rule 12d1-4 generally must enter into a fund of funds investment agreement with the acquired fund. Rule 12d1-4 outlines the requirements for fund of funds agreements and specifies certain reporting responsibilities of the acquiring fund's adviser. A Fund expects to rely on Rule 12d1-4 to the extent the Adviser deems such reliance necessary or appropriate.

The aforementioned percentage restrictions on investment or utilization of assets refer to the percentage at the time an investment is made other than with respect to the limitations on the Funds' borrowing of money and investments in illiquid securities. If these restrictions are adhered to at the time an investment is made, and such percentage subsequently changes as a result of changing market values or some similar event, no violation of a Fund's fundamental restrictions will be deemed to have occurred. Any changes in a Fund's non-fundamental investment restrictions made by the Board of Trustees will be communicated to shareholders with 60 days' prior notice before their implementation.

Commodity Pool Operator Exclusion

An exclusion from the definition of “commodity pool operator” (“CPO”) under the Commodity Exchange Act and the rules of the Commodity Futures Trading Commission (“CFTC”) has been claimed with respect to the Funds, and, therefore, the Adviser is not subject to CFTC registration or regulation as a CPO with respect to the Funds.

Disclosure of Portfolio Holdings

Leuthold Core Investment Fund, Leuthold Global Fund, and Leuthold Grizzly Short Fund

The Trust, on behalf of the Funds, has adopted portfolio holdings disclosure policies (“Portfolio Holdings Policies”) that govern the timing and circumstances of disclosure of portfolio holdings of the Funds. Information about each Fund’s portfolio holdings will not be distributed to any third party except in accordance with these Portfolio Holdings Policies. The Board has considered the circumstances under which the Funds’ portfolio holdings may be disclosed under the Portfolio Holdings Policies. The Board has also considered actual and potential material conflicts that could arise in such circumstances between the interests of a Fund’s shareholders and the interests of the Adviser, principal underwriter or any other affiliated person of a Fund. After due consideration, the Board has determined that each Fund has a legitimate business purpose for disclosing portfolio holdings to persons described in the Portfolio Holdings Policies. The Board also has authorized the Trust’s Chief Compliance Officer (“CCO”) to consider and authorize dissemination of portfolio holdings information to additional parties, after considering the best interests of the Funds’ shareholders and potential conflicts of interest in making such disclosures.

The Board exercises continuing oversight of the disclosure of the Funds’ portfolio holdings by (1) overseeing the implementation and enforcement of the Portfolio Holdings Policies, codes of ethics, and other relevant policies of the Funds and their service providers by the CCO, (2) by considering reports and recommendations by the CCO concerning any material compliance matters (as defined in Rule 38a-1 under the 1940 Act), and (3) by considering whether to approve any amendment to these Portfolio Holdings Policies. The Board reserves the right to amend the Portfolio Holdings Policies at any time without prior notice in its sole discretion.

Disclosure of each Fund’s complete holdings is required to be made quarterly within 60 days of the end of each fiscal quarter, in the annual and semi-annual reports to Fund shareholders, and in the quarterly holdings report on Form N-PORT. These reports will be made available, free of charge, on the EDGAR database on the SEC’s website at www.sec.gov.

In the event of a conflict between the interests of a Fund and its shareholders and the interests of the Adviser or an affiliated person of the Adviser, the CCO of the Adviser, in consultation with the Trust’s CCO, shall make a determination in the best interests of the Fund and its shareholders, and shall report such determination to the Board at the end of the quarter in which such determination was made. Any employee of the Adviser who suspects a breach of this obligation must report the matter immediately to the Adviser’s CCO or to his or her supervisor.

In addition, material non-public holdings information may be provided without a lag as part of the normal investment activities of the Funds to each of the following entities which, by explicit agreement or by virtue of their respective duties to the Fund, are required to maintain the confidentiality of the information disclosed: the administrator; the fund accountant; the custodian; the transfer agent; the Funds’ independent registered public accounting firm; counsel to the Funds or the Board; broker-dealers (in connection with the purchase or sale of securities or requests for price quotations or bids on one or more securities); and regulatory authorities. Portfolio holdings information not publicly available with the SEC or on the Funds’ web site may only be provided to additional third parties, in accordance with the Portfolio Holdings Policies, when a Fund has a legitimate business purpose, and the third party recipient is subject to a confidentiality agreement. Such portfolio holdings disclosure must be approved under the Portfolio Holdings Policies by the Trust’s CCO.

In no event shall the Adviser, its affiliates or employees, or the Funds receive any direct or indirect compensation or other consideration in connection with the disclosure of information about the Funds’ portfolio holdings.

There can be no assurance that the Portfolio Holdings Policies and these procedures will protect the Funds from potential misuse of Fund information by individuals or entities to which it is disclosed.

INVESTMENT CONSIDERATIONS

The Prospectus for the Funds describes their principal investment strategies and risks. This section expands upon that discussion and also discusses non-principal investment strategies and risks.

Leuthold Core Investment Fund, Leuthold Global Fund and Leuthold Grizzly Short Fund

Diversification

Each Fund is “diversified” within the meaning of the 1940 Act. Under applicable federal laws, to qualify as a diversified fund, a Fund, with respect to 75% of its total assets, may not invest greater than 5% of its total assets in any one issuer and may not hold greater than 10% of the securities of one issuer, other than investments in cash and cash items (including receivables), U.S. government securities, and securities of other investment companies. The remaining 25% of the Fund’s total assets does not need to be “diversified” and may be invested in securities of a single issuer, subject to other applicable laws. The diversification of a Fund’s holdings is measured at the time the Fund purchases a security. However, if the Fund purchases a security and holds it for a period of time, the security may become a larger percentage of the Fund’s total assets due to movements in the financial markets. If the market affects several securities held by a Fund, the Fund may have a greater percentage of its assets invested in securities of fewer issuers.

Permitted Investments

The following are descriptions of the permitted investments and investment practices and the associated risk factors. Each Fund will only invest, directly or indirectly, in any of the following instruments or engage in any of the following investment practices if such investment or activity is consistent with the Fund’s investment objective and permitted by the Fund’s stated investment policies.

Warrants and Put and Call Options

Each of the Leuthold Core Investment Fund and the Leuthold Global Fund may purchase warrants and put and call options on securities.

By purchasing a put option, a Fund obtains the right (but not the obligation) to sell the option’s underlying security at a fixed strike price. In return for this right, the Fund pays the current market price for the option (known as the option premium). The Fund may terminate its position in a put option it has purchased by allowing it to expire or by exercising the option. If the option is allowed to expire, the Fund will lose the entire premium it paid. If the Fund exercises the option, it completes the sale of the underlying security at the strike price. The Fund may also terminate a put option position by closing it out in the secondary market at its current price, if a liquid secondary market exists. The buyer of a put option can expect to realize a gain if security prices fall substantially. However, if the underlying security’s price does not fall enough to offset the cost of purchasing the option, a put buyer can expect to suffer a loss (limited to the amount of the premium paid, plus related transaction costs).

The features of call options are essentially the same as those of put options, except that the purchaser of a call option obtains the right to purchase, rather than sell, the underlying security at the option’s strike price. A call buyer attempts to participate in potential price increases of the underlying security with risk limited to the cost of the option if security prices fall. At the same time, the buyer can expect to suffer a loss if security prices do not rise sufficiently to offset the cost of the option.

Warrants are similar to call options in that the purchaser of a warrant has the right (but not the obligation) to purchase the underlying security at a fixed price. Warrants are issued by the issuer of the underlying security whereas options are not. Warrants typically have exercise periods in excess of those of call options. Warrants do not carry the right to receive dividends or vote with respect to the securities they entitle the holder to purchase, and they have no rights to the assets of the issuer. Warrants are more speculative than the underlying investment. A warrant ceases to have value if it is not exercised prior to its expiration date.

The regulation of derivatives markets in the U.S. is a rapidly changing area of law and is subject to modification by government and judicial action. New laws and regulations may negatively impact the Fund by increasing transaction and/or regulatory compliance costs, limiting the availability of certain derivatives or otherwise adversely affecting the value or performance of the derivatives the Fund trades. In October 2020, the SEC adopted Rule 18f-4 under the 1940 Act, with a compliance date of August 19, 2022. Funds that are subject to the rule are required to adopt and implement a written derivatives risk management program and quantitatively limit their use of derivatives based on the estimated potential risk of loss that the funds incur from their derivatives transactions. Funds that limit derivatives exposure to 10% of net assets are exempt from many of the requirements of Rule 18f-4, but must still adopt and implement policies and procedures reasonably designed to manage the fund's derivatives risks. Rule 18f-4 governs the way funds must comply with the asset segregation and coverage requirements of Section 18 of the 1940 Act with respect to derivatives and certain other financing transactions.

Mortgage-Backed Securities and Other Asset-Backed Securities

Each of the Leuthold Core Investment Fund and the Leuthold Global Fund may invest in mortgage-backed and other asset-backed securities (namely, securities backed by credit card receivables, automobile loans or other assets). Mortgage-backed securities are securities that directly or indirectly represent a participation in, or are secured by and payable from, mortgage loans secured by real property. Mortgage-backed securities include: (1) Government Agency Mortgage-Backed Securities; (2) Privately-Issued Mortgage-Backed Securities; and (3) collateralized mortgage obligations and multiclass pass-through securities.

Government Agency Mortgage-Backed Securities. Mortgage-backed securities include Government Agency Mortgage-Backed Securities, which represent participation interests in pools of residential mortgage loans originated by United States governmental or private lenders and guaranteed, to the extent provided in such securities, by the U.S. Government or one of its agencies or instrumentalities. Such securities, with the exception of collateralized mortgage obligations, are ownership interests in the underlying mortgage loans and provide for monthly payments that are a "pass-through" of the monthly interest and principal payments (including any prepayments) made by the individual borrowers on the pooled mortgage loans, net of any fees paid to the guarantor of such securities and the servicer of the underlying mortgage loans.

The Government Agency Mortgage-Backed Securities in which a Fund may invest includes those issued or guaranteed by Ginnie Mae, Fannie Mae and the Federal Home Loan Mortgage Corporation ("Freddie Mac"). As more fully described below, these securities may include collateralized mortgage obligations, multiclass pass-through securities and stripped Mortgage-Backed Securities.

Ginnie Mae Certificates. Ginnie Mae is a wholly-owned corporate instrumentality of the United States within the Department of Housing and Urban Development. The National Housing Act of 1934, as amended (the "Housing Act"), authorizes Ginnie Mae to guarantee the timely payment of the principal of and interest on certificates that are based on and backed by a pool of mortgage loans insured by the Federal Housing Administration Act, or Title V of the Housing Act of 1949, or guaranteed by the Veterans' Administration under the Servicemen's Readjustment Act of 1944, as amended, or by pools of other eligible mortgage loans. The Housing Act provides that the full faith and credit of the U.S. Government is pledged to the payment of all amounts that may be required to be paid under any guarantee. To meet its obligations under such guarantee, Ginnie Mae is authorized to borrow from the U.S. Treasury with no limitations as to amount.

Fannie Mae Certificates. Fannie Mae is a federally chartered and privately owned corporation organized and existing under the Federal National Mortgage Association Charter Act. Fannie Mae was originally established in 1938 as a U.S. Government agency to provide supplemental liquidity to the mortgage market and was transformed into a shareholder owned and privately managed corporation by legislation enacted in 1968. Fannie Mae provides funds to the mortgage market primarily by purchasing home mortgage loans from local lenders, thereby replenishing their funds for additional lending. Fannie Mae acquires funds to purchase home mortgage loans from many capital market investors that ordinarily may not invest in mortgage loans directly, thereby expanding the total amount of funds available for housing.

Each Fannie Mae Certificate entitles the registered holder thereof to receive amounts representing such holder's pro rata interest in scheduled principal payments and interest payments (at such Fannie Mae Certificate's pass-through rate, which is net of any servicing and guarantee fees on the underlying mortgage loans), and any principal prepayments, on the mortgage loans in the pool represented by such Fannie Mae Certificate and such holder's proportionate interest in the full principal amount of any foreclosed or otherwise

finally liquidated mortgage loan. The full and timely payment of principal of and interest on each Fannie Mae Certificate will be guaranteed by Fannie Mae, which guarantee is not backed by the full faith and credit of the U.S. Government.

Freddie Mac Certificates. Freddie Mac is a corporate instrumentality of the United States created pursuant to the Emergency Home Finance Act of 1970, as amended. Freddie Mac was established primarily for the purpose of increasing the availability of mortgage credit for the financing of needed housing. The principal activity of Freddie Mac currently consists of the purchase of first lien, conventional, residential mortgage loans and participation interests in such mortgage loans and the resale of the mortgage loans so purchased in the form of mortgage securities, primarily Freddie Mac Certificates.

Freddie Mac guarantees to each registered holder of a Freddie Mac Certificate the timely payment of interest at the rate provided for by such Freddie Mac Certificate, whether or not received. Freddie Mac also guarantees to each registered holder of a Freddie Mac Certificate ultimate collection of all principal of the related mortgage loans, without any offset or deduction, but, generally, does not guarantee the timely payment of scheduled principal. Freddie Mac may remit the amount due on account of its guarantee of collection of principal at any time after default on an underlying mortgage loan, but not later than 30 days following (i) foreclosure sale, (ii) payment of claim by any mortgage insurer, or (iii) the expiration of any right of redemption, whichever occurs later, but in any event no later than one year after demand has been made upon the mortgagor for accelerated payment of principal. The obligations of Freddie Mac under its guarantee are obligations solely of Freddie Mac and are not backed by the full faith and credit of the U.S. Government.

Privately-Issued Mortgage-Backed Securities. Privately-Issued Mortgage-Backed Securities are issued by private issuers and represent an interest in or are collateralized by (i) Mortgage-Backed Securities issued or guaranteed by the U.S. Government or one of its agencies or instrumentalities (“Privately-Issued Agency Mortgage-Backed Securities”), or (ii) whole mortgage loans or non-Agency collateralized Mortgage-Backed Securities (“Privately-Issued Non-Agency Mortgage-Backed Securities”). These securities are structured similarly to the Ginnie Mae, Fannie Mae and Freddie Mac mortgage pass-through securities described above and are issued by originators of and investors in mortgage loans, including savings and loan associations, mortgage banks, commercial banks, investment banks and special purpose subsidiaries of the foregoing. Privately-Issued Agency Mortgage-Backed Securities usually are backed by a pool of Ginnie Mae, Fannie Mae and Freddie Mac Certificates. Privately-Issued Non-Agency Mortgage-Backed Securities usually are backed by a pool of conventional fixed rate or adjustable rate mortgage loans that are not guaranteed by an entity having the credit status of Ginnie Mae, Fannie Mae or Freddie Mac, and generally are structured with one or more types of credit enhancement. As more fully described below, these securities may include collateralized mortgage obligations and multiclass pass-through securities.

A Fund may invest in subordinated Privately-Issued Non-Agency Mortgage-Backed Securities (“Subordinated Securities”). Subordinated Securities have no governmental guarantee, and are subordinated in some manner as to the payment of principal and/or interest to the holders of more senior Privately-Issued Non-Agency Mortgage-Backed Securities. The holders of Subordinated Securities typically are compensated with a higher stated yield than are the holders of more senior Privately-Issued Non-Agency Mortgage-Backed Securities. On the other hand, Subordinated Securities typically subject the holder to greater risk than senior Privately-Issued Non-Agency Mortgage-Backed Securities and tend to be rated in a lower rating category, and frequently a substantially lower rating category, than the senior Privately-Issued Non-Agency Mortgage-Backed Securities. Subordinated Securities generally are likely to be more sensitive to changes in prepayment and interest rates and the market for such securities may be less liquid than is the case for traditional fixed-income securities and senior Privately-Issued Non-Agency Mortgage-Backed Securities.

Collateralized Mortgage Obligations and Multiclass Pass-Through Securities. Mortgage-Backed Securities include collateralized mortgage obligations or “CMOs,” which are debt obligations collateralized by mortgage loans or mortgage pass-through securities. Typically, CMOs are collateralized by Ginnie Mae, Fannie Mae or Freddie Mac Certificates, but also may be collateralized by other Mortgage-Backed Securities or whole loans (such collateral collectively hereinafter referred to as “Mortgage Assets”). CMOs include multiclass pass-through securities, which can be equity interests in a trust composed of mortgage assets. Payments of principal of and interest on the Mortgage Assets, and any reinvestment income thereon, provide the funds to pay debt service on the CMOs or make scheduled distributions on the multiclass pass-through securities. CMOs may be issued by agencies or instrumentalities of the U.S. Government, or by private originators of, or investors in, mortgage loans, including savings and loan associations, mortgage banks, commercial banks, investment banks

and special purpose subsidiaries of the foregoing. The issuer of a series of CMOs may elect to be treated as a Real Estate Mortgage Investment Conduit.

In a CMO, a series of bonds or certificates is issued in multiple classes. Each class of CMOs, often referred to as a “tranche,” is issued at a specific fixed or floating coupon rate and has a stated maturity or final distribution date. Principal prepayments on the Mortgage Assets may cause the CMOs to be retired substantially earlier than their stated maturities or final distribution dates. Interest is paid or accrues on classes of the CMOs on a monthly, quarterly or semiannual basis. The principal of and interest on the Mortgage Assets may be allocated among the several classes of a CMO series in innumerable ways, some of which bear substantially more risk than others. In particular, certain classes of CMOs and other types of mortgage pass-through securities, including interest only classes, principal only classes, inverse floaters, Z or accrual classes and companion classes, are designed to be highly sensitive to changes in prepayment and interest rates and can subject the holder to extreme reductions of yield and loss of principal. A Fund may invest in such high-risk, derivative Mortgage-Backed Securities.

Stripped Mortgage-Backed Securities. A Fund may invest in stripped Mortgage-Backed Securities issued by the U.S. Government (“SMBS”). SMBS are usually structured with two classes that receive different proportions of the interest and principal distributions from a pool of Mortgage Assets. A common type of SMBS will have one class receiving all of the interest from the Mortgage Assets, while the other class will receive all of the principal. However, in some instances, one class will receive some of the interest and most of the principal while the other class will receive most of the interest and the remainder of the principal. If the underlying Mortgage Assets experience greater than anticipated prepayments of principal, a Fund may fail to fully recover its initial investment in these securities. The market value of the class consisting entirely of principal payments generally is unusually volatile in response to changes in interest rates. The yield on a class of SMBS that receives all or most of the interest from Mortgage Assets are generally higher than prevailing market yields on other Mortgage-Backed Securities because their cash flow patterns are more volatile and there is a greater risk that the initial investment will not be fully recouped.

Adjustable-Rate Mortgage Loans. Certain mortgage loans underlying the Mortgage-Backed Securities in which a Fund may invest will be adjustable rate mortgage loans (“ARMs”). ARMs eligible for inclusion in a mortgage pool will generally provide for a fixed initial mortgage interest rate for a specified period of time. Thereafter, the interest rates (the “Mortgage Interest Rates”) may be subject to periodic adjustment based on changes in the applicable index rate (the “Index Rate”). The adjusted rate would be equal to the Index Rate plus a gross margin, which is a fixed percentage spread over the Index Rate established for each ARM at the time of its origination.

There are various types of indices which provide the basis for rate adjustments on ARMS. Commonly utilized indices include the one-year, three-year and five-year constant maturity Treasury rates, the three-month Treasury Bill rate, the 180-day Treasury bill rate, rates on longer-term Treasury securities, the 11th District Federal Home Loan Bank Cost of Funds, the National Median Cost of Funds, the prime rate of a specific bank, or commercial paper rates. Some indices, such as the one-year constant maturity Treasury rate, closely mirror changes in market interest rate levels. Others, such as the 11th District Federal Home Loan Bank Cost of Funds index, tend to lag behind changes in market rate levels and tend to be somewhat less volatile. The degree of volatility in the market value of a Fund’s portfolio and therefore in the NAV of a Fund’s shares will be a function of the length of the interest rate reset periods and the degree of volatility in the applicable indices.

Adjustable interest rates can cause payment increases that some mortgagors may find difficult to make. However, certain ARMs may provide that the Mortgage Interest Rate may not be adjusted to a rate above an applicable lifetime maximum rate or below an applicable lifetime minimum rate for such ARMs. Certain ARMs may also be subject to limitations on the maximum amount by which the Mortgage Interest Rate may adjust for any single adjustment period. Other ARMs (“Negatively Amortizing ARMs”) may provide instead or as well for limitations on changes in the monthly payment on such ARMs. Limitations on monthly payments can result in monthly payments which are greater or less than the amount necessary to amortize a Negatively Amortizing ARM by its maturity at the Mortgage Interest Rate in effect in any particular month. In the event that a monthly payment is not sufficient to pay the interest accruing on a Negatively Amortizing ARM, any such excess interest is added to the principal balance of the loan, causing negative amortization, and is repaid through future monthly payments. It may take borrowers under Negatively Amortizing ARMs longer periods of time to achieve equity and may increase the likelihood of default by such borrowers. In the event that a monthly payment exceeds the sum of the interest accrued at the applicable Mortgage Interest Rate and the principal payment which would have been necessary to amortize the outstanding principal balance over the remaining

term of the loan, the excess (or “accelerated amortization”) further reduces the principal balance of the ARM. Negatively Amortizing ARMs do not provide for the extension of their original maturity to accommodate changes in their Mortgage Interest Rate. As a result, unless there is a periodic recalculation of the payment amount (which there generally is), the final payment may be substantially larger than the other payments. These limitations on periodic increases in interest rates and on changes in monthly payments protect borrowers from unlimited interest rate and payment increases.

Asset-Backed Securities. Asset-backed securities may involve certain risks that are not presented by Mortgage-Backed Securities arising primarily from the nature of the underlying assets (namely, credit card and automobile loan receivables as opposed to real estate mortgages). Non-mortgage asset-backed securities do not have the benefit of the same security interest in the collateral as Mortgage-Backed Securities. Credit card receivables are generally unsecured and the debtors are entitled to the protection of a number of state and federal consumer credit laws, many of which have given debtors the right to reduce the balance due on the credit cards. Most issuers of automobile receivables permit the servicers to retain possession of the underlying obligations. If the servicer were to sell these obligations to another party, there is the risk that the purchaser would acquire an interest superior to that of the holders of related automobile receivables. In addition, because of the large number of vehicles involved in a typical issuance and technical requirements under state laws, the trustee for the holders of the automobile receivables may not have an effective security interest in all of the obligations backing such receivables. Therefore, there is a possibility that payments on the receivables together with recoveries on repossessed collateral may not, in some cases, be able to support payments on these securities.

Asset-backed securities may be subject to greater risk of default during periods of economic downturn than other instruments. Also, while the secondary market for asset-backed securities is ordinarily quite liquid, in times of financial stress the secondary market may not be as liquid as the market for other types of securities, which could cause a Fund to experience difficulty in valuing or liquidating such securities.

Miscellaneous. The yield characteristics of Mortgage-Backed Securities differ from traditional debt securities. Among the major differences are that interest and principal payments are made more frequently, usually monthly, and that principal may be prepaid at any time because the underlying mortgage loans generally may be prepaid at any time. As a result, if a Fund purchases such a security at a premium, a prepayment rate that is faster than expected will reduce yield to maturity, while a prepayment rate that is slower than expected will have the opposite effect of increasing yield to maturity. Conversely, if a Fund purchases these securities at a discount, faster than expected prepayments will increase, while slower than expected prepayments will reduce, yield to maturity. Certain classes of CMOs and other types of mortgage pass-through securities, including those whose interest rates fluctuate based on multiples of a stated index, are designed to be highly sensitive to changes in prepayment and interest rates and can subject the holders thereof to extreme reductions of yield and possibly loss of principal.

Prepayments on a pool of mortgage loans are influenced by a variety of economic, geographic, social and other factors, including changes in the mortgagors’ housing needs, job transfers, unemployment, mortgagors’ net equity in the mortgaged properties and servicing decisions. Generally, however, prepayments on fixed rate mortgage loans will increase during a period of falling interest rates and decrease during a period of rising interest rates. Accordingly, amounts available for reinvestment by a Fund are likely to be greater during a period of declining interest rates and, as a result, likely to be reinvested at lower interest rates than during a period of rising interest rates. Mortgage-Backed Securities may decrease in value as a result of increases in interest rates and may benefit less than other fixed income securities from declining interest rates because of the risk of prepayment.

Preferred Stocks

Each of the Leuthold Core Investment Fund and the Leuthold Global Fund may invest in preferred stocks. Preferred stock includes convertible and non-convertible preferred and preference stocks that are senior to common stock. Preferred stock has a preference over common stock in liquidation (and generally dividends as well) but is subordinated to the liabilities of the issuer in all respects. As a general rule the market value of preferred stock with a fixed dividend rate and no conversion element varies inversely with interest rates and perceived credit risk, while the market price of convertible preferred stock generally also reflects some element of conversion value. Because preferred stock is junior to debt securities and other obligations of the issuer, deterioration in the credit quality of the issuer will cause greater changes in the value of a preferred stock than in a senior debt security with similar stated yield characteristics. Unlike interest payments on debt securities,

preferred stock dividends are payable only if declared by the issuer's board of directors. Preferred stock also may be subject to optional or mandatory redemption provisions.

Zero-Coupon U.S. Treasury Securities

Each of the Leuthold Core Investment Fund and the Leuthold Global Fund may invest in zero-coupon U.S. Treasury securities which consist of U.S. Treasury Notes and Bonds that have been stripped of their unmatured interest coupons by the U.S. Department of Treasury. A zero-coupon U.S. Treasury security pays no interest to its holders during its life and its value to an investor consists of the difference between its face value at the time of maturity and the price for which it was acquired, which is generally an amount much less than its face value. Zero-coupon U.S. securities are generally subject to greater fluctuations in value in response to changing interest rates than debt obligations that pay interest currently.

[LIBOR Transition Risk

The Funds may have been exposed to financial instruments that were tied to the London Interbank Offered Rate ("LIBOR"). Until recently, LIBOR was used as a "benchmark" or "reference rate" for various commercial and financial contracts, including corporate and municipal bonds, bank loans, asset-backed and mortgage-related securities, interest rate swaps and other derivatives.

The administrator of LIBOR has phased out LIBOR such that after June 30, 2023, the overnight, 1-month, 3-month, 6-month and 12-month U.S. dollar LIBOR settings have ceased to be published. All other LIBOR settings and certain other interbank offered rates, such as the Euro Overnight Index Average, ceased to be published or representative after December 31, 2021.

Actions by regulators have resulted in the establishment of alternative reference rates to LIBOR in most major currencies. The U.S. Federal Reserve, based on the recommendations of the New York Federal Reserve's Alternative Reference Rate Committee (comprised of major derivative market participants and their regulators), has begun publishing a Secured Overnight Financing Rate ("SOFR"), which has replaced U.S. dollar LIBOR. Market participants generally have adopted alternative rates such as SOFR or otherwise amended such financial instruments to include fallback provisions and other measures that contemplated the discontinuation of LIBOR. To facilitate the transition of legacy derivatives contracts referencing LIBOR, the International SWAPs and Derivatives Association, Inc. (ISDA) launched a protocol to incorporate fallback provisions. Notwithstanding the foregoing actions, there still remains uncertainty regarding successor reference rate methodologies and there is no assurance that the composition or characteristics of any alternative reference rate will be similar to or produce the same value or economic equivalence as LIBOR or that instruments using an alternative rate will have the same volume or liquidity as did LIBOR prior to its discontinuance or unavailability.

The transition process away from LIBOR could lead to increased volatility and illiquidity in markets for instruments whose terms previously relied on LIBOR. It could also lead to a reduction in the value of some LIBOR-based investments and reduce the effectiveness of new hedges placed against existing LIBOR-based instruments.]

Money Market Instruments

The money market instruments in which the Funds may invest include conservative fixed-income securities, such as U.S. Treasury Bills, commercial paper rated A-1 by Standard & Poor's Corporation ("S&P"), or Prime-1 by Moody's Investors Service, Inc. ("Moody's"), commercial paper master notes and repurchase agreements. Commercial paper master notes are unsecured promissory notes issued by corporations to finance short-term credit needs. They permit a series of short-term borrowings under a single note. Borrowings under commercial paper master notes are payable in whole or in part at any time upon demand, may be prepaid in whole or in part at any time, and bear interest at rates which are fixed to known lending rates and automatically adjusted when such known lending rates change. There is no secondary market for commercial paper master notes. The Funds' investment adviser will monitor the creditworthiness of the issuer of the commercial paper master notes while any borrowings are outstanding.

Repurchase agreements are agreements under which the seller of a security agrees at the time of sale to repurchase the security at an agreed time and price. None of the Funds will enter into repurchase agreements with entities other than banks or invest over 15% of their net assets in repurchase agreements with maturities of more than seven days. If a seller of a repurchase agreement defaults and does not repurchase the security subject

to the agreement, the Fund will look to the collateral security underlying the seller's repurchase agreement, including the securities subject to the repurchase agreement, for satisfaction of the seller's obligation to the Fund. In such event, the Fund might incur disposition costs in liquidating the collateral and might suffer a loss if the value of the collateral declines. In addition, if bankruptcy proceedings are instituted against a seller of a repurchase agreement, realization upon the collateral may be delayed or limited.

Foreign Securities

Each of the Funds may invest in securities of foreign issuers. In addition, a registered investment company in which the Leuthold Core Investment Fund or the Leuthold Global Fund invests may invest up to 100% of its assets in securities of foreign issuers. Each of the Funds may also hold securities of U.S. and foreign issuers in the form of American Depositary Receipts ("ADRs"), American Depositary Shares ("ADSs") and Global Depositary Receipts ("GDRs"), and they may each invest in securities of foreign issuers traded directly in the U.S. securities markets. The Leuthold Grizzly Short Fund may sell short (1) securities of foreign issuers on foreign exchanges and (2) ADRs, ADSs, GDRs and securities of foreign issuers traded in the U.S. securities markets. Investments in foreign securities involve special risks and considerations that are not present when the Funds invests in domestic securities.

There is often less information publicly available about a foreign issuer than about a U.S. issuer. Foreign issuers generally are not subject to accounting, auditing and financial reporting standards and practices comparable to those in the United States. The securities of some foreign issuers are less liquid and at times more volatile than securities of comparable U.S. issuers. This is particularly true of securities in emerging markets which can be extremely volatile. Foreign brokerage commissions, custodial expenses and other fees are also generally higher than for securities traded in the United States. There may also be difficulties in enforcing legal rights outside the United States. There may be a possibility of nationalization or expropriation of assets, imposition of currency exchange controls, confiscatory taxation, political or financial instability, and diplomatic developments which could affect the value of investments in certain foreign countries. Legal remedies available to investors may be more limited than those available with respect to investments in the United States or in other foreign countries. Income received from foreign investments may be reduced by withholding and other taxes imposed by such countries.

Individual foreign economies may differ favorably or unfavorably from the U.S. economy in such respects as growth or gross national product, inflation rate, capital reinvestment, resource self-sufficiency and balance of payment positions. The economies of countries with emerging markets may be predominately based on only a few industries, may be highly vulnerable to changes in global trade conditions, and may suffer from extreme and volatile debt or inflation rates. Debt obligations of issuers located in, or of, developing countries involve a high degree of risk and may be in default or present the risk of default.

Foreign Currency Transactions. Since each of the Funds may purchase securities denominated in foreign currencies, and in the case of each of the Leuthold Core Investment Fund or the Leuthold Global Fund a registered investment company in which any of these Funds may invest may purchase securities denominated in foreign currencies, changes in foreign currency exchange rates will affect, either directly or indirectly, the value of the Funds' assets from the perspective of U.S. investors. The Leuthold Global Fund may seek to protect themselves against the adverse effects of currency exchange rate fluctuations by entering into currency forward, futures or options contracts. Hedging transactions may not, however, always be fully effective in protecting against adverse exchange rate fluctuations. Furthermore, hedging transactions involve transaction costs and the risk that the registered investment company might lose money; either because exchange rates move in an unexpected direction, because another party to a hedging contract defaults or for other reasons. Hedging transactions also limit any potential gain which might result if exchange rates moved in a favorable direction. The value of foreign investments and the investment income derived from them may also be affected (either favorably or unfavorably) by exchange control regulations. In addition, the value of foreign fixed-income investments will fluctuate in response to changes in U.S. and foreign interest rates.

To manage the currency risk accompanying investments in foreign securities and to facilitate the purchase and sale of foreign securities, the Leuthold Global Fund may engage in foreign currency transactions on a spot (cash) basis at the spot rate prevailing in the foreign currency exchange market or through entering into contracts to purchase or sell foreign currencies at a future date ("forward foreign currency" contracts or "forward" contracts).

A forward foreign currency contract involves an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. These contracts are principally traded in the inter-bank market conducted directly between currency traders (usually large commercial banks) and their customers. A forward contract generally has no deposit requirement and no commissions are charged at any stage for trades.

When a Fund enters into a contract for the purchase or sale of a security denominated in a foreign currency, it may desire to “lock in” the U.S. dollar price of the security. By entering into a forward contract for the purchase or sale of a fixed amount of U.S. dollars equal to the amount of foreign currency involved in the underlying security transaction, the Fund can protect itself against a possible loss, resulting from an adverse change in the relationship between the U.S. dollar and the subject foreign currency during the period between the date the security is purchased or sold and the date on which the payment is made or received.

When the Adviser believes that a particular foreign currency may suffer a substantial decline against the U.S. dollar, it may enter into a forward contract to sell a fixed amount of the foreign currency approximating the value of some or all of a Fund’s portfolio securities denominated in such foreign currency. The precise matching of the forward contract amounts and the value of the securities involved will not generally be possible since the future value of such securities in foreign currencies will change as a consequence of market movements in the value of those securities between the date the forward contract is entered into and the date it matures. The projection of short-term currency market movement is extremely difficult and the successful execution of a short-term hedging strategy is highly uncertain. A Fund will not enter into such forward contracts or maintain a net exposure to such contracts where the consummation of the contracts would obligate the Fund to deliver an amount of foreign currency in excess of the value of the Fund’s securities or other assets denominated in that currency. The Adviser believes that it is important to have the flexibility to enter into such forward contracts when it determines that the best interests of a Fund will be served.

At the maturity of a forward contract, a Fund may either sell the portfolio securities and make delivery of the foreign currency, or it may retain the securities and terminate its contractual obligation to deliver the foreign currency by purchasing an “offsetting” contract obligating it to purchase, on the same maturity date, the same amount of foreign currency.

If a Fund retains the portfolio securities and engages in an offsetting transaction, the Fund will incur a gain or a loss to the extent that there has been movement in forward contract prices. If the Fund engages in an offsetting transaction, it may subsequently enter into a forward contract to sell the foreign currency. Should forward prices decline during the period when the Fund entered into the forward contract for the sale of a foreign currency and the date it entered into an offsetting contract for the purchase of the foreign currency, the Fund will realize a gain to the extent the price of the currency it has agreed to sell exceeds the price of the currency it has agreed to purchase. Should forward prices increase, the Fund will suffer a loss to the extent that the price of the currency it has agreed to purchase exceeds the price of the currency it has agreed to sell.

Shareholders should note that: (1) foreign currency hedge transactions do not protect against or eliminate fluctuations in the prices of particular portfolio securities (namely, if the price of such securities declines due to an issuer’s deteriorating credit situation); and (2) it is impossible to forecast with precision the market value of securities at the expiration of a forward contract. Accordingly, a Fund may have to purchase additional foreign currency on the spot market (and bear the expense of such purchase) if the market value of the Fund’s securities is less than the amount of the foreign currency upon expiration of the contract. Conversely, a Fund may have to sell some of its foreign currency received upon the sale of a portfolio security if the market value of the Fund’s securities exceed the amount of foreign currency the Fund is obligated to deliver. A Fund’s dealings in forward foreign currency exchange contracts will be limited to the transactions described above.

Although a Fund values its assets daily in terms of U.S. dollars, it does not intend to convert its holdings of foreign currencies into U.S. dollars on a daily basis. A Fund will do so from time to time and investors should be aware of the costs of currency conversion. Although foreign exchange dealers do not charge a fee for conversion, they realize a profit based on the difference (the “spread”) between the prices at which they are buying and selling various currencies. Thus, a dealer may offer to sell a foreign currency to a Fund at one rate, while offering a lesser rate of exchange should the Fund desire to resell that currency to the dealer.

A Fund may purchase and sell currency futures and purchase and write currency options to increase or decrease its exposure to different foreign currencies. The uses and risks of currency options and futures are

similar to options and futures relating to securities or indices, as discussed above. Currency futures contracts are similar to forward foreign currency contracts, except that they are traded on exchanges (and have margin requirements) and are standardized as to contract size and delivery date. Most currency futures contracts call for payment or delivery in U.S. dollars. The underlying instrument of a currency option may be a foreign currency, which generally is purchased or delivered in exchange for U.S. dollars, or may be a futures contract. The purchaser of a currency call obtains the right to purchase the underlying currency, and the purchaser of a currency put obtains the right to sell the underlying currency.

Currency futures and options values can be expected to correlate with exchange rates, but may not reflect other factors that affect the value of a Fund's investments. A currency hedge, for example, should protect a Yen-dominated security from a decline in the Yen, but will not protect the Fund against a price decline resulting from deterioration in the issuer's creditworthiness. Because the value of a Fund's foreign-denominated investments change in response to many factors other than exchange rates, it may not be possible to match the amount of currency options and futures to the value of the Fund's investments exactly over time.

Investments in ADRs, ADSs or GDRs. As noted above, the Funds may hold securities of U.S. and foreign issuers in the form of ADRs, ADSs or GDRs. These securities may not necessarily be denominated in the same currency as the securities for which they may be exchanged. ADRs and ADSs typically are issued by an American bank or trust company and evidence ownership of underlying securities issued by a foreign corporation. Generally, ADRs and ADSs in registered form are designed for use in U.S. securities markets. GDRs are issued by European financial institutions.

ADR facilities may be either "sponsored" or "unsponsored." While similar, distinctions exist relating to the rights and duties of ADR holders and market practices. A depository may establish an unsponsored facility without the participation by or consent of the issuer of the deposited securities, although a letter of non-objection from the issuer is often requested. Holders of unsponsored ADRs generally bear all the costs of such facility, which can include deposit and withdrawal fees, currency conversion fees and other service fees. The depository of an unsponsored facility may be under no duty to distribute shareholder communications from the issuer or pass through voting rights. Issuers of unsponsored ADRs are not obligated to disclose material information in the U.S. and, therefore, there may not be a correlation between such information and the market value of the ADR. Sponsored facilities enter into an agreement with the issuer that sets out rights and duties of the issuer, the depository and the ADR holder. This agreement also allocates fees among the parties. Most sponsored agreements also provide that the depository will distribute shareholder notices, voting instructions and other communications. Each of the Funds may invest in sponsored and unsponsored ADRs, and the Leuthold Grizzly Short Fund may sell short sponsored and unsponsored ADRs.

Short Sales

Each of the Leuthold Core Investment Fund, the Leuthold Global Fund and the Leuthold Grizzly Short Fund may seek to realize additional gains through effecting short sales of securities. Short selling involves the sale of borrowed securities. At the time a short sale is effected, the Fund incurs an obligation to replace the security borrowed at whatever its price may be at the time the Fund purchases it for delivery to the lender. The price at such time may be more or less than the price at which the security was sold by the Fund. Until the security is replaced, the Fund is required to pay the lender amounts equal to any dividend or interest which accrue during the period of the loan. To borrow the security, the Fund also may be required to pay a premium, which would increase the cost of the security sold. The proceeds of the short sale will be retained by the broker, to the extent necessary to meet margin requirements, until the short position is closed. For example, if a Fund believes the price of the stock of XYZ Corp. (which is currently \$50 per share) will decline, it may borrow shares of XYZ Corp. from a securities lender and then sell the borrowed shares in the open market. Later the Fund will purchase shares of XYZ Corp. in the open market to return to the securities lender. If it purchases shares of XYZ Corp. for less than \$50 per share, it will have realized a gain, and if it purchases shares of XYZ Corp. for more than \$50 per share, it will have realized a loss. A Fund's goal when effecting short sales is to "Sell high and Buy low."

A Fund may make short sales "against the box" (namely, when a security identical to or convertible or exchangeable into one owned by the Fund is borrowed and sold short). Selling short "against the box" is not a principal investment strategy of any Fund. Each Fund will use short sales in compliance with Rule 18f-4.

High Yield and Other Securities

Each of the Leuthold Core Investment Fund and the Leuthold Global Fund may invest in corporate debt securities, including bonds and debentures (which are long-term) and notes (which may be short or long-term). A registered investment company in which the Leuthold Core Investment Fund and the Leuthold Global Fund invests may also invest in such debt securities. These debt securities may be rated investment grade by S&P or Moody's. Securities rated BBB by S&P or Baa by Moody's, although investment grade, exhibit speculative characteristics and are more sensitive than higher rated securities to changes in economic conditions. A Fund (and registered investment companies in which a Fund may, at times, invest) may also invest in securities that are rated below investment grade. Investments in high yield securities (namely, less than investment grade), while providing greater income and opportunity for gain than investments in higher-rated securities, entail relatively greater risk of loss of income or principal. Lower-grade obligations are commonly referred to as "junk bonds." Market prices of high-yield, lower-grade obligations may fluctuate more than market prices of higher-rated securities. Lower grade, fixed income securities tend to reflect short-term corporate and market developments to a greater extent than higher-rated obligations which, assuming no change in their fundamental quality, react primarily to fluctuations in the general level of interest rates.

The high yield market at times is subject to substantial volatility. An economic downturn or increase in interest rates may have a more significant effect on the high yield securities in an underlying registered investment company's portfolio and their markets, as well as on the ability of securities' issuers to repay principal and interest. Issuers of high yield securities may be of low creditworthiness and the high yield securities may be subordinated to the claims of senior lenders. During periods of economic downturn or rising interest rates the issuers of high yield securities may have greater potential for insolvency and a higher incidence of high yield bond defaults may be experienced.

The prices of high yield securities have been found to be less sensitive to interest rate changes than higher-rated investments but are more sensitive to adverse economic changes or individual corporate developments. During an economic downturn or substantial period of rising interest rates, highly leveraged issuers may experience financial stress which would adversely affect their ability to service their principal and interest payment obligations, to meet projected business goals, and to obtain additional financing. If the issuer of a high yield security owned by the Leuthold Core Investment Fund or the Leuthold Global Fund (or by a registered investment company in which a Fund invests) defaults, the Fund (or such registered investment company) may incur additional expenses in seeking recovery. Periods of economic uncertainty and changes can be expected to result in increased volatility of market prices of high yield securities and a Fund's net asset value. Yields on high yield securities will fluctuate over time. Furthermore, in the case of high yield securities structured as zero-coupon or pay-in-kind securities, their market prices are affected to a greater extent by interest rate changes and therefore tend to be more volatile than the market prices of securities which pay interest periodically and in cash.

Certain securities held by the Leuthold Core Investment Fund or the Leuthold Global Fund (or a registered investment company in which a Fund invests), including high yield securities, may contain redemption or call provisions. If an issuer exercises these provisions in a declining interest rate market, a Fund (or such registered investment company) would have to replace the security with a lower yielding security, resulting in a decreased return for the investor. Conversely, a high yield security's value will decrease in a rising interest rate market, as will the value of the Fund's (or the underlying registered investment company's) net assets.

The secondary market for high yield securities may at times become less liquid or respond to adverse publicity or investor perceptions making it more difficult for the Leuthold Core Investment Fund or the Leuthold Global Fund (or a registered investment company in which a Fund invests) to value accurately high yield securities or dispose of them. To the extent a Fund (or a registered investment company in which the Fund invests) owns or may acquire illiquid or restricted high yield securities, these securities may involve special registration responsibilities, liabilities and costs, and liquidity difficulties, and judgment will play a greater role in valuation because there is less reliable and objective data available.

Special tax considerations are associated with investing in high yield bonds structured as zero-coupon or pay-in-kind securities. The Leuthold Global Fund or the Leuthold Core Investment Fund (or a registered investment company in which a Fund invests) will report the interest on these securities as income even though it receives no cash interest until the security's maturity or payment date. Further, a Fund (or a registered investment company in which a Fund invests) must distribute substantially all of its income to its shareholders

to qualify for pass-through treatment under the tax law. Accordingly, a Fund (or a registered investment company in which a Fund invests) may have to dispose of its portfolio securities under disadvantageous circumstances to generate cash or may have to borrow to satisfy distribution requirements.

Credit ratings evaluate the safety of principal and interest payments, not the market value risk of high yield securities. Since credit rating agencies may fail to timely change the credit ratings to reflect subsequent events, the investment adviser to the Leuthold Core Investment Fund or the Leuthold Global Fund (or a registered investment company in which a Fund invests) will monitor the issuers of high yield securities in the portfolio to determine if the issuers will have sufficient cash flow and profits to meet required principal and interest payments, and to attempt to assure the securities' liquidity so a Fund can meet redemption requests. To the extent that a Fund (or a registered investment company in which a Fund invests) invests in high yield securities, the achievement of its investment objective may be more dependent on its own credit analysis than is the case for higher quality bonds. A Fund (or a registered investment company in which a Fund invests) may retain a portfolio security whose rating has been changed.

Registered Investment Companies

Each of the Leuthold Core Investment Fund, Leuthold Global Fund and Leuthold Grizzly Short Fund may invest up to 25% of its net assets in shares of registered investment companies. No Fund will purchase or otherwise acquire shares of any registered investment company if (a) that Fund and its affiliated persons would own more than 3% of any class of securities of such registered investment company, (b) more than 5% of its net assets would be invested in the shares of any one registered investment company, or (c) more than 10% of its net assets would be invested in shares of other investment companies, except for purchases of money market funds, purchases pursuant to Section 12(d)(1)(F) of the Act (or other statutory exemptions), purchases pursuant to an exemptive order, or as part of a plan of merger, consolidation or reorganization approved by the shareholders of a Fund.

In October 2020, the SEC adopted regulatory changes related to the ability of an investment company to invest in other investment companies in excess of specified statutory limits. These changes include, among other things, amendments to Rule 12d1-1, the rescission of Rule 12d1-2, the adoption of new Rule 12d1-4, and the rescission of certain exemptive relief issued by the SEC permitting certain fund of funds arrangements. Rule 12d1-4, which became effective on January 19, 2021, permits each Fund to invest in other investment companies, including money market funds, beyond the statutory limits, subject to certain conditions. The rescission of the applicable exemptive orders and the withdrawal of the applicable no-action letters was effective on January 19, 2022. Following this effectiveness, an investment company is no longer able to rely on these exemptive orders and no-action letters, and is subject instead to Rule 12d1-4 and other applicable rules under Section 12(d)(1).

Any investment in a registered investment company involves investment risk. Additionally, an investor could invest directly in the registered investment companies in which the Funds invest. By investing indirectly through a Fund, an investor bears not only his or her proportionate share of the expenses of the Fund (including operating costs and investment advisory fees) but also indirect similar expenses of the registered investment companies in which the Fund invests. An investor may also indirectly bear expenses paid by registered investment companies in which a Fund invests related to the distribution of such registered investment company's shares.

Under certain circumstances an open-end investment company in which a Fund invests may determine to make payment of a redemption by the Fund (wholly or in part) by a distribution in kind of securities from its portfolio, instead of in cash. As a result, the Fund may hold such securities until its investment adviser determines it appropriate to dispose of them. Such disposition will impose additional costs on the Fund.

Investment decisions by the investment advisers to the registered investment companies in which the Funds invest are made independently of the Funds and their investment adviser. At any particular time, one registered investment company in which a Fund invests may be purchasing shares of an issuer whose shares are being sold by another registered investment company in which the Fund invests. As a result, the Fund indirectly would incur certain transactional costs without accomplishing any investment purpose.

Although the Funds will not concentrate their investments, registered investment companies in which the Leuthold Core Investment Fund and the Leuthold Global Fund may invest may concentrate their investments within one industry (namely, sector funds). Since the investment alternatives within an industry are

limited, the value of the shares of such a registered investment company may be subject to greater market fluctuation than a registered investment company which invests in a broader range of securities.

Metals

Each of the Leuthold Core Investment Fund and the Leuthold Global Fund may invest directly in metals such as aluminum, copper, zinc, lead, nickel, tin, silver, palladium and other industrial and precious metals. In connection with such investments these Funds may enter into agreements where they “pre-pay” for metals which are delivered at a later date (“Pre-Paid Physical Agreements”). When investing in metals there is the risk that parties that act as custodians for the metals held by these Funds or with which they have entered into Pre-Paid Physical Agreements may become insolvent and file for bankruptcy protection. In addition, these Funds may invest in companies that manufacture and distribute such metals, companies that invest in other companies engaged in activities related to such metals and securities indexed to the price of such metals or companies. The prices of such metals may be subject to substantial price fluctuations and may be affected by broad economic, financial and political factors, including inflation, metal sales by governments or international agencies, speculation, changes in industrial and commercial demand, currency devaluations or revaluations, trade imbalances and governmental prohibitions or restrictions. Further, investments in metals can present concerns such as delivery, storage and maintenance, possible illiquidity and the unavailability of accurate market valuations. Investment in metals earns no investment income and may involve higher custody and transaction costs than investments in securities.

For each of the Leuthold Core Investment Fund and the Leuthold Global Fund to qualify as a regulated investment company under current federal tax law, gains from selling metals may not exceed 10% of the Fund’s gross income for its taxable year. This tax requirement could cause the Fund to hold or sell precious metals or securities when it would not otherwise do so, and if the requirement is not satisfied, could cause the Fund to be taxed as a corporation with respect to all of its income.

Cybersecurity Considerations

With the increased use of technologies such as mobile devices and Web-based or “cloud” applications, and the dependence on the Internet and computer systems to conduct business, the Funds are susceptible to operational, information security and related risks. In general, cybersecurity incidents can result from deliberate attacks or unintentional events (arising from external or internal sources) that may cause the Funds to lose proprietary information, suffer data corruption, physical damage to a computer or network system or lose operational capacity. Cybersecurity attacks include, but are not limited to, infection by malicious software, such as malware or computer viruses or gaining unauthorized access to digital systems, networks or devices that are used to service the Funds’ operations (e.g., through “hacking,” “phishing” or malicious software coding) or other means for purposes of misappropriating assets or sensitive information, corrupting data, or causing operational disruption. Cybersecurity attacks may also be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks on the Funds’ website (i.e., efforts to make network services unavailable to intended users). In addition, authorized persons could inadvertently or intentionally release confidential or proprietary information stored on the Funds’ systems.

Cybersecurity incidents affecting the Adviser, other service providers to the Funds or their shareholders (including, but not limited to, Fund accountants, custodians, sub-custodians, transfer agents and financial intermediaries) have the ability to cause disruptions and impact business operations, potentially resulting in financial losses to both the Funds and their shareholders, interference with the Funds’ ability to calculate its net asset value, impediments to trading, the inability of Fund shareholders to transact business and the Funds to process transactions (including fulfillment of fund share purchases and redemptions), violations of applicable privacy and other laws (including the release of private shareholder information) and attendant breach notification and credit monitoring costs, regulatory fines, penalties, litigation costs, reputational damage, reimbursement or other compensation costs, forensic investigation and remediation costs, and/or additional compliance costs. Similar adverse consequences could result from cybersecurity incidents affecting issuers of securities in which the Funds invest, counterparties with which the Funds engages in transactions, governmental and other regulatory authorities, exchange and other financial market operators, banks, brokers, dealers, insurance companies and other financial institutions (including financial intermediaries and other service providers) and other parties.

Recent Market Conditions and Events

Periods of unusually high volatility in the financial markets and restrictive credit conditions, sometimes limited to a particular sector or a geography, continue to occur. The coronavirus pandemic resulted in broad travel restrictions, quarantines, disruptions to supply chains, and general market uncertainty. Health crises caused by outbreaks of disease, such as the coronavirus outbreak, may exacerbate other pre-existing political, social and economic risks and disrupt normal market conditions and operations. In addition, the increasing interconnectedness of markets around the world may result in many markets being affected by events or conditions in a single country or region or events affecting a single or small number of issuers. The duration of the current volatility and its effects, including the possibility of future adverse effects on the Funds, cannot be determined with certainty.

Real Estate Investment Trusts

The Leuthold Core Investment Fund and the Leuthold Global Fund may invest in real estate investment trusts. A real estate investment trust (“REIT”) is a corporation, or a business trust that would otherwise be taxed as a corporation, which meets the definitional requirements of the Internal Revenue Code of 1986, as amended (the “Code”). The Code permits a qualifying REIT to deduct dividends paid, thereby effectively eliminating corporate level federal income tax and making the REIT a pass-through vehicle for federal income tax purposes. To meet the definitional requirements of the Code, a REIT must, among other things, invest substantially all of its assets in interests in real estate (including mortgages and other REITs) or cash and government securities, derive most of its income from rents from real property or interest on loans secured by mortgages on real property, and distribute to shareholders annually a substantial portion of its otherwise taxable income.

REITs are characterized as equity REITs, mortgage REITs and hybrid REITs, which combine the characteristics of both equity and mortgage REITs. Equity REITs, which may include operating or finance companies, own real estate directly and the value of, and income earned by, the REITs depends upon the income of the underlying properties and the rental income they earn. Equity REITs also can realize capital gains (or losses) by selling properties that have appreciated (or depreciated) in value. Mortgage REITs can make construction, development or long-term mortgage loans and are sensitive to the credit quality of the borrower. Mortgage REITs derive their income from interest payments on such loans. Hybrid REITs generally hold both ownership interests and mortgage interests in real estate. The value of securities issued by REITs is affected by tax and regulatory requirements and by perceptions of management skill. They also may be affected by general economic conditions and are subject to heavy cash flow dependency, defaults by borrowers or tenants, self-liquidation at an economically disadvantageous time, and the possibility of failing to qualify for favorable tax treatment under applicable U.S. or foreign law and/or to maintain exempt status under the Investment Company Act.

Foreign Government Obligations

The Leuthold Core Investment Fund and the Leuthold Global Fund may invest in obligations issued or guaranteed by one or more foreign governments or any of their political subdivisions, agencies or instrumentalities. These securities also include debt obligations of supranational entities. Supranational entities include international organizations designated or supported by governmental entities to promote economic reconstruction or development and international banking institutions and related government agencies. Examples include the International Bank for Reconstruction and Development (the “World Bank”), the European Coal and Steel Community, the Asian Development Bank and the Inter-American Development Bank.

Illiquid Securities, Private Placements, Restricted Securities, and IPOs and Other Limited Opportunities

Each Fund may invest up to 15% of its net assets in illiquid securities. Illiquid securities are those securities that a Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment. Each Fund will take into account relevant market, trading and investment specific considerations when determining whether a security is an illiquid security. Illiquid securities may include those securities whose disposition would be subject to legal restrictions (“restricted securities”). Illiquid and restricted securities often have a market value lower than the market price of unrestricted securities of the same issuer and are not readily marketable without some time delay. This could result in a Fund being unable to realize a favorable price upon

disposition of such securities and in some cases might make disposition of such securities at the time desired by the Fund impossible.

Private Placements and Restricted Investments. Illiquid securities include securities of private issuers, securities traded in unregulated or shallow markets, and securities that are purchased in private placements and are subject to legal or contractual restrictions on resale. Because relatively few purchasers of these securities may exist, especially in the event of adverse market or economic conditions or adverse changes in the issuer's financial condition, a Fund could have difficulty selling them when the Adviser believes it advisable to do so or may be able to sell them only at prices that are lower than if they were more widely held. Disposing of illiquid securities may involve time-consuming negotiation and legal expenses, and selling them promptly at an acceptable price may be difficult or impossible.

While private placements may offer attractive opportunities not otherwise available in the open market, the securities purchased are usually restricted securities or are "not readily marketable." Restricted securities cannot be sold without being registered under the 1933 Act, unless they are sold pursuant to an exemption from registration (such as Rules 144 or 144A). Securities that are not readily marketable are subject to other legal or contractual restrictions on resale. A Fund may have to bear the expense of registering restricted securities for resale and the risk of substantial delay in effecting registration. A Fund selling its securities in a registered offering may be deemed to be an "underwriter" for purposes of Section 11 of the 1933 Act. In such event, the Fund may be liable to purchasers of the securities under Section 11 if the registration statement prepared by the issuer, or the prospectus forming a part of it, is materially inaccurate or misleading, although the Fund may have a due diligence defense.

At times, the inability to sell illiquid securities can make it more difficult to determine their fair value for purposes of computing a Fund's net asset value. The judgment of the Adviser normally plays a greater role in valuing these securities than in valuing publicly traded securities.

Lending Portfolio Securities

In order to generate additional income, each Fund may lend portfolio securities constituting up to 30% of its total assets to unaffiliated broker-dealers, banks or other recognized institutional borrowers of securities, provided that the borrower at all times maintains cash, U.S. Government securities or equivalent collateral or provides an irrevocable letter of credit in favor of the Fund equal in value to at least 100% of the value of the securities loaned. During the time portfolio securities are on loan, the borrower pays the lending Fund an amount equivalent to any dividends or interest paid on such securities, and the Fund may receive an agreed-upon amount of interest income from the borrower who delivered equivalent collateral or provided a letter of credit. Loans are subject to termination at the option of the lending Fund or the borrower. The lending Fund may pay reasonable administrative and custodial fees in connection with a loan of portfolio securities and may pay a negotiated portion of the interest earned on the cash or equivalent collateral to the borrower or placing broker. The lending Fund does not have the right to vote securities on loan, but could terminate the loan and regain the right to vote if that were considered important with respect to the investment.

The primary risk in securities lending is a default by the borrower during a sharp rise in price of the borrowed security resulting in a deficiency in the collateral posted by the borrower. The Funds will seek to minimize this risk by requiring that the value of the securities loaned will be computed each day and additional collateral be furnished each day if required. For further information regarding the Funds' lending activities in the most recent fiscal year, please see the section entitled "Securities Lending" below.

Borrowing

Each Fund is authorized to borrow money from banks but may not borrow money for investment purposes. No Fund will purchase any portfolio securities or effect short sales while any borrowed amounts remain outstanding. Typically, if a Fund borrows money, it will be for the purpose of facilitating portfolio management by enabling the Fund to meet redemption requests when the liquidation of portfolio investments would be inconvenient or disadvantageous. If a Fund's borrowing exceeds 5% of its net assets or if not repaid within sixty days, it must maintain asset coverage (total assets less liabilities exclusive of borrowings) of 300% of all amounts borrowed. If, at any time, the value of a Fund's assets should fail to meet this 300% coverage test, the Fund within three business days will reduce the amount of the Fund's borrowings to the extent necessary to meet this 300% coverage. Maintenance of this percentage limitation may result in the sale of

portfolio securities at a time when investment considerations otherwise indicate that it would be disadvantageous to do so.

Portfolio Turnover

Each Fund's annual portfolio turnover rate indicates changes in the Fund's portfolio and is calculated by dividing the lesser of purchases or sales of securities (excluding securities having maturities at acquisition of one year or less) for the fiscal year by the monthly average of the value of the portfolio securities (excluding securities having maturities at acquisition of one year or less) owned by the Fund during the fiscal year.

Temporary Defensive Positions

The Leuthold Grizzly Short Fund will not take temporary defensive positions. Although the Fund will not take a temporary defensive position, the Fund will invest in money market instruments (like U.S. Treasury Bills, commercial paper, or repurchase agreements) and hold some cash so that it can pay expenses and satisfy redemption requests. Unlike the Leuthold Grizzly Short Fund, the Leuthold Core Investment Fund and the Leuthold Global Fund may, in response to adverse market, economic, political, or other conditions, take temporary defensive positions.

Permitted Investments

The following are descriptions of the permitted investments and investment practices and the associated risk factors. The Fund will only invest, directly or indirectly, in any of the following instruments or engage in any of the following investment practices if such investment or activity is consistent with the Fund's investment objective and permitted by the Fund's stated investment policies. Each of the permitted investments described below applies to the Fund to the extent it invests directly in the applicable types of investments or indirectly in underlying funds that invest in the applicable types of investments.

Bank Loans

The Fund may invest in underlying funds that invest in bank loans. Bank loans include floating rate loans and institutionally traded floating rate debt obligations issued by asset-backed pools and other issues, and interests therein. Bank loan interests may be acquired from U.S. or foreign commercial banks, insurance companies, finance companies, or other financial institutions that have made loans or are members of a lending syndicate or from other holders of loan interests. Bank loans typically pay interest at rates that are re-determined periodically on the basis of a floating base lending rate plus a premium. Bank loans are typically of below investment grade quality. Bank loans generally (but not always) hold the most senior position in the capital structure of a borrower and are often secured with collateral.

Holders' claims under unsecured loans are subordinated to claims of creditors holding secured indebtedness and possibly other classes of creditors holding unsecured debt. Unsecured loans have a greater risk of default than secured loans, particularly during periods of deteriorating economic conditions. Also, since they do not afford the lender recourse to collateral, unsecured loans are subject to greater risk of nonpayment in the event of default than secured loans. Many such loans are relatively illiquid and may be difficult to value.

Some bank loans are subject to the risk that a court, pursuant to fraudulent conveyance or other similar laws, could subordinate the bank loans to presently existing or future indebtedness of the borrower or take other action detrimental to the holders of the bank loans, including, in certain circumstances, invalidating such bank loans or causing interest previously paid to be refunded to the borrower. If interest were required to be refunded, it could negatively affect the investing fund's performance.

Indebtedness of companies whose creditworthiness is poor involves substantially greater risks and may be highly speculative. Some companies may never pay off their indebtedness or pay only a small fraction of the amount owed. Consequently, investing in indebtedness of companies with poor credit bears a substantial risk of losing the entire amount invested.

Borrowing

Although the Fund does not intend to borrow money, the Fund may do so to the extent permitted by the 1940 Act. Under the 1940 Act, the Fund may borrow up to one-third (1/3) of its total assets. The Fund will

borrow money only for short-term or emergency purposes. Such borrowing is not for investment purposes and will be repaid by the applicable Fund promptly. Borrowing will tend to exaggerate the effect on NAV of any increase or decrease in the market value of the Fund's portfolio. Money borrowed will be subject to interest costs that may or may not be recovered by earnings on the securities purchased. The Fund also may be required to maintain minimum average balances in connection with a borrowing or to pay a commitment or other fee to maintain a line of credit; either of these requirements would increase the cost of borrowing over the stated interest rate.

Collateralized Debt Obligations

The Fund may invest in underlying funds that invest in collateralized debt obligations ("CDOs"), which are a type of asset-backed security and include, among other things, collateralized bond obligations ("CBOs"), collateralized loan obligations ("CLOs"), and other similarly structured securities. A CBO is a trust which is backed by a diversified pool of high risk, below investment grade fixed income securities. A CLO is a trust typically collateralized by a pool of loans, which may include, among others, domestic and foreign senior secured loans, senior unsecured loans and subordinate corporate loans, including loans that may be rated below investment grade or equivalent unrated loans.

The cash flows from the CDO trust are generally split into two or more portions, called tranches, varying in risk and yield. Senior tranches are paid from the cash flows from the underlying assets before the junior tranches and equity or "first loss" tranches. Losses are first borne by the equity tranches, next by the junior tranches, and finally by the senior tranches. Senior tranches pay the lowest interest rates but are generally safer investments than more junior tranches because, should there be any default, senior tranches are typically paid first. The most junior tranches, such as equity tranches, would attract the highest interest rates but suffer the highest risk should the holder of an underlying loan default. If some loans default and the cash collected by the CDO is insufficient to pay all of its investors, those in the lowest, most junior tranches suffer losses first. Since it is partially protected from defaults, a senior tranche from a CDO trust typically has higher ratings and lower yields than the underlying securities, and can be rated investment grade. Despite the protection from the equity tranche, more senior CDO tranches can experience substantial losses due to actual defaults, increased sensitivity to defaults due to collateral default and disappearance of protecting tranches, market anticipation of defaults and aversion to CDO securities as a class.

The risks of an investment in a CDO depend largely on the quality and type of the collateral and the tranche of the CDO in which a Portfolio invests. Normally, CBOs, CLOs, and other CDOs are privately offered and sold, and thus are not registered under the securities laws. As a result, investments in CDOs may be characterized as illiquid securities. In addition to the risks associated with debt instruments (*e.g.*, interest rate risk and credit risk), CDOs carry additional risks including, but not limited to: (i) the possibility that distributions from collateral securities will not be adequate to make interest or other payments; (ii) the quality of the collateral may decline in value or default; (iii) the possibility that a CDO may be subordinate to other classes; and (iv) the complex structure of the security may not be fully understood at the time of investment and may produce disputes with the issuer or unexpected investment results.

CLOs. The Fund may invest in underlying funds that invest in CLOs. A CLO is a financing company (generally called a Special Purpose Vehicle or "SPV"), created to reapportion the risk and return characteristics of a pool of assets. While the assets underlying CLOs are typically senior loans, the assets may also include (i) unsecured loans, (ii) other debt securities that are rated below investment grade, (iii) debt tranches of other CLOs and (iv) equity securities incidental to investments in senior loans. Lower debt tranches of CLOs typically experience a lower recovery and bear greater risk of loss or deferral or non-payment of interest than more senior debt tranches of the CLO. The underlying senior loans purchased by CLOs are generally performing at the time of purchase but may become non-performing, distressed or defaulted. The key feature of the CLO structure is the prioritization of the cash flows from a pool of debt securities among the several classes of the CLO. The SPV is a company founded solely for the purpose of securitizing payment claims arising out of this diversified asset pool. On this basis, marketable securities are issued by the SPV which, due to the diversification of the underlying risk, generally represent a lower level of risk than the original assets. The redemption of the securities issued by the SPV typically takes place at maturity out of the cash flow generated by the collected claims.

Holders of CLOs bear risks of the underlying investments, index or reference obligation and are subject to counterparty risk.

An underlying fund may have the right to receive payments only from the CLOs, and generally does not have direct rights against the issuer or the entity that sold the assets to be securitized. While certain CLOs enable the investor to acquire interests in a pool of securities without the brokerage and other expenses associated with directly holding the same securities, investors in CLOs generally pay their share of the CLO's administrative and other expenses. Although it is difficult to predict whether the prices of indices and securities underlying a CLO will rise or fall, these prices (and, therefore, the prices of CLOs) will be influenced by the same types of political and economic events that affect issuers of securities and capital markets generally. If the issuer of a CLO uses shorter term financing to purchase longer term securities, the issuer may be forced to sell its securities at below market prices if it experiences difficulty in obtaining short-term financing, which may adversely affect the value of the CLO. Certain CLOs may be thinly traded or have a limited trading market. CLOs are typically privately offered and sold. As a result, investments in CLOs may be characterized as illiquid securities. In addition to the general risks associated with debt securities discussed herein, CLOs carry additional risks, including, but not limited to: (i) the possibility that distributions from collateral securities will not be adequate to make interest or other payments; (ii) the quality of the collateral may decline in value or default; (iii) the possibility that the investments in CLOs are subordinate to other classes or tranches thereof; and (iv) the complex structure of the security may not be fully understood at the time of investment and may produce disputes with the issuer or unexpected investment results.

Commodities and Commodity Contracts

The Fund may invest directly in or in underlying funds that purchase and sell commodity forward and futures contracts and options, enter into foreign exchange contracts, enter into swap agreements and other financial transactions, purchase or sell precious metals directly (metals are considered "commodities" under the federal commodities laws), and purchase or sell precious metal commodity contracts or options on such contracts in compliance with applicable commodities laws. Investing in commodities in this manner carries risks. The Fund's exposure to the commodities markets may subject the Fund to greater volatility than investments in traditional securities. The value of commodity-linked instruments may be affected by changes in overall market movements, commodity index volatility, changes in interest rates, and other risks affecting a particular industry or commodity.

There are additional factors associated with commodity futures contracts which may subject a fund's indirect investments in them to greater volatility than investments in traditional securities. In the commodity futures markets there are often costs of physical storage associated with purchasing the underlying commodity. The price of the commodity futures contract will reflect the storage costs of purchasing the physical commodity, including the time value of money invested in the physical commodity. To the extent that the storage costs for an underlying commodity change while a fund is invested in futures contracts on that commodity, the value of the futures contract may change proportionately. In the commodity futures markets, producers of the underlying commodity may decide to hedge the price risk of selling the commodity by selling futures contracts today to lock in the price of the commodity at delivery tomorrow. To induce speculators to purchase the other side of the same futures contract, the commodity producer generally must sell the futures contract at a lower price than the expected future spot price of the commodity. Conversely, if most hedgers in the futures market are purchasing futures contracts to hedge against a rise in prices, then speculators will only sell the other side of the futures contract at a higher futures price than the expected future spot price of the commodity. The changing nature of the hedgers and speculators in the commodities markets will influence whether futures prices are above or below the expected future spot price, which can have significant implications for a fund. If the nature of hedgers and speculators in futures markets has shifted when it is time for a fund to reinvest the proceeds of a maturing futures contract in a new futures contract, the fund might reinvest at higher or lower futures prices, or choose to pursue other investments. The commodities which underlie commodity futures contracts may be subject to additional economic and non-economic variables, such as drought, floods, weather, livestock disease, embargoes, tariffs, and international economic, political and regulatory developments. These factors may have a larger impact on commodity prices and commodity-linked instruments, including futures contracts, than on traditional securities. Certain commodities are also subject to limited pricing flexibility because of supply and demand factors. Others are subject to broad price fluctuations as a result of the volatility of the prices for certain raw materials and the instability of the supplies of other materials.

Depository Receipts

The Fund may invest directly in or in underlying funds that invest in depository receipts or other securities convertible into securities of foreign issuers. American Depositary Receipts ("ADRs") are dollar-denominated receipts representing interests in the securities of a foreign issuer, which securities may not

necessarily be denominated in the same currency as the securities into which they may be converted. ADRs are receipts typically issued by United States banks and trust companies which evidence ownership of underlying securities issued by a foreign corporation. Generally, ADRs in registered form are designed for use in domestic securities markets and are traded on exchanges or over-the-counter in the United States. Depositary receipts will not necessarily be denominated in the same currency as their underlying securities.

The Fund will not invest in any unlisted Depositary Receipts or any Depositary Receipt that the Adviser deems to be illiquid or for which pricing information is not readily available. In addition, all Depositary Receipts generally must be sponsored. However, the Fund or an underlying fund may invest in unsponsored Depositary Receipts under certain limited circumstances. The issuers of unsponsored Depositary Receipts are not obligated to disclose material information in the United States and, therefore, there may be less information available regarding such issuers and there may not be a correlation between such information and the value of the Depositary Receipts.

Derivatives

The Fund may invest directly in or in underlying funds that use derivative instruments as part of its investment strategies. Generally, derivatives are financial contracts whose value depends upon, or is derived from, the value of an underlying asset, reference rate or index, and may relate to bonds, interest rates, currencies, commodities, and related indexes. Examples of derivative instruments include forward contracts, currency and interest rate swaps, currency options, futures contracts, options on futures contracts and swap agreements.

Swap Agreements. The Fund may invest directly in or in underlying funds that enter into swap agreements, including interest rate swaps. A typical interest rate swap involves the exchange of a floating interest rate payment for a fixed interest payment. Swap agreements may be used to hedge or achieve exposure to, for example, interest rates, and money market securities without actually purchasing such securities. The Fund may invest directly in or in underlying funds that use swap agreements to invest in a market without owning or taking physical custody of the underlying securities in circumstances in which direct investment is restricted for legal reasons or is otherwise impracticable. Swap agreements will tend to shift a fund's investment exposure from one type of investment to another or from one payment stream to another. Depending on their structure, swap agreements may increase or decrease a fund's exposure to long- or short-term interest rates (in the United States or abroad), corporate borrowing rates, or other factors, and may increase or decrease the overall volatility of the fund's investments and its share price.

Futures, Options, and Options on Futures Contracts. The Fund may invest directly in or in underlying funds that enter into U.S. options and options on futures contracts. When a fund purchases a futures contract, it agrees to purchase a specified underlying instrument at a specified future date. When a fund sells a futures contract, it agrees to sell the underlying instrument at a specified future date. The price at which the purchase and sale will take place is fixed when a fund enters into the contract. Futures can be held until their delivery dates, or can be closed out before then if a liquid secondary market is available. To the extent a fund uses futures and options, it will be subject to the applicable requirements of the Commodity Exchange Act and the rules thereunder.

The risk of loss in trading futures contracts or uncovered call options in some strategies (e.g., selling uncovered stock index futures contracts) is potentially unlimited. The Fund may invest directly in or in underlying funds that use futures and options contracts in this way. The risk of a futures position may still be large as traditionally measured due to the low margin deposits required. In many cases, a relatively small price movement in a futures contract may result in immediate and substantial loss or gain to the investor relative to the size of a required margin deposit.

Utilization of futures and options on futures by a fund involves the risk of imperfect or even negative correlation to the underlying index if the index underlying the futures contract differs from the fund's underlying index. There is also the risk of loss by a fund of margin deposits in the event of bankruptcy of a broker with whom the fund has an open position in the futures contract or option. The purchase of put or call options will be based upon predictions by a fund as to anticipated trends, which predictions could prove to be incorrect.

The potential for loss related to the purchase of an option on a futures contract is limited to the premium paid for the option plus transaction costs. Because the value of the option is fixed at the point of sale, there are

no daily cash payments by the purchaser to reflect changes in the value of the underlying contract; however, the value of the option changes daily and that change would be reflected in the NAV of a fund. The potential for loss related to writing options may be unlimited.

The regulation of derivatives markets in the U.S. is a rapidly changing area of law and is subject to modification by government and judicial action. New laws and regulations may negatively impact the Fund by increasing transaction and/or regulatory compliance costs, limiting the availability of certain derivatives or otherwise adversely affecting the value or performance of the derivatives the Fund trades. In October 2020, the SEC adopted Rule 18f-4 under the 1940 Act, with a compliance date of August 19, 2022. Funds that are subject to the rule are required to adopt and implement a written derivatives risk management program and quantitatively limit their use of derivatives based on the estimated potential risk of loss that the funds incur from their derivatives transactions. Funds that limit derivatives exposure to 10% of net assets are exempt from many of the requirements of Rule 18f-4, but must still adopt and implement policies and procedures reasonably designed to manage the fund's derivatives risks. Rule 18f-4 governs the way funds must comply with the asset segregation and coverage requirements of Section 18 of the 1940 Act with respect to derivatives and certain other financing transactions.

Equity Securities

Equity securities, such as the common stocks of an issuer, are subject to stock market fluctuations and therefore may experience volatile changes in value as market conditions, consumer sentiment or the financial condition of the issuers change. A decrease in value of the equity securities in the Fund's portfolio may also cause the value of the Shares to decline.

An investment in the Fund should be made with an understanding of the risks inherent in an investment in equity securities, including the risk that the financial condition of issuers may become impaired or that the general condition of the stock market may deteriorate (either of which may cause a decrease in the value of the Fund's portfolio securities and therefore a decrease in the value of Shares). Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence and perceptions change. These investor perceptions are based on various and unpredictable factors, including expectations regarding government, economic, monetary and fiscal policies; inflation and interest rates; economic expansion or contraction; and global or regional political, economic or banking crises.

Holders of common stocks incur more risk than holders of preferred stocks and debt obligations because common stockholders, as owners of the issuer, generally have inferior rights to receive payments from the issuer in comparison with the rights of creditors or holders of debt obligations or preferred stocks. Further, unlike debt securities, which typically have a stated principal amount payable at maturity (whose value, however, is subject to market fluctuations prior thereto), or preferred stocks, which typically have a liquidation preference and which may have stated optional or mandatory redemption provisions, common stocks have neither a fixed principal amount nor a maturity. Common stock values are subject to market fluctuations as long as the common stock remains outstanding.

When-Issued Securities – A when-issued security is one whose terms are available and for which a market exists, but which has not been issued. When the Fund engages in when-issued transactions, it relies on the other party to consummate the sale. If the other party fails to complete the sale, the Fund may miss the opportunity to obtain the security at a favorable price or yield.

When purchasing a security on a when-issued basis, the Fund assumes the rights and risks of ownership of the security, including the risk of price and yield changes. At the time of settlement, the value of the security may be more or less than the purchase price. The yield available in the market when the delivery takes place also may be higher than those obtained in the transaction itself. Because the Fund does not pay for the security until the delivery date, these risks are in addition to the risks associated with its other investments.

Decisions to enter into “when-issued” transactions will be considered on a case-by-case basis when necessary to maintain continuity in a company’s index membership.

Types of Equity Securities:

Common Stocks – Common stocks represent units of ownership in a company. Common stocks usually carry voting rights and earn dividends. Unlike preferred stocks, which are described below, dividends on common stocks are not fixed but are declared at the discretion of the company’s board of directors.

Preferred Stocks – Preferred stocks are also units of ownership in a company. Preferred stocks normally have preference over common stock in the payment of dividends and the liquidation of the company. However, in all other respects, preferred stocks are subordinated to the liabilities of the issuer. Unlike common stocks, preferred stocks are generally not entitled to vote on corporate matters. Types of preferred stocks include adjustable-rate preferred stock, fixed dividend preferred stock, perpetual preferred stock, and sinking fund preferred stock.

Generally, the market values of preferred stock with a fixed dividend rate and no conversion element vary inversely with interest rates and perceived credit risk.

Rights and Warrants – A right is a privilege granted to existing shareholders of a corporation to subscribe to shares of a new issue of common stock before it is issued. Rights normally have a short life of usually two to four weeks, are freely transferable and entitle the holder to buy the new common stock at a lower price than the public offering price. Warrants are securities that are usually issued together with a debt security or preferred stock and that give the holder the right to buy proportionate amount of common stock at a specified price. Warrants are freely transferable and are traded on major exchanges. Unlike rights, warrants normally have a life that is measured in years and entitles the holder to buy common stock of a company at a price that is usually higher than the market price at the time the warrant is issued. Corporations often issue warrants to make the accompanying debt security more attractive.

An investment in warrants and rights may entail greater risks than certain other types of investments. Generally, rights and warrants do not carry the right to receive dividends or exercise voting rights with respect to the underlying securities, and they do not represent any rights in the assets of the issuer. In addition, their value does not necessarily change with the value of the underlying securities, and they cease to have value if they are not exercised on or before their expiration date. Investing in rights and warrants increases the potential profit or loss to be realized from the investment as compared with investing the same amount in the underlying securities.

Smaller-Capitalization Companies. Investors in smaller-capitalization companies typically take on greater risk and price volatility than they would by investing in larger, more established companies. This increased risk may be due to the greater business risks of their smaller size, limited markets and financial resources, narrow product lines and frequent lack of management depth. The securities of smaller-capitalization companies are often traded in the over-the-counter market and might not be traded in volumes typical of securities traded on a national securities exchange. Thus, the securities of smaller capitalization companies are likely to be less liquid, and subject to more abrupt or erratic market movements, than securities of larger, more established companies.

Tracking Stocks. The Fund may hold investments in tracking stocks directly or through an underlying fund, which invests in tracking stocks. A tracking stock is a separate class of common stock whose value is linked to a specific business unit or operating division within a larger company and which is designed to “track” the performance of such business unit or division. The tracking stock may pay dividends to shareholders independent of the parent company. The parent company, rather than the business unit or division, generally is the issuer of tracking stock. However, holders of the tracking stock may not have the same rights as holders of the company’s common stock.

Exchange-Traded Notes

Exchange-traded notes (“ETNs”) are debt obligations of investment banks which are traded on exchanges and the returns of which are linked to the performance of market indexes. In addition to trading ETNs on exchanges, investors may redeem ETNs directly with the issuer on a weekly basis, typically in a minimum amount of 50,000 units, or hold the ETNs until maturity. ETNs may be riskier than ordinary debt

securities and may have no principal protection. The Fund's investment in an ETN may be influenced by many unpredictable factors, including highly volatile commodities prices, changes in supply and demand relationships, weather, agriculture, trade, changes in interest rates, and monetary and other governmental policies, action and inaction. Investing in ETNs is not equivalent to investing directly in index components or the relevant index itself. Because ETNs are debt securities, they possess credit risk; if the issuer has financial difficulties or goes bankrupt, the investor may not receive the return it was promised.

Fixed Income Securities

The Fund may invest directly in or in underlying funds that invest in fixed income securities. Fixed income securities change in value in response to interest rate changes and other factors, such as the perception of the issuer's creditworthiness. For example, the value of fixed income securities will generally decrease when interest rates rise, which may cause the value of the investing fund, and the Fund, to decrease. In addition, investments in fixed income securities with longer maturities will fluctuate more in response to interest rate changes.

Fixed-Income Securities Ratings

The nationally recognized statistical rating organizations publish ratings based upon their assessment of the relative creditworthiness of the rated fixed-income securities. Generally, a lower rating indicates higher credit risk, and higher yields are ordinarily available from fixed-income securities in the lower rating categories to compensate investors for the increased credit risk. Any use of credit ratings in evaluating fixed-income securities can involve certain risks. For example, ratings assigned by the rating agencies are based upon an analysis completed at the time of the rating of the obligor's ability to pay interest and repay principal, typically relying to a large extent on historical data. Rating agencies typically rely to a large extent on historical data which may not accurately represent present or future circumstances. Ratings do not purport to reflect to risk of fluctuations in market value of the fixed-income security and are not absolute standards of quality and only express the rating agency's current opinion of an obligor's overall financial capacity to pay its financial obligations. A credit rating is not a statement of fact or a recommendation to purchase, sell or hold a fixed-income obligation. Also, credit quality can change suddenly and unexpectedly, and credit ratings may not reflect the issuer's current financial condition or events since the security was last rated. Rating agencies may have a financial interest in generating business, including the arranger or issuer of the security that normally pays for that rating, and a low rating might affect future business. While rating agencies have policies and procedures to address this potential conflict of interest, there is a risk that these policies will fail to prevent a conflict of interest from impacting the rating. Additionally, legislation has been enacted in an effort to reform rating agencies. Rules have also been adopted by the SEC to require rating agencies to provide additional disclosure and reduce conflicts of interest, and further reform has been proposed. It is uncertain how such legislation or additional regulation might impact the ratings agencies business and a fund's investment process.

High Yield Securities Risk

The Fund may invest directly in or in underlying funds that invest in high yield securities and unrated securities of similar credit quality (commonly known as "junk bonds"). High yield securities generally pay higher yields (greater income) than investment in higher quality securities; however, high yield securities may be subject to greater levels of interest rate, credit and liquidity risk than funds that do not invest in such securities, and are considered predominantly speculative with respect to an issuer's continuing ability to make principal and interest payments. Successful investment in high yield securities and unrated securities of similar quality involves greater investment risk and is highly dependent on the applicable investment adviser's credit analysis. The value of these securities often fluctuates in response to company, political or economic developments and declines significantly over short periods of time or during periods of general economic difficulty. An economic downturn or period of rising interest rates could adversely affect the market for these securities and reduce the ability to sell these securities (liquidity risk). These securities can also be thinly traded or have restrictions on resale, making them difficult to sell at an acceptable price. Because objective pricing data may be less available, judgment may play a greater role in the valuation process. If the issuer of a security is in default with respect to interest or principal payments, the investing Fund may lose its entire investment.

Illiquid Securities

The Fund may invest up to an aggregate amount of 15% of its net assets in illiquid securities. Illiquid securities include securities subject to contractual or other restrictions on resale and other instruments that lack readily available markets.

The inability of the Fund to dispose of illiquid or not readily marketable investments readily or at a reasonable price could impair the Fund's ability to raise cash for redemptions or other purposes. The liquidity of securities purchased by the Fund which are eligible for resale pursuant to Rule 144A, except for certain 144A bonds, will be monitored by the Fund on an ongoing basis. In the event that such a security is deemed to be no longer liquid, the Fund's holdings will be reviewed to determine what action, if any, is required to ensure that the retention of such security does not result in the Fund having more than 15% of its net assets invested in illiquid or not readily marketable securities.

Investment Company Securities

The Fund may invest in the securities of other investment companies, including ETFs and money market funds, subject to applicable limitations under Section 12(d)(1) of the 1940 Act. Pursuant to Section 12(d)(1), the Fund may invest in the securities of another investment company (the "acquired company") provided that the Fund, immediately after such purchase or acquisition, does not own in the aggregate: (i) more than 3% of the total outstanding voting stock of the acquired company; (ii) securities issued by the acquired company having an aggregate value in excess of 5% of the value of the total assets of the Fund; or (iii) securities issued by the acquired company and all other investment companies (other than treasury stock of the Fund) having an aggregate value in excess of 10% of the value of the total assets of the Fund. To the extent allowed by law or regulation, the Fund may invest its assets in securities of investment companies that are money market funds in excess of the limits discussed above.

If the Fund invests in and, thus, is a shareholder of, another investment company, the Fund's shareholders will indirectly bear the Fund's proportionate share of the fees and expenses paid by such other investment company, including advisory fees, in addition to both the management fees payable directly by the Fund to the Fund's own investment adviser and the other expenses that the Fund bears directly in connection with the Fund's own operations.

Section 12(d)(1) of the 1940 Act restricts investments by registered investment companies in securities of other registered investment companies, including the Fund. The acquisition of the Fund's Shares by registered investment companies is subject to the restrictions of Section 12(d)(1) of the 1940 Act, except as may be permitted by exemptive rules under the 1940 Act or as may at some future time be permitted by an exemptive order that permits registered investment companies to invest in the Fund beyond the limits of Section 12(d)(1), subject to certain terms and conditions, including that the registered investment company enter into an agreement with the Fund regarding the terms of the investment.

The Fund may rely on Section 12(d)(1)(F) and Rule 12d1-3 of the 1940 Act, which provide an exemption from Section 12(d)(1) that allows the Fund to invest all of its assets in other registered funds, including ETFs, if, among other conditions: (a) the Fund, together with its affiliates, acquires no more than three percent of the outstanding voting stock of any acquired fund, and (b) the sales load charged on the Fund's Shares is no greater than the limits set forth in Rule 2830 of the Conduct Rules of the Financial Industry Regulatory Authority, Inc. ("FINRA").

In October 2020, the SEC adopted regulatory changes related to the ability of an investment company to invest in other investment companies in excess of specified statutory limits. These changes include, among other things, amendments to Rule 12d1-1, the rescission of Rule 12d1-2, the adoption of new Rule 12d1-4, and the rescission of certain exemptive relief issued by the SEC permitting certain fund of funds arrangements. Rule 12d1-4, which became effective on January 19, 2021, permits the Fund to invest in other investment companies, including money market funds, beyond the statutory limits, subject to certain conditions. The rescission of the applicable exemptive orders and the withdrawal of the applicable no-action letters was effective on January 19, 2022. Following this effectiveness, an investment company is no longer able to rely on these exemptive orders and no-action letters, and is subject instead to Rule 12d1-4 and other applicable rules under Section 12(d)(1).

Additionally, there may not be an active trading market available for shares of some closed-end management investment companies (“CEFs”). Shares of a CEF may also trade in the market at a premium or discount to their NAV.

Master Limited Partnerships (“MLPs”)

MLPs are limited partnerships in which the ownership units are publicly traded. MLP units are registered with the SEC and are freely traded on a securities exchange or in the over-the-counter market. MLPs often own several properties or businesses (or own interests) that are related to real estate development and oil and gas industries, but they also may finance motion pictures, research and development and other projects. Generally, a MLP is operated under the supervision of one or more managing general partners. Limited partners are not involved in the day-to-day management of the partnership.

The risks of investing in a MLP are generally those involved in investing in a partnership as opposed to a corporation. For example, state law governing partnerships is often less restrictive than state law governing corporations. Accordingly, there may be fewer protections afforded investors in a MLP than investors in a corporation. Additional risks involved with investing in a MLP are risks associated with the specific industry or industries in which the partnership invests, such as the risks of investing in real estate, or oil and gas industries.

MLPs are generally treated as partnerships for U.S. federal income tax purposes. When the Fund invests in the equity securities of an MLP or any other entity that is treated as a partnership for U.S. federal income tax purposes, the Fund will be treated as a partner in the entity for tax purposes. Accordingly, in calculating the Fund’s taxable income, it will be required to take into account its allocable share of the income, gains, losses, deductions, and credits recognized by each such entity, regardless of whether the entity distributes cash to the Fund. Distributions from such an entity to the Fund are not generally taxable unless the cash amount (or, in certain cases, the fair market value of marketable securities) distributed to the Fund exceeds the Fund’s adjusted tax basis in its interest in the entity. In general, the Fund’s allocable share of such an entity’s net income will increase the Fund’s adjusted tax basis in its interest in the entity, and distributions to the Fund from such an entity and the Fund’s allocable share of the entity’s net losses will decrease the Fund’s adjusted basis in its interest in the entity, but not below zero. The Fund may receive cash distributions from such an entity in excess of the net amount of taxable income the Fund is allocated from its investment in the entity. In other circumstances, the net amount of taxable income the Fund is allocated from its investment in such an entity may exceed cash distributions received from the entity. Thus, the Fund’s investments in such an entity may lead the Fund to make distributions in excess of its earnings and profits, or the Fund may be required to sell investments, including when not otherwise advantageous to do so, to satisfy the distribution requirements applicable to regulated investment companies under the Code (as defined below).

Depreciation or other cost recovery deductions passed through to the Fund from any investments in MLPs in a given year will generally reduce the Fund’s taxable income, but those deductions may be recaptured in the Fund’s income in one or more subsequent years. When recognized and distributed, recapture income will generally be taxable to the Fund’s shareholders at the time of the distribution at ordinary income tax rates, even though those shareholders might not have held shares in the Fund at the time the deductions were taken, and even though those shareholders may not have corresponding economic gain on their shares at the time of the recapture. To distribute recapture income or to fund redemption requests, the Fund may need to liquidate investments, which may lead to additional taxable income.

Mortgage-Backed and Asset-Backed Securities

The Fund may invest in underlying funds that invest in mortgage-backed and asset-backed securities. Mortgage-backed securities are mortgage-related securities issued or guaranteed by the U.S. government, its agencies and instrumentalities, or issued by nongovernment entities. Mortgage-related securities represent ownership in pools of mortgage loans assembled for sale to investors by various government agencies such as the Government National Mortgage Association (“GNMA”) and government-related organizations such as the Federal National Mortgage Association (“FNMA”) and the Federal Home Loan Mortgage Corporation (“FHLMC”), as well as by nongovernment issuers such as commercial banks, savings and loan institutions, mortgage bankers and private mortgage insurance companies. Although certain mortgage-related securities are guaranteed by a third party or otherwise similarly secured, the market value of the security, which may fluctuate, is not so secured. These securities differ from conventional bonds in that the principal is paid back to the investor as payments are made on the underlying mortgages in the pool. Accordingly, the investing fund receives monthly scheduled payments of principal and interest along with any unscheduled principal

prepayments on the underlying mortgages. Because these scheduled and unscheduled principal payments must be reinvested at prevailing interest rates, mortgage-backed securities do not provide an effective means of locking in long-term interest rates for the investor.

In addition, there are a number of important differences among the agencies and instrumentalities of the U.S. government that issue mortgage-related securities and among the securities they issue. Mortgage-related securities issued by GNMA include GNMA Mortgage Pass-Through Certificates (also known as “Ginnie Maes”) which are guaranteed as to the timely payment of principal and interest. That guarantee is backed by the full faith and credit of the U.S. Treasury. GNMA is a corporation wholly owned by the U.S. government within the Department of Housing and Urban Development. Mortgage-related securities issued by FNMA include FNMA Guaranteed Mortgage Pass-Through Certificates (also known as “Fannie Maes”) and are guaranteed as to payment of principal and interest by FNMA itself and backed by a line of credit with the U.S. Treasury. FNMA is a government-sponsored entity wholly owned by public stockholders. Mortgage-related securities issued by FHLMC include FHLMC Mortgage Participation Certificates (also known as “Freddie Macs”) guaranteed as to payment of principal and interest by FHLMC itself and backed by a line of credit with the U.S. Treasury. FHLMC is a government-sponsored entity wholly owned by public stockholders.

On September 7, 2008, the U.S. Treasury announced a federal takeover of Federal National Mortgage Association (“Fannie Mae”) and the Federal Home Loan Mortgage Corporation (“Freddie Mac”), placing the two federal instrumentalities in conservatorship. Under the takeover, the U.S. Treasury agreed to acquire \$1 billion of senior preferred stock of each instrumentality and obtained warrants for the purchase of common stock of each instrumentality (the “Senior Preferred Stock Purchase Agreement” or “Agreement”). Under the Agreement, the U.S. Treasury pledged to provide up to \$200 billion per instrumentality as needed, including the contribution of cash capital to the instrumentalities in the event their liabilities exceed their assets. This was intended to ensure that the instrumentalities maintain a positive net worth and meet their financial obligations, preventing mandatory triggering of receivership. On December 24, 2009, the U.S. Treasury announced that it was amending the Agreement to allow the \$200 billion cap on the U.S. Treasury’s funding commitment to increase as necessary to accommodate any cumulative reduction in net worth over the next three years. As a result of this Agreement, the investments of holders, including the Fund, of mortgage-backed securities and other obligations issued by Fannie Mae and Freddie Mac are protected.

Asset-backed securities are structured like mortgage-backed securities, but instead of mortgage loans or interests in mortgage loans, the underlying assets may include such items as motor vehicle installment sales contracts or installment loan contracts, leases of various types of real and personal property, and receivables from credit card agreements and from sales of personal property. Regular payments received on asset-backed securities include both interest and principal. Asset-backed securities typically have no U.S. government backing. Additionally, the ability of an issuer of asset-backed securities to enforce its security interest in the underlying assets may be limited.

If the investing Fund purchases a mortgage-backed or other asset-backed security at a premium, the premium may be lost if there is a decline in the market value of the security whether resulting from changes in interest rates or prepayments in the underlying collateral. As with other interest-bearing securities, the prices of such securities are inversely affected by changes in interest rates. Although the value of a mortgage-backed or other asset-backed security may decline when interest rates rise, the converse is not necessarily true, since in periods of declining interest rates the mortgages and loans underlying the securities are prone to prepayment, thereby shortening the average life of the security and shortening the period of time over which income at the higher rate is received. When interest rates are rising, the rate of prepayment tends to decrease, thereby lengthening the period of time over which income at the lower rate is received. For these and other reasons, a mortgage-backed or other asset-backed security’s average maturity may be shortened or lengthened as a result of interest rate fluctuations and, therefore, it is not possible to predict accurately the security’s return. In addition, while the trading market for short-term mortgages and asset-backed securities is ordinarily quite liquid, in times of financial stress the trading market for these securities may become restricted.

Municipal Obligations and Related Investments

The Fund may invest in underlying funds that invest in municipal obligations and related investments, as described below. Municipal obligations include debt obligations issued by states, possessions and territories of the U.S., including political subdivisions (such as counties, cities, towns and school and other districts), agencies and authorities thereof. Municipal obligations are issued by such governmental entities to obtain funds for various public purposes, including the construction of a wide range of public facilities, the refunding of

outstanding obligations, the payment of general operating expenses and the extension of loans to public institutions and facilities, not-for-profit organizations, businesses and developers. Municipal obligations may be subject to federal and state income tax. The Fund may invest in underlying funds that invest in the following types of municipal obligations:

General Obligation Bonds. General obligation bonds are supported by the issuer's full faith and credit and taxing authority. The issuer must levy and collect taxes sufficient to pay principal and interest on the bonds. However, in some cases the issuer's authority to levy additional taxes may be limited by its charter or state law.

Revenue Bonds. Revenue bonds are payable solely from specific income or revenues received by the issuer, often from its operation of a governmental enterprise or authority such as an electric or water utility, sewer system, parks, hospitals or other health authority, bus, train, subway, highway, airport or other transportation system, or housing authority. Some revenue bonds may be issued for other public purposes, such as financing the development of an industrial park or commercial district or construction of a new stadium, parking structure or stadium. The revenues may consist of specific taxes, assessments, tolls, fees, or other types of municipal revenues. Although issued by municipal authorities, revenue bonds are generally not secured by the taxing power of the municipality but by the revenues of the authority derived from payments by users of the services or owners and operators of the facility financed with the proceeds of the bonds. Bonds or other obligations of housing financing authorities may have various forms of security, such as reserve funds, insured or subsidized mortgages and net revenues from projects, but they are not backed by a pledge of the issuer's credit. The credit quality of revenue bonds is usually related to the credit standing of the enterprise being financed but can, if applicable, be tied to the credit worthiness of an institution which provides a guarantee, letter of credit or other credit enhancement for the bond issue.

Private Activity Bonds. Private activity bonds are special revenue bonds used to finance private entities. For example, a municipality may issue bonds to finance a new factory to improve its local economy or to enable a college or university, not-for-profit organization or hospital to construct new or expanded facilities. The municipality would lend the proceeds to the company or other entity, and the company or other entity would agree to make loan payments sufficient to repay the bonds. The bonds would be payable solely from the borrower's loan payments, and not from any other revenues of the municipality. Therefore, any default on the loan normally would result in a default on the bonds. The interest on many types of private activity bonds is subject to the federal alternative minimum tax ("AMT").

Anticipation Notes. Anticipation notes are securities issued in anticipation of the receipt of taxes, grants, bond proceeds, or other municipal revenues. These may be in the form of bond anticipation notes, tax anticipation notes, tax and revenue anticipation notes, and revenue anticipation notes. For example, many municipalities collect property taxes once a year. Such municipalities may issue tax anticipation notes to fund their operations prior to collecting these taxes. The issuers then repay the tax anticipation notes at the end of their fiscal year, either with collected taxes or proceeds from newly issued notes or bonds. Bond anticipation notes are notes that are intended to be refinanced through a subsequent offering of longer term bonds.

Tax Increment Financing Bonds. Tax increment financing bonds are payable from increases in taxes or other revenues attributable to higher valuations on the businesses benefitting from improvements made to a particular area or district financed by the bonds. For example, a municipality may issue these bonds to redevelop a commercial area. The tax increment financing bonds would be payable solely from any increase in sales taxes collected from merchants in the area or in property taxes collected from property owners. The bonds could default if merchants' sales or owners' property valuations, and related tax collections, failed to increase as anticipated.

Municipal obligations also include municipal commercial paper and other short-term notes, variable rate demand obligations, industrial revenue bonds, pre-refunded or advance refunding bonds, municipal lease obligations, construction loan notes insured by the Federal Housing Administration and financed by FNMA or GNMA, and participation, trust and partnership interests in any of the foregoing.

Opinions relating to the validity of municipal obligations and to the exemption of interest thereon from federal income tax are rendered by bond counsel to the respective issuers at the time of issuance. There can be no assurance that the Internal Revenue Service ("IRS") will agree with a bond counsel's opinion concluding that interest on a particular obligation is exempt from federal income tax.

Certain municipal obligations may be insured at the time of issuance as to the timely payment of principal and interest. The insurance policies will usually be obtained by the issuer of the municipal obligation at the time of its original issuance. In the event that the issuer defaults on interest or principal payment, the insurer will be notified and will be required to make payment to the bondholders. There is, however, no guarantee that the insurer will meet its obligations. In addition, such insurance will not protect against market fluctuations caused by changes in interest rates and other factors, including credit downgrades, supply and demand.

The payment of principal and interest on most debt obligations purchased by the Fund will depend upon the ability of the issuers to meet their obligations. Municipal obligations may be adversely affected by political and economic conditions and developments (for example, legislation reducing state aid to local governments.) An issuer's obligations under its municipal obligations are also subject to the provisions of bankruptcy, insolvency, and other laws affecting the rights and remedies of creditors, such as the U.S. Bankruptcy Code, and laws, if any, which may be enacted by federal or state legislatures extending the time for payment of principal or interest, or both, or imposing other constraints upon enforcement of such obligations or upon the ability of municipalities to levy taxes. The power or ability of an issuer to meet its obligations for the payment of interest on, and principal of, its municipal obligations may be materially adversely affected by litigation or other conditions.

Certain types of municipal obligations (private activity bonds) have been or are issued to obtain funds to provide privately operated housing facilities, pollution control facilities, convention or trade show facilities, mass transit, airport, port or parking facilities and certain local facilities for water supply, gas, electricity or sewage or solid waste disposal. Private activity bonds are also issued on behalf of privately held or publicly owned corporations in the financing of commercial or industrial facilities. State and local governments are authorized in most states to issue private activity bonds for such purposes to encourage corporations to locate within their communities. The principal and interest on these obligations may be payable from the general revenues of the users of such facilities.

Municipal obligations may be backed by letters of credit issued by foreign and domestic banks and other financial institutions. Such letters of credit are not necessarily subject to federal deposit insurance and adverse developments in the banking industry could have a negative effect on the credit quality of the investing fund's portfolio debt obligations and its ability to maintain a stable net asset value and share price. Letters of credit issued by foreign banks, like other obligations of foreign banks, may involve certain risks in addition to those of domestic obligations.

From time to time, proposals have been introduced before Congress for the purpose of restricting or eliminating the federal income tax exemption for interest on municipal obligations. For example, under the Internal Revenue Code of 1986, as amended (the "Code"), interest on certain private activity bonds must be included in an investor's alternative minimum taxable income, and corporate investors must include all tax-exempt interest in their calculations of federal alternative minimum taxable income. The Fund cannot, of course, predict what legislation, if any, may be proposed in the future as regards the income tax status of interest on municipal obligations, or which proposals, if any, might be enacted. Such proposals, while pending or if enacted, might materially and adversely affect the availability of municipal obligations for investment by the investing fund and the liquidity and value of its portfolio.

Municipal Lease Obligations. Municipal lease obligations are issued by a state or local government authority to acquire land and a wide variety of equipment and facilities. These obligations typically are not fully backed by the municipality's credit, and their interest may become taxable if the lease is assigned. If the funds are not appropriated for the following year's lease payments, the lease may terminate, with the possibility of default on the lease obligation and significant loss to an investing fund. Certificates of participation in municipal lease obligations or installment sale contracts entitle the holder to a proportionate interest in the lease-purchase payments made.

Non-U.S. Securities

The Fund may invest directly in or in underlying funds that invest in non-U.S. securities. Investments in non-U.S. securities involve certain risks that may not be present in investments in U.S. securities. For example, non-U.S. securities may be subject to currency risks or to political or economic instability. There may be less information publicly available about a non-U.S. issuer than about a U.S. issuer, and a foreign issuer may or may not be subject to uniform accounting, auditing and financial reporting standards and practices comparable to

those in the U.S. Investments in non-U.S. securities may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. Other risks of investing in such securities include political or economic instability in the country involved, the difficulty of predicting international trade patterns and the possibility of imposition of exchange controls. The prices of such securities may be more volatile than those of domestic securities. With respect to certain foreign countries, there is a possibility of expropriation of assets or nationalization, imposition of withholding taxes on dividend or interest payments, difficulty in obtaining and enforcing judgments against foreign entities or diplomatic developments which could affect investment in these countries. Losses and other expenses may be incurred in converting between various currencies in connection with purchases and sales of foreign securities. Since foreign exchanges may be open on days when the Fund does not price its shares, the value of the securities in the Fund's portfolio may change on days when shareholders will not be able to purchase or sell the Fund's shares. Conversely, Shares may trade on days when foreign exchanges are closed. Each of these factors can make investments in the Fund more volatile and potentially less liquid than other types of investments.

Investments in Canada. The U.S. is Canada's largest trading partner and foreign investor. As a result, changes to the U.S. economy may significantly affect the Canadian economy. The Canadian economy is reliant on the sale of natural resources and commodities, which can pose risks such as the fluctuation of prices and the variability of demand for exportation of such products. Canada is a major producer of commodities such as zinc, uranium, forest products, metals, agricultural products, and energy related products like oil, gas, and hydroelectricity. Changes in spending on Canadian products by the economies of other countries or changes in any of these economies may cause a significant impact on the Canadian economy.

Investments in China and Hong Kong. Investing directly in or in ADRs with underlying shares organized, listed or domiciled in China involves special considerations not typically associated with investing in countries with more democratic governments or more established economies or securities markets. Such risks may include: (i) the risk of nationalization or expropriation of assets or confiscatory taxation; (ii) greater social, economic and political uncertainty (including the risk of war); (iii) dependency on exports and the corresponding importance of international trade; (iv) increasing competition from Asia's other low-cost emerging economies; (v) higher rates of inflation; (vi) controls on foreign investment and limitations on repatriation of invested capital; (vii) greater governmental involvement in and control over the economy; (viii) the risk that the Chinese government may decide not to continue to support the economic reform programs implemented since 1978 and could return to the prior, completely centrally planned, economy; (ix) the fact that Chinese companies, particularly those located in China, may be smaller, less seasoned and newly organized; (x) the differences in, or lack of, auditing and financial reporting standards which may result in unavailability of material information about issuers, particularly in China; (xi) the fact that statistical information regarding the economy of China may be inaccurate or not comparable to statistical information regarding the U.S. or other economies; (xii) the less extensive, and still developing, regulation of the securities markets, business entities and commercial transactions; (xiii) the fact that the settlement period of securities transactions in foreign markets may be longer; (xiv) the fact that the willingness and ability of the Chinese government to support the Chinese and Hong Kong economies and markets is uncertain; (xv) the risk that it may be more difficult, or impossible, to obtain and/or enforce a judgment than in other countries; (xvi) the rapid and erratic nature of growth, particularly in China, resulting in inefficiencies and dislocations; (xvii) the risk that, because of the degree of interconnectivity between the economies and financial markets of China and Hong Kong, any sizable reduction in the demand for goods from China, or an economic downturn in China, could negatively affect the economy and financial market of Hong Kong as well; and (xviii) the risk that certain companies owned by the Fund may have dealings with countries subject to sanctions or embargoes imposed by the U.S. Government or identified as state sponsors of terrorism.

After many years of steady growth, the growth rate of China's economy has recently slowed. Although this slowdown was to some degree intentional, the slowdown has also slowed the once rapidly growing Chinese real estate market and left local governments with high debts with few viable means to raise revenue, especially with the fall in demand for housing. Despite its attempts to restructure its economy towards consumption, China remains heavily dependent on exports. Accordingly, China is susceptible to economic downturns abroad, including any weakness in demand from its major trading partners, including the United States, Japan, and Europe. In addition, China's aging infrastructure, worsening environmental conditions, rapid and inequitable urbanization, quickly widening urban and rural income gap, domestic unrest and provincial separatism all present major challenges to the country. Further, China's territorial claims, including its land reclamation projects and the establishment of an Air Defense Identification Zone over islands claimed and occupied by Japan, are another source of tension and present risks to diplomatic and trade relations with certain of China's regional trade partners.

Investments in Hong Kong are also subject to certain political risks not associated with other investments. Following the establishment of the People's Republic of China by the Communist Party in 1949, the Chinese government renounced various debt obligations incurred by China's predecessor governments, which obligations remain in default, and expropriated assets without compensation. There can be no assurance that the Chinese government will not take similar action in the future. Investments in China and Hong Kong involve risk of a total loss due to government action or inaction. China has committed by treaty to preserve Hong Kong's autonomy and its economic, political and social freedoms for 50 years from the July 1, 1997 transfer of sovereignty from Great Britain to China. However, recent attempts by China to exert its authority within Hong Kong may alter the economic, political and/or legal structures, or the existing social policy of Hong Kong, which could negatively affect investor and business confidence in Hong Kong, which, in turn, could negatively affect markets and business performance. In addition, the Hong Kong dollar trades at a fixed exchange rate in relation to (or, is "pegged" to) the U.S. dollar, which has contributed to the growth and stability of the Hong Kong economy. However, it is uncertain how long the currency peg will continue or what effect the establishment of an alternative exchange rate system would have on the Hong Kong economy. Because the Fund's NAV is denominated in U.S. dollars, the establishment of an alternative exchange rate system could result in a decline in the Fund's NAV. These and other factors could have a negative impact on the Fund's performance.

Investments in Emerging Markets. Investments in securities listed and traded in emerging markets are subject to additional risks that may not be present for U.S. investments or investments in more developed non-U.S. markets. Such risks may include: (i) greater market volatility, (ii) lower trading volume, (iii) greater social, political and economic uncertainty, (iv) governmental controls on foreign investments and limitations on repatriation of invested capital, (v) the risk that companies may be held to lower disclosure, corporate governance, auditing and financial reporting standards than companies in more developed markets, and (vi) the risk that there may be less protection of property rights than in other countries. Emerging markets are generally less liquid and less efficient than developed securities markets.

Investments in Europe. Most developed countries in Western Europe are members of the European Union ("EU"), and many are also members of the European Monetary Union, which requires compliance with restrictions on inflation rates, deficits, and debt levels. Unemployment in certain European nations is historically high and several countries face significant debt problems. These conditions can significantly affect every country in Europe. The euro is the official currency of the EU. To the extent the Fund invests in Europe, the Fund may have significant exposure to the euro and events affecting the euro. Recent market events affecting several of the EU member countries have adversely affected the sovereign debt issued by those countries, and ultimately may lead to a decline in the value of the euro. A significant decline in the value of the euro may produce unpredictable effects on trade and commerce generally and could lead to increased volatility in financial markets worldwide.

Investments in Japan. The Japanese economy has recently emerged from a prolonged economic downturn. Since 2000, Japan's economic growth rate has remained relatively low. Its economy is characterized by government intervention and protectionism, an unstable financial services sector, low domestic consumption, and relatively high unemployment. Japan's economy is heavily dependent on international trade and has been adversely affected by trade tariffs and competition from emerging economies. As such, economic growth is heavily dependent on continued growth in international trade, government support of the financial services sector, among other troubled sectors, and consistent government policy. Any changes or trends in these economic factors could have a significant impact on Japan's economy overall and may negatively affect the Fund's investment. Japan's economy is also closely tied to its two largest trading partners, the U.S. and China. Economic volatility in either nation may create volatility for Japan's economy as well. Additionally, as China has increased its role with Japan as a trading partner, political tensions between the countries has become strained. Any increase or decrease in such tension may have consequences for investment in or exposure to Japanese issuers.

Other Short-Term Instruments

The Fund may invest in short-term instruments, including money market instruments, on an ongoing basis to provide liquidity or for other reasons. Money market instruments are generally short-term investments that may include but are not limited to: (i) shares of money market funds; (ii) obligations issued or guaranteed by the U.S. government, its agencies or instrumentalities (including government-sponsored enterprises); (iii) negotiable certificates of deposit ("CDs"), bankers' acceptances, fixed time deposits and other obligations of U.S. and foreign banks (including foreign branches) and similar institutions; (iv) commercial paper rated at the

date of purchase “Prime-1” by Moody’s Investors Service, Inc. (“Moody’s”) or “A-1” by S&P or, if unrated, of comparable quality as determined by the Adviser; (v) non-convertible corporate debt securities (*e.g.*, bonds and debentures) with remaining maturities at the date of purchase of not more than 397 days and that satisfy the rating requirements set forth in Rule 2a-7 under the 1940 Act; and (vi) short-term U.S. dollar-denominated obligations of foreign banks (including U.S. branches) that, in the opinion of the Adviser, are of comparable quality to obligations of U.S. banks which may be purchased by the Fund. Any of these instruments may be purchased on a current or a forward-settled basis. Money market instruments also include shares of money market funds. Time deposits are non-negotiable deposits maintained in banking institutions for specified periods of time at stated interest rates. Bankers’ acceptances are time drafts drawn on commercial banks by borrowers, usually in connection with international transactions.

Real Estate Investment Trusts (“REITs”)

A REIT is a corporation or business trust (that would otherwise be taxed as a corporation) which meets the definitional requirements of the Code. The Code permits a qualifying REIT to deduct from taxable income the dividends paid, thereby effectively eliminating corporate level federal income tax. To meet the definitional requirements of the Code, a REIT must, among other things: invest substantially all of its assets in interests in real estate (including mortgages and other REITs), cash and government securities; derive most of its income from rents from real property or interest on loans secured by mortgages on real property; and, in general, distribute annually 90% or more of its taxable income (other than net capital gains) to shareholders.

REITs are sometimes informally characterized as Equity REITs and Mortgage REITs. An Equity REIT invests primarily in the fee ownership or leasehold ownership of land and buildings (*e.g.*, commercial equity REITs and residential equity REITs); a Mortgage REIT invests primarily in mortgages on real property, which may secure construction, development or long-term loans.

REITs may be affected by changes in underlying real estate values, which may have an exaggerated effect to the extent that REITs in which the Fund invests may concentrate investments in particular geographic regions or property types. Additionally, rising interest rates may cause investors in REITs to demand a higher annual yield from future distributions, which may in turn decrease market prices for equity securities issued by REITs. Rising interest rates also generally increase the costs of obtaining financing, which could cause the value of the Fund’s investments to decline. During periods of declining interest rates, certain Mortgage REITs may hold mortgages that the mortgagors elect to prepay, which prepayment may diminish the yield on securities issued by such Mortgage REITs. In addition, Mortgage REITs may be affected by the ability of borrowers to repay when due the debt extended by the REIT and Equity REITs may be affected by the ability of tenants to pay rent.

Certain REITs have relatively small market capitalization, which may tend to increase the volatility of the market price of securities issued by such REITs. Furthermore, REITs are dependent upon specialized management skills, have limited diversification and are, therefore, subject to risks inherent in operating and financing a limited number of projects. By investing in REITs indirectly through the Fund, a shareholder will bear not only his or her proportionate share of the expenses of the Fund, but also, indirectly, similar expenses of the REITs. REITs depend generally on their ability to generate cashflow to make distributions to shareholders.

In addition to these risks, Equity REITs may be affected by changes in the value of the underlying property owned by the trusts, while Mortgage REITs may be affected by the quality of any credit extended. Further, Equity and Mortgage REITs are dependent upon management skills and generally may not be diversified. Equity and Mortgage REITs are also subject to heavy cashflow dependency defaults by borrowers and self-liquidation. In addition, Equity and Mortgage REITs could possibly fail to qualify for the favorable U.S. federal income tax treatment generally available to REITs under the Code or fail to maintain their exemptions from registration under the 1940 Act. The above factors may also adversely affect a borrower’s or a lessee’s ability to meet its obligations to the REIT. In the event of default by a borrower or lessee, the REIT may experience delays in enforcing its rights as a mortgagee or lessor and may incur substantial costs associated with protecting its investments.

Repurchase Agreements

The Fund may invest in repurchase agreements with commercial banks, brokers or dealers to generate income from its excess cash balances and to invest securities lending cash collateral. A repurchase agreement is an agreement under which the Fund acquires a financial instrument (*e.g.*, a security issued by the U.S.

government or an agency thereof, a banker's acceptance or a certificate of deposit) from a seller, subject to resale to the seller at an agreed upon price and date (normally, the next Business Day (as defined below)). A repurchase agreement may be considered a loan collateralized by securities. The resale price reflects an agreed upon interest rate effective for the period the instrument is held by the Fund and is unrelated to the interest rate on the underlying instrument.

In these repurchase agreement transactions, the securities acquired by the Fund (including accrued interest earned thereon) must have a total value in excess of the value of the repurchase agreement and are held by the Fund's custodian until repurchased. No more than an aggregate of 15% of the Fund's net assets will be invested in illiquid securities, including repurchase agreements having maturities longer than seven days and securities subject to legal or contractual restrictions on resale, or for which there are no readily available market quotations.

The use of repurchase agreements involves certain risks. For example, if the other party to the agreement defaults on its obligation to repurchase the underlying security at a time when the value of the security has declined, the Fund may incur a loss upon disposition of the security. If the other party to the agreement becomes insolvent and subject to liquidation or reorganization under the U.S. Bankruptcy Code or other laws, a court may determine that the underlying security is collateral for a loan by the Fund not within the control of the Fund and, therefore, the Fund may not be able to substantiate its interest in the underlying security and may be deemed an unsecured creditor of the other party to the agreement.

Reverse Repurchase Agreements

The Fund may enter into reverse repurchase agreements, which involve the sale of securities held by the Fund subject to its agreement to repurchase the securities at an agreed-upon date or upon demand and at a price reflecting a market rate of interest. Reverse repurchase agreements may be entered into only with banks or securities dealers or their affiliates.

Certain trading practices and investments, such as reverse repurchase agreements, may be considered to be borrowings or involve leverage and thus are subject to the 1940 Act restrictions. In accordance with Rule 18f-4 under the 1940 Act, when the Fund engages in reverse repurchase agreements and similar financing transactions, the Fund may either (1) maintain asset coverage of at least 300% with respect to such transactions and any other borrowings in the aggregate, or (ii) treat such transactions as "derivatives transactions" and comply with Rule 18f-4 with respect to such transactions.

Reverse repurchase agreements involve the risk that the buyer of the securities sold by the Fund might be unable to deliver them when the Fund seeks to repurchase. If the buyer of securities under a reverse repurchase agreement files for bankruptcy or becomes insolvent, the buyer or trustee or receiver may receive an extension of time to determine whether to enforce the Fund's obligation to repurchase the securities, and the Fund's use of the proceeds of the reverse repurchase agreement may effectively be restricted pending such decision.

Lending Portfolio Securities

The Fund may lend portfolio securities to certain creditworthy borrowers. The borrowers provide collateral that is maintained in an amount at least equal to the current value of the securities loaned. The Fund may terminate a loan at any time and obtain the return of the securities loaned. The lending Fund receives the value of any interest or cash or non-cash distributions paid on the loaned securities. Distributions received on loaned securities in lieu of dividend payments (*i.e.*, substitute payments) would not be considered qualified dividend income.

With respect to loans that are collateralized by cash, the borrower will be entitled to receive a fee based on the amount of cash collateral. The Fund is compensated by the difference between the amount earned on the reinvestment of cash collateral and the fee paid to the borrower. In the case of collateral other than cash, the Fund is compensated by a fee paid by the borrower equal to a percentage of the value of the loaned securities. Any cash collateral may be reinvested in certain short-term instruments either directly on behalf of the lending Fund or through one or more joint accounts or money market funds.

The Fund may pay a portion of the interest or fees earned from securities lending to a borrower as described above, and to one or more securities lending agents approved by the Board who administer the

lending program for the Fund in accordance with guidelines approved by the Board. In such capacity, the lending agent causes the delivery of loaned securities from the Fund to borrowers, arranges for the return of loaned securities to the Fund at the termination of a loan, requests deposit of collateral, monitors the daily value of the loaned securities and collateral, requests that borrowers add to the collateral when required by the loan agreements, and provides recordkeeping and accounting services necessary for the operation of the program.

Securities lending involves exposure to certain risks, including operational risk (*i.e.*, the risk of losses resulting from problems in the settlement and accounting process), “gap” risk (*i.e.*, the risk of a mismatch between the return on cash collateral reinvestments and the fees the Fund has agreed to pay a borrower), and credit, legal, counterparty and market risk. In the event a borrower does not return the Fund’s securities as agreed, the Fund may experience losses if the proceeds received from liquidating the collateral do not at least equal the value of the loaned security at the time the collateral is liquidated plus the transaction costs incurred in purchasing replacement securities.

Senior Loans

The Fund may invest in underlying funds that purchase senior secured floating rate loans or senior secured floating rate debt securities (collectively “Bank Loans”). Investments in Bank Loans are subject to interest rate risk and credit risk. Interest rate risk refers to fluctuations in the value of a loan resulting from changes in the general level of interest rates. Credit risk refers to the possibility that the borrower of a loan will be unable and/or unwilling to make timely interest payments and/or repay the principal on its obligation. Default in the payment of interest or principal on a loan will result in a reduction in the value of the loan and consequently a reduction in the value of a fund’s investments and a potential decrease in the NAV of a fund. A fund may invest in Bank Loans that are secured by specific collateral, however there can be no assurance that such collateral would satisfy the borrower’s obligation in the event of non-payment of scheduled interest or principal or that such collateral could be readily liquidated. In the event of the bankruptcy of a borrower, a fund’s access to the collateral may be limited by bankruptcy or other insolvency laws and, therefore, the fund could experience delays or limitations with respect to its ability to realize the benefits of the collateral securing a Bank Loan.

There is no organized exchange on which Bank Loans are traded and reliable market quotations may not be readily available. Therefore, elements of judgment may play a greater role in valuation of Bank Loans than for securities with a more developed secondary market and a fund may not realize full value in the event of the need to sell a Bank Loan. To the extent that a secondary market does exist for certain loans, the market may be subject to volatility, irregular trading activity, wide bid/ask spreads, decreased liquidity and extended trade settlement periods. Some Bank Loans are subject to the risk that a court, pursuant to fraudulent conveyance or other similar laws, could subordinate the Bank Loans to presently existing or future indebtedness of the borrower or take other action detrimental to lenders, including the ETFs in which the Fund invests, such as invalidation of the Bank Loans or causing interest previously paid to be refunded to the borrower. Investments in Bank Loans also are subject to the risk of changes in legislation or state or federal regulations. If such legislation or regulations impose additional requirements or restrictions on the ability of financial institutions to make loans, the availability of Bank Loans for investment by a fund may be adversely affected. Many Bank Loans are not registered with the SEC or any state securities commission and often are not rated by any nationally recognized rating service. Generally, there is less readily available, reliable information about most Bank Loans than is the case for many other types of securities. Although a Bank Loan may be senior to equity and other debt securities in a borrower’s capital structure, such obligations may be structurally subordinated to obligations of the borrower’s subsidiaries.

Short Sales

The Fund may make short sales of securities: (i) to offset potential declines in long positions in similar securities; (ii) to increase the flexibility of the Fund; (iii) for investment return; (iv) as part of a risk arbitrage strategy; and (v) as part of its overall portfolio management strategies involving the use of derivative instruments. A short sale is a transaction in which the Fund sells a security it does not own in anticipation that the market price of that security will decline.

When the Fund makes a short sale, it will often borrow the security sold short and deliver it to the broker-dealer through which it made the short sale as collateral for its obligation to deliver the security upon conclusion of the sale. In connection with short sales of securities, the Fund may pay a fee to borrow securities

or maintain an arrangement with a broker to borrow securities, and is often obligated to pay over any accrued interest and dividends on such borrowed securities.

If the price of the security sold short increases between the time of the short sale and the time that the Fund replaces the borrowed security, the Fund will incur a loss; conversely, if the price declines, the Fund will realize a capital gain. Any gain will be decreased, and any loss increased, by the transaction costs described above. The successful use of short selling may be adversely affected by imperfect correlation between movements in the price of the security sold short and the securities being hedged.

The Fund may invest pursuant to a risk arbitrage strategy to take advantage of a perceived relationship between the value of two securities. Frequently, a risk arbitrage strategy involves the short sale of a security.

To the extent that the Fund engages in short sales, it will provide collateral to the broker-dealer. The Fund will use short sales in connection with the implementation of its investment strategies and in compliance with Rule 18f-4. A short sale is “against the box” to the extent that the Fund contemporaneously owns, or has the right to obtain at no added cost, securities identical to those sold short. The Fund will engage in short selling to the extent permitted by the federal securities laws and rules and interpretations thereunder. To the extent the Fund engages in short selling in foreign (non-U.S.) jurisdictions, the Fund will do so to the extent permitted by the laws and regulations of such jurisdiction.

Tax Risks

As with any investment, you should consider how your investment in Shares will be taxed. The tax information in the Prospectus and this SAI is provided as general information. You should consult your own tax professional about the tax consequences of an investment in Shares.

Unless your investment in Shares is made through a tax-exempt entity or tax-deferred retirement account, such as an individual retirement account, you need to be aware of the possible tax consequences when the Fund makes distributions or you sell Shares.

TBA Transactions

The Fund may invest in underlying funds that invest in U.S. agency mortgage-backed securities (“MBS”). In the basic MBS structure, mortgages with similar issuer, term and coupon characteristics are collected and aggregated into a “pool” consisting of multiple mortgage loans. The pool is assigned a CUSIP number and undivided interests in the pool are traded and sold as pass-through securities. The holder of the security is entitled to a pro rata share of principal and interest payments (including unscheduled prepayments) from the pool of mortgage loans.

An investment in a specific pool of pass-through securities requires an analysis of the specific prepayment risk of mortgages within the covered pool (since mortgagors typically have the option to prepay their loans). The level of prepayments on a pool of mortgage securities is difficult to predict and can impact the subsequent cash flows and value of the mortgage pool. In addition, when trading specific mortgage pools, precise execution, delivery and settlement arrangements must be negotiated for each transaction. These factors combine to make trading in mortgage pools somewhat cumbersome.

For the foregoing and other reasons, a fund may seek to obtain exposure to U.S. agency MBS through the use of “to-be-announced” or “TBA transactions.” “TBA” refers to a commonly used mechanism for the forward settlement of U.S. agency MBS, and not to a separate type of MBS. Most transactions in MBS occur through the use of TBA transactions. TBA transactions generally are conducted in accordance with widely-accepted guidelines which establish commonly observed terms and conditions for execution, settlement and delivery. In a TBA transaction, the buyer and seller decide on general trade parameters, such as agency, settlement date, and price. The actual pools delivered generally are determined two days prior to settlement date. The Fund intends to use TBA transactions in several ways. For example, a fund expects that it will regularly enter into TBA agreements and “roll over” such agreements prior to the settlement date stipulated in such agreements. This type of TBA transaction is sometimes known as a “TBA roll.” In a “TBA roll” a fund generally will sell the obligation to purchase the pools stipulated in the TBA agreement prior to the stipulated settlement date and will enter into a new TBA agreement for future delivery of pools of MBS. In addition, a fund may enter into TBA agreements and settle such transactions on the stipulated settlement date by accepting actual receipt or delivery of the pools of MBS stipulated in the TBA agreement.

Default by or bankruptcy of a counterparty to a TBA transaction would expose the Fund to possible loss because of adverse market action, expenses or delays in connection with the purchase or sale of the pools of MBS specified in the TBA transaction. A fund's use of "TBA rolls" may cause the fund to experience higher portfolio turnover, higher transaction costs and to pay higher capital gain distributions to shareholders (which may be taxable) than other funds.

U.S. Government Securities

The Fund may invest directly in or in underlying funds that invest in U.S. government securities. Securities issued or guaranteed by the U.S. government or its agencies or instrumentalities include U.S. Treasury securities, which are backed by the full faith and credit of the U.S. Treasury and which differ only in their interest rates, maturities, and times of issuance. U.S. Treasury bills have initial maturities of one-year or less; U.S. Treasury notes have initial maturities of one to ten years; and U.S. Treasury bonds generally have initial maturities of greater than ten years. Certain U.S. government securities are issued or guaranteed by agencies or instrumentalities of the U.S. government including, but not limited to, obligations of U.S. government agencies or instrumentalities such as Fannie Mae, the Government National Mortgage Association ("Ginnie Mae"), the Small Business Administration, the Federal Farm Credit Administration, the Federal Home Loan Banks, Banks for Cooperatives (including the Central Bank for Cooperatives), the Federal Land Banks, the Federal Intermediate Credit Banks, the Tennessee Valley Authority, the Export-Import Bank of the United States, the Commodity Credit Corporation, the Federal Financing Bank, the Student Loan Marketing Association, the National Credit Union Administration and the Federal Agricultural Mortgage Corporation.

Some obligations issued or guaranteed by U.S. government agencies and instrumentalities, including, for example, Ginnie Mae pass-through certificates, are supported by the full faith and credit of the U.S. Treasury. Other obligations issued by or guaranteed by federal agencies, such as those securities issued by Fannie Mae, are supported by the discretionary authority of the U.S. government to purchase certain obligations of the federal agency, while other obligations issued by or guaranteed by federal agencies, such as those of the Federal Home Loan Banks, are supported by the right of the issuer to borrow from the U.S. Treasury. While the U.S. government provides financial support to such U.S. government-sponsored federal agencies, no assurance can be given that the U.S. government will always do so, since the U.S. government is not so obligated by law. U.S. Treasury notes and bonds typically pay coupon interest semi-annually and repay the principal at maturity.

Treasury Inflation-Protected Securities. The Fund may invest in underlying funds that invest in inflation-protected public obligations, commonly known as "TIPS," of the U.S. Treasury, as well as TIPS of major governments and emerging market countries, excluding the United States. TIPS are a type of security issued by a government that is designed to provide inflation protection to investors. TIPS are income-generating instruments whose interest and principal payments are adjusted for inflation—a sustained increase in prices that erodes the purchasing power of money. The inflation adjustment, which is typically applied monthly to the principal of the bond, follows a designated inflation index, such as the Consumer Price Index. A fixed coupon rate is applied to the inflation-adjusted principal so that as inflation rises or falls, both the principal value and the interest payments will increase or decrease. This can provide investors with a hedge against inflation, as it helps preserve the purchasing power of an investment. Because of this inflation adjustment feature, inflation-protected bonds typically have lower yields than conventional fixed-rate bonds.

Cybersecurity Considerations

With the increased use of technologies such as mobile devices and Web-based or "cloud" applications, and the dependence on the Internet and computer systems to conduct business, the Fund is susceptible to operational, information security and related risks. In general, cybersecurity incidents can result from deliberate attacks or unintentional events (arising from external or internal sources) that may cause the Fund to lose proprietary information, suffer data corruption, physical damage to a computer or network system or lose operational capacity. Cybersecurity attacks include, but are not limited to, infection by malicious software, such as malware or computer viruses or gaining unauthorized access to digital systems, networks or devices that are used to service the Fund's operations (e.g., through "hacking," "phishing" or malicious software coding) or other means for purposes of misappropriating assets or sensitive information, corrupting data, or causing operational disruption. Cybersecurity attacks may also be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks on the Fund's website (i.e., efforts to make network services unavailable to intended users). In addition, authorized persons could inadvertently or intentionally release confidential or proprietary information stored on the Fund's systems.

Cybersecurity incidents affecting the Adviser, other service providers to the Fund or its shareholders (including, but not limited to, Fund accountants, custodians, sub-custodians, transfer agents and financial intermediaries) have the ability to cause disruptions and impact business operations, potentially resulting in financial losses to both the Fund and its shareholders, interference with the Fund's ability to calculate its net asset value, impediments to trading, the inability of Fund shareholders to transact business and the Fund to process transactions (including fulfillment of fund share purchases and redemptions), violations of applicable privacy and other laws (including the release of private shareholder information) and attendant breach notification and credit monitoring costs, regulatory fines, penalties, litigation costs, reputational damage, reimbursement or other compensation costs, forensic investigation and remediation costs, and/or additional compliance costs. Similar adverse consequences could result from cybersecurity incidents affecting issuers of securities in which the Fund invests, counterparties with which the Fund engages in transactions, governmental and other regulatory authorities, exchange and other financial market operators, banks, brokers, dealers, insurance companies and other financial institutions (including financial intermediaries and other service providers) and other parties.

Recent Market Conditions and Events

Periods of unusually high volatility in the financial markets and restrictive credit conditions, sometimes limited to a particular sector or a geography, continue to occur. The ongoing coronavirus pandemic has resulted in broad travel restrictions, quarantines, disruptions to supply chains, and general market uncertainty. Health crises caused by outbreaks of disease, such as the coronavirus outbreak, may exacerbate other pre-existing political, social and economic risks and disrupt normal market conditions and operations. In addition, the increasing interconnectedness of markets around the world may result in many markets being affected by events or conditions in a single country or region or events affecting a single or small number of issuers. The duration of the current volatility and its effects, including the possibility of future adverse effects on the Fund, cannot be determined with certainty.

Portfolio Turnover

Portfolio turnover may vary from year to year, as well as within a year. High turnover rates are likely to result in comparatively greater brokerage expenses. The overall reasonableness of brokerage commissions is evaluated by the Adviser based upon its knowledge of available information as to the general level of commissions paid by other institutional investors for comparable services.

MANAGEMENT OF THE FUNDS

Board of Trustees

The management and affairs of the Funds are supervised by the Board. The Board currently consists of three individuals. The Trustees are fiduciaries for the Funds' shareholders and are governed by the laws of the State of Delaware in this regard. The Board establishes policies for the operation of the Funds and appoints the officers who conduct the daily business of the Funds.

The Role of the Board of Trustees

The Board provides oversight of the management and operations of the Trust. Like all mutual funds and ETFs, the day-to-day responsibility for the management and operation of the Trust is the responsibility of various service providers to the Trust and its individual series, such as the Adviser; Quasar Distributors, LLC, the Funds' principal underwriter (the "Distributor"); U.S. Bancorp Fund Services, LLC, doing business as U.S. Bank Global Fund Services, the Funds' administrator (the "Administrator") and transfer agent (the "Transfer Agent"); and U.S. Bank N.A., the Funds' Custodian, each of whom are discussed in greater detail in this SAI. The Board approves all significant agreements between the Trust and its service providers, including the agreements with the Adviser, Distributor, Administrator, Custodian and Transfer Agent. The Board has appointed various individuals of certain of these service providers as officers of the Trust, with responsibility to monitor and report to the Board on the Trust's day-to-day operations. In conducting this oversight, the Board receives regular reports from these officers and service providers regarding the Trust's operations. The Board has appointed a Chief Compliance Officer ("CCO") who reports directly to the Board and who administers the Trust's compliance program and regularly reports to the Board as to compliance matters, including an annual compliance review. Some of these reports are provided as part of formal "Board Meetings," which are held four times per year, in person, and such other times as the Board determines is necessary, and involve the

Board's review of recent Trust operations. From time to time one or more members of the Board may also meet with Trust officers in less formal settings, between formal Board Meetings, to discuss various topics. In all cases, however, the role of the Board and of any individual Trustee is one of oversight and not of management of the day-to-day affairs of the Trust, and its oversight role does not make the Board a guarantor of the Trust's investments, operations, or activities.

Board Leadership Structure

The Board has structured itself in a manner that it believes allows it to effectively perform its oversight function. The Board is currently comprised of three Trustees that are not considered to be "interested persons" of the Funds, as defined by the 1940 Act ("Independent Trustees") – Messrs. David A. Massart, David M. Swanson and Robert J. Kern. Accordingly, 100% of the members of the Board are Independent Trustees, who are Trustees that are not affiliated with the investment adviser to the Funds or its affiliates or other service providers to the Funds. Prior to July 6, 2020, Mr. Kern was considered an "interested person" of the Trust as defined in the 1940 Act ("Interested Trustee"). He was considered an Interested Trustee by virtue of the fact that he had served as a board member of Quasar Distributors, LLC, which acts as principal underwriter to many of the Trust's underlying funds and had been an Executive Vice President of the Administrator. The Board has established two standing committees, an Audit Committee and a Nominating & Governance Committee. The Committees are discussed in greater detail under "Board Committees" below. Each of the Audit Committee and the Nominating & Governance Committee are comprised entirely of Independent Trustees. The Independent Trustees have engaged independent counsel to advise them on matters relating to their responsibilities in connection with the Trust, as well as the Funds.

In accordance with the fund governance standards prescribed by the SEC under the 1940 Act, the Independent Trustees on the Nominating & Governance Committee select and nominate all candidates for Independent Trustee positions. Each Trustee was appointed to serve on the Board because of his experience, qualifications, attributes and skills as set forth in the subsection "Trustee Qualifications" below.

The Board reviews its structure regularly in light of the characteristics and circumstances of the Trust, including: the affiliated or unaffiliated nature of each investment adviser; the number of funds that comprise the Trust; the variety of asset classes that those funds reflect; the net assets of the Trust; the committee structure of the Trust; and the independent distribution arrangements of each of the Trust's underlying funds.

The Board has determined that the inclusion of all Independent Trustees as members of the Audit Committee and the Nominating & Governance Committee allows all such Trustees to participate in the full range of the Board's oversight duties, including oversight of risk management processes discussed below. Given the composition of the Board and the function and composition of its various committees as described above, the Trust has determined that the Board's leadership structure is appropriate.

Board Oversight of Risk Management

As part of its oversight function, the Board receives and reviews various risk management reports and assessments and discusses these matters with appropriate management and other personnel, including personnel of the Trust's service providers. Because risk management is a broad concept comprised of many elements (such as, for example, investment risk, issuer and counter-party risk, compliance risk, operational risk, business continuity risk, etc.) the oversight of different types of risks is handled in different ways. For example, the CCO regularly reports to the Board during Board Meetings and meets in executive session with the Independent Trustees and their legal counsel to discuss compliance and operational risks. The full Board receives reports from the investment advisers to the underlying funds and the portfolio managers as to investment risks.

Trustees and Officers

The Trustees and officers of the Trust are listed below with their addresses, present positions with the Trust and principal occupations over at least the last five years.

Name, Address and Year of Birth	Position(s) Held with the Trust	Term of Office and Length of Time Served	Number of Portfolios in Trust Overseen by Trustee	Principal Occupation(s) During the Past Five Years	Other Directorships Held by Trustee During the Past Five Years
<i>Independent Trustees</i>					
David A. Massart 615 E. Michigan St. Milwaukee, WI 53202 Year of Birth: 1967	Trustee	Indefinite Term; Since April 2011	22	Partner and Managing Director, Beacon Pointe Advisors, LLC (since 2022); Co-Founder and Chief Investment Strategist, Next Generation Wealth Management, Inc. (2005-2021).	Independent Trustee, ETF Series Solutions (55 Portfolios) (2012-Present).

Trustee Qualifications

The Board believes that each of the Trustees has the qualifications, experience, attributes and skills appropriate to their continued service as Trustees of the Trust in light of the Trust's business and structure. The Trustees have substantial business and professional backgrounds that indicate they have the ability to critically review, evaluate and assess information provided to them. Certain of these business and professional experiences are set forth in detail in the table above. In addition, the Trustees have substantial board experience and, in their service to the Trust, have gained substantial insight as to the operation of the Trust. The Board annually conducts a "self-assessment" wherein the effectiveness of the Board and the individual Trustees is reviewed.

In addition to the information provided in the table above, below is certain additional information concerning each individual Trustee. The information provided below, and in the table above, is not all-inclusive. Many of the Trustees' qualifications to serve on the Board involve intangible elements, such as intelligence, integrity, work ethic, the ability to work together, the ability to communicate effectively, the ability to exercise judgment, the ability to ask incisive questions, and commitment to shareholder interests.

Mr. Kern's trustee attributes include substantial industry experience, including over 35 years of service with U.S. Bancorp Fund Services, LLC (the fund accountant ("Fund Accountant"), Administrator, and Transfer Agent to the Trust) where he managed business development and the mutual fund transfer agent operation including investor services, account services, legal compliance, document processing and systems support. He also served as a board member of U.S. Bancorp Fund Services, LLC and previously served as a board member of Quasar Distributors, LLC (principal underwriter of multiple series of the Trust). The Board believes Mr. Kern's experience, qualifications, attributes and skills on an individual basis and in combination with those of the other Trustees lead to the conclusion that he possesses the requisite skills and attributes as a Trustee to carry out oversight responsibilities with respect to the Trust.

Mr. Massart's trustee attributes include substantial industry experience, including over two decades working with high net worth individuals, families, trusts and retirement accounts to make strategic and tactical asset allocation decisions, evaluate and select investment managers and manage client relationships. He is currently Partner and Managing Director of Beacon Pointe Advisors, LLC. Previously, he served as Chief Investment Strategist and lead member of the investment management committee of the SEC registered investment advisory firm he co-founded. He also previously served as Managing Director of Strong Private Client and as a Manager of Wells Fargo Investments, LLC. The Board believes Mr. Massart's experience, qualifications, attributes and skills on an individual basis and in combination with those of the other Trustees lead to the conclusion that he possesses the requisite skills and attributes as a Trustee to carry out oversight responsibilities with respect to the Trust.

Mr. Swanson's trustee attributes include substantial industry experience, including over 35 years of senior management and marketing experience with over 30 years dedicated to the financial services industry. He is currently the Founder and Managing Partner of a marketing strategy boutique serving asset and wealth management businesses. He has also served as Chief Operating Officer and Chief Marketing Officer of Van Kampen Investments, President and Chief Executive Officer of Scudder, Stevens & Clark, Canada, Ltd., Managing Director and Head of Global Investment Products at Morgan Stanley, Director of Marketing for Morgan Stanley Mutual Funds, Director of Marketing for Kemper Funds, and Executive Vice President and Head of Distribution for Calamos Investments. The Board believes Mr. Swanson's experience, qualifications, attributes and skills on an individual basis and in combination with those of the other Trustees lead to the conclusion that he possesses the requisite skills and attributes as a Trustee to carry out oversight responsibilities with respect to the Trust.

This discussion of the Trustees' experience and qualifications is pursuant to SEC requirements, does not constitute holding out the Board or any Trustee as having special expertise, and shall not impose any greater responsibility or liability on any such Trustee or the Board by reason thereof.

Trustee and Management Ownership of Fund Shares

The following table shows the dollar range of Fund shares and shares in other portfolios of the Trust beneficially owned by the Trustees as of the calendar year ended December 31, 2025:

*Dollar Range of Fund Shares
Beneficially Owned (None, \$1-\$10,000, \$10,001-\$50,000,
\$50,001-\$100,000, Over \$100,000)*

Name	Core Fund	Global Fund	Grizzly Fund	Aggregate Dollar Range of Shares in all Funds in the Trust ⁽¹⁾
Independent Trustees				
David A. Massart	None	None	None	None
David M. Swanson	None	None	None	\$50,001-\$100,000
Robert J. Kern	None	None	None	None

^{1.} The Trust includes other portfolios in addition to the Funds.

As of the date of this SAI, the Trustees and Officers of the Trust as a group owned less than 1% of the outstanding shares of each Fund.

Board Committees

Audit Committee. The Trust has an Audit Committee, which is comprised of all the Independent Trustees. The Audit Committee reviews financial statements and other audit-related matters for the Funds. The Audit Committee also holds discussions with management and with the Funds' independent registered public accounting firm concerning the scope of the audit and the auditor's independence.

Nominating & Governance Committee. The Trust has a Nominating & Governance Committee, which is comprised of all the Independent Trustees. The Nominating & Governance Committee is responsible for seeking and reviewing candidates for consideration as nominees for the position of trustee and meets only as necessary.

The Nominating & Governance Committee will consider nominees recommended by shareholders for vacancies on the Board. Recommendations for consideration by the Nominating & Governance Committee should be sent to the President of the Trust in writing together with the appropriate biographical information concerning each such proposed nominee, and such recommendation must comply with the notice provisions set forth in the Trust's Bylaws. In general, to comply with such procedures, such nominations, together with all required information, must be delivered to and received by the President of the Trust at the principal executive office of the Trust not fewer than 120 days, and no more than 150 days, prior to the shareholder meeting at which any such nominee would be voted on. Shareholder recommendations for nominations to the Board will be accepted on an ongoing basis. The Nominating & Governance Committee's procedures with respect to reviewing shareholder nominations will be disclosed as required by applicable securities laws.

Trustee Compensation

The Trustees receive an annual retainer of \$98,000. The Chairman of the Audit Committee receives additional compensation of \$18,000, the Chairman of the Nominating & Governance Committee receives additional compensation of \$8,000 and the Chairman of the Board of Trustees receives \$12,500 annually. The Trustees receive \$8,000 for regularly scheduled meetings and \$2,500 for additional meetings.

The following table sets forth the compensation received by the Trustees for the Fund’s fiscal year ended September 30, 2025:

Name of Person/Position	Estimated Aggregate Compensation from the:			Pension or Retirement Benefits Accrued as Part of Fund Expenses	Estimated Annual Benefits Upon Retirement	Estimated Total Compensation from the Funds and the Trust ⁽²⁾ Paid to Trustees
	Core Fund ⁽¹⁾	Global Fund ⁽¹⁾	Grizzly Fund ⁽¹⁾			
Leonard M. Rush, Chairman, Independent Trustee and Audit Committee Chairman ⁽³⁾	\$4,204	\$4,204	\$4,204	None	None	\$21,020
David A. Massart, Independent Trustee	\$3,464	\$3,464	\$3,464	None	None	\$17,320
David M. Swanson, Independent Trustee and Nominating & Governance Committee Chairman	\$3,658	\$3,658	\$3,658	None	None	\$18,292
Robert J. Kern, Independent Trustee	\$3,464	\$3,464	\$3,464	None	None	\$17,320

⁽¹⁾ Trustees fees and expenses are allocated among the Funds and any other series comprising the Trust.

⁽²⁾ The Trust includes other portfolios in addition to the Funds.

⁽³⁾ Mr. Rush passed away in January 2026.

Code of Ethics

The Trust and the Adviser have each adopted separate Codes of Ethics under Rule 17j-1 of the 1940 Act. These Codes permit, subject to certain conditions, access persons of the Adviser to invest in securities that may be purchased or held by the Fund.

Proxy Voting

The Funds vote proxies in accordance with the Adviser’s proxy voting policy. The Adviser generally follows the so-called “Wall Street Rule,” subject to the exceptions discussed below. Under the “Wall Street Rule,” the Adviser votes as management recommends or sells the stock prior to the meeting. The Adviser believes that following the “Wall Street Rule” is generally consistent with the economic best interests of the Funds. When management makes no recommendation, the Adviser will not vote proxies unless the Adviser determines the failure to vote would have a material adverse effect on the Funds. If the Adviser determines that the failure to vote would have a material adverse effect on the Funds, it will vote in accordance with what it believes are the economic best interests of the Funds. Although the Adviser’s policy is to vote proxies for clients unless otherwise directed in writing, or as provided above, there may be times in which the firm would not exercise voting authority on matters where the cost of voting would be high, such as with some foreign securities, and/or the benefit to the client would be low, such as when casting a vote would not reasonably be expected to have a material effect on the value of the client’s investment.

The Adviser will “echo” vote (namely, vote for and against the proposal in the same proportion as all other shareholders) shares of investment companies that it owns inside the Funds to comply with the requirements of Section 12(d)(1) of the Act. If voting a proxy restricts trading in a security, the Adviser will not vote the proxy unless the trading restriction is of such limited duration that the Adviser deems the trading restriction will not negatively impact the Funds.

Consistent with its duty of care the Adviser monitors proxy proposals just as it monitors other corporate events affecting the companies in which the Funds invest. In the event that a vote presents a conflict of interest between the interests of the Funds and the Adviser, the Adviser will disclose the conflict to the Board of Trustees and, consistent with its duty of care and duty of loyalty, “echo” vote the securities (namely, vote for and against the proposal in the same proportion as all other shareholders). Information on how the Funds voted

proxies relating to portfolio securities during the most recent twelve-month period ended June 30 may be requested, without charge, by calling 1-800-273-6886. This information is also available on the Securities and Exchange Commission's website at <http://www.sec.gov>.

CONTROL PERSONS AND PRINCIPAL SHAREHOLDERS

A principal shareholder is any person who owns of record or beneficially 5% or more of the outstanding shares of a Fund. A control person is one who owns beneficially or through controlled companies more than 25% of the voting securities of a Fund or acknowledges the existence of control. A controlling person possesses the ability to control the outcome of matters submitted for shareholder vote by the Fund. As of December 31, 2025, the following shareholders were considered to be principal shareholders and/or control persons of the specified class of the relevant Fund.

Principal Shareholders of the Leuthold Core Investment Fund, Retail Class

INVESTMENT ADVISER AND PORTFOLIO MANAGERS

The Adviser

The investment adviser to each Fund is Leuthold Weeden Capital Management, 100 North Sixth Street, Suite 600A, Minneapolis, Minnesota 55403. Pursuant to the investment advisory agreements entered into between the Trust and the Adviser with respect to each Fund (the “Advisory Agreements”), the Adviser furnishes continuous investment advisory services to the Funds.

The Adviser supervises and manages the investment portfolio of each Fund and, subject to such policies as the Board of Trustees may determine, directs the purchase or sale of investment securities in the day-to-day management of each Fund’s investment portfolio. Under the Advisory Agreements, the Adviser, at its own expense and without reimbursement from the Funds, furnishes office space and all necessary office facilities, equipment and executive personnel for managing the investments of the Funds. For the foregoing, the Adviser receives the following investment advisory fee from each Fund based on such Fund’s average daily net assets at the annual rate of:

Core Fund	0.90%
Global Fund	0.90%
Grizzly Fund	1.25%

Pursuant to a separate investment advisory contract between the Adviser and the Predecessor Funds:

Predecessor Core Fund

Fiscal Year Ended September 30,	Management Fees Accrued	Management Fees Waived	Management Fees Recouped	Net Management Fee Paid to Adviser

2023	N/A	N/A	N/A	N/A

Pursuant to an operating expenses limitation agreement between the Funds and Leuthold, Leuthold has agreed to limit “Operating Expenses” with respect to each Fund, which is defined to include all expenses necessary or appropriate for the operation of a Fund and including Leuthold’s investment advisory or management fee, but does not include:

- for the *Core Fund*, *Global Fund* and *Grizzly Fund* - any front-end or contingent deferred loads, taxes, leverage/borrowing interest, interest expense, dividends paid on short sales, brokerage commissions, acquired fund fees and expenses, expenses incurred in connection with any merger or reorganization, extraordinary expenses such as litigation, and any Rule 12b-1 fees and shareholder servicing plan fees.

The limit for Operating Expenses for each Fund is as follows:

Fund	Operating Expenses Limit
Core Fund	1.25%
Global Fund	1.85%
Grizzly Fund	2.50%

Portfolio Managers

The sole investment adviser to each Fund is Leuthold Weeden Capital Management. The Leuthold Funds use a team-based approach to portfolio management. Each portfolio manager works collectively on the names and ideas in the portfolio and is equally responsible for the day-to-day management of the Funds that they manage. Final investment decisions are made by consensus.

The portfolio managers to the Funds may have responsibility for the day-to-day management of accounts other than the Funds. Information regarding these other accounts is set forth below. The number of accounts and assets is shown as of September 30, 2025.

<u>Name of Portfolio Managers</u>	<u>Number of Other Accounts Managed and Total Assets by Account Type</u>			<u>Number of Accounts and Total Assets for Which Advisory Fee is Performance-Based</u>		
	<u>Registered Investment Companies</u>	<u>Other Pooled Investment Vehicles</u>	<u>Other Accounts</u>	<u>Registered Investment Companies</u>	<u>Other Pooled Investment Vehicles</u>	<u>Other Accounts</u>
Greg M. Swenson (portfolio manager Leuthold Core Investment Fund, Leuthold Global Fund, and Leuthold Grizzly Short Fund)	0 \$0	1 \$34,289,913	67 \$289,807,508	0 \$0	0 \$0	0 \$0
Chun Wang (portfolio manager Leuthold Core Investment Fund and Leuthold Global Fund)	0 \$0	1 \$34,289,913	82 \$297,232,182	0 \$0	0 \$0	0 \$0
Scott D. Opsal (portfolio manager Leuthold Core Investment Fund and Leuthold Global Fund)	0 \$0	0 \$0	58 \$307,570,167	0 \$0	0 \$0	0 \$0
Philip D. Segner (portfolio manager Leuthold Grizzly Short Fund)	0 \$0	0 \$0	0 \$0	0 \$0	0 \$0	0 \$0

The portfolio managers of the Adviser are often responsible for managing other accounts. The Adviser typically assigns accounts with similar investment strategies to the portfolio managers to mitigate the potentially conflicting investment strategies of accounts. Other than potential conflicts between investment strategies, the side-by-side management of the Funds and other accounts may raise potential conflicts of interest due to the interest held by the Adviser or one of its affiliates in an account and certain trading practices used by the portfolio managers (for example, cross trades between a Fund and another account and allocation of aggregated trades). The Adviser has developed policies and procedures reasonably designed to mitigate those conflicts. In particular, the Adviser has adopted policies limiting the ability of portfolio managers to cross securities between Funds and policies designed to ensure the fair allocation of securities purchased on an aggregated basis.

The portfolio managers are compensated in various forms. The following table outlines the forms of compensation paid to each portfolio manager as of September 30, 2025:

<u>Name of Portfolio Managers</u>	<u>Form of Compensation</u>	<u>Source of Compensation</u>	<u>Method Used to Determine Compensation (Including Any Differences in Method Between Account Types)</u>
Greg M. Swenson (portfolio manager Leuthold Core Investment Fund, Leuthold Global Fund, and Leuthold Grizzly Short Fund)	Salary/Bonus	Leuthold Weeden Capital Management	Mr. Swenson receives a fixed salary that is set by reference to industry standards. He also receives an annual subjective bonus based solely on the overall profitability of the Adviser after taxes for the prior fiscal year and based on an evaluation of all the duties he performs for the Adviser.
Chun Wang (portfolio manager Leuthold Core Investment Fund and Leuthold Global Fund)	Salary/Bonus	Leuthold Weeden Capital Management	Mr. Wang receives a fixed salary that is set by reference to industry standards. He also receives an annual subjective bonus based solely on the overall profitability of the Adviser after taxes for the prior fiscal year and based on an evaluation of all the duties he performs for the Adviser.
Scott D. Opsal (portfolio manager Leuthold Core Investment Fund and Leuthold Global Fund)	Salary/Bonus	Leuthold Weeden Capital Management	Mr. Opsal receives a fixed salary that is set by reference to industry standards. He also receives an annual subjective bonus based solely on the overall profitability of the Adviser after taxes for the prior fiscal year and based on an evaluation of all the duties he performs for the Adviser.
Philip D. Segner (portfolio manager Leuthold Grizzly Short Fund)	Salary/Bonus	Leuthold Weeden Capital Management	Mr. Segner receives a fixed salary that is set by reference to industry standards. He also receives an annual subjective bonus based solely on the overall profitability of the Adviser after taxes for the prior fiscal year and based on an evaluation of all the duties he performs for the Adviser.

The following tables set forth the dollar range of equity securities of each Fund beneficially owned by each of the portfolio managers of such Fund as of September 30, 2025.

<u>Name of Portfolio Managers</u>	<u>Dollar Range of Equity Securities of Leuthold Core Investment Fund</u>	<u>Dollar Range of Equity Securities of Leuthold Global Fund</u>	<u>Dollar Range of Equity Securities of Leuthold Grizzly Short Fund</u>
Greg M. Swenson	\$100,001 - \$500,000	\$100,001 - \$500,000	None

SERVICE PROVIDERS

The Administrator

Pursuant to an administration agreement (the “Administration Agreement”) between the Trust and U.S. Bancorp Fund Services, LLC, doing business as U.S. Bank Global Fund Services (“Fund Services”), 615 East Michigan Street, Milwaukee, Wisconsin 53202, Fund Services acts as the administrator to the Funds. Fund Services provides certain administrative services to the Funds, including, among other responsibilities, coordinating the negotiation of contracts and fees with, and the monitoring of performance and billing of, the Funds’ independent contractors and agents; preparation for signature by an officer of the Trust of all documents required to be filed for compliance by the Trust and the Fund with applicable laws and regulations; arranging for the computation of performance data, including NAV per share and yield; responding to shareholder inquiries; arranging for the maintenance of books and records of the Funds; and providing, at its own expense, office facilities, equipment and personnel necessary to carry out its duties. In this capacity, Fund Services does not have any responsibility or authority for the management of the Funds, the determination of investment policy, or any matter pertaining to the distribution of Fund shares. Pursuant to the Administration Agreement, for its services, Fund Services receives from the Fund a fee computed daily and payable monthly based on each Fund’s average daily net assets, subject to an annual minimum fee. Fund Services also acts as fund accountant, transfer agent (“Transfer Agent”) and dividend disbursing agent under separate agreements with the Trust.

Accounting Fees Paid to Fund Services for the Fiscal Years Ended September 30,		
	2024	2023
Predecessor Core Fund	\$285,332	\$268,869
Predecessor Global Fund	\$30,498	\$28,931
Predecessor Grizzly Fund	\$52,167	\$88,339

Administration and Fund Accounting Fees Paid to Fund Services for the Fiscal Years Ended September 30,			
	2025	2024	2023
Core Fund	\$324,630	N/A	N/A
Global Fund	\$47,038	N/A	N/A
Grizzly Fund	\$41,665	N/A	N/A

Pursuant to a custody agreement between the Trust and the Fund, U.S. Bank N.A., an affiliate of Fund Services, serves as the custodian of the Funds’ assets (the “Custodian”). For its services, the Custodian receives a monthly fee based on a percentage of the Funds’ assets, in addition to certain transaction-based fees, and is reimbursed for out-of-pocket expenses. The Custodian’s address is 1555 North RiverCenter Drive, Suite 302, Milwaukee, Wisconsin, 53212. The Custodian holds the securities in the Funds’ portfolios and other assets for safekeeping. The Custodian does not participate in decisions relating to the purchase and sale of securities by the Funds. U.S. Bank and its affiliates may participate in revenue sharing arrangements with service providers of mutual funds in which the Funds may invest.

Distributor

The Trust has entered into a Distribution Agreement (the “Distribution Agreement”) with Quasar Distributors, LLC, located at 190 Middle Street, Suite 301, Portland, Maine 04101 (the “Distributor”), pursuant to which the Distributor acts as each Fund’s distributor, provides certain administration services and promotes and arranges for the sale of Fund shares. The offering of the Funds’ shares is continuous. The Distributor is a registered broker-dealer and member of FINRA.

The Distribution Agreement has an initial term of up to two years and will continue in effect only if such continuance is specifically approved at least annually by the Board or by vote of a majority of a Fund's outstanding voting securities and, in either case, by a majority of the Trustees who are not parties to the Distribution Agreement or "interested persons" (as defined in the 1940 Act) of any such party. The Distribution Agreement is terminable without penalty by the Trust on behalf of a Fund on 60 days' written notice when authorized either by a majority vote of the Fund's shareholders or by vote of a majority of the Board, including a majority of the Trustees who are not "interested persons" (as defined in the 1940 Act) of the Trust, and will automatically terminate in the event of its "assignment" (as defined in the 1940 Act).

Legal Counsel

Stradley Ronon Stevens & Young, LLP, 2005 Market Street, Suite 2600, Philadelphia, Pennsylvania 19103, serves as counsel to the Trust and as independent legal counsel to the Board.

Independent Registered Public Accounting Firm

Cohen & Company, Ltd., 342 North Water Street, Suite 830, Milwaukee, Wisconsin 53202, serves as the independent registered public accounting firm for the Funds. Its services include auditing each Fund's financial statements. Cohen & Co Advisory, LLC, an affiliate of Cohen & Company, Ltd, provides tax services.

SECURITIES LENDING

During the fiscal year, the securities lending agent, or the Adviser (where the Funds do not use a securities lending agent) will monitor loan opportunities for the Funds, negotiate the terms of the loans with borrowers, monitor the value of securities on loan and the value of the corresponding collateral, communicate with borrowers and the Funds' custodian regarding marking to market the collateral, select securities to be loaned and allocate those loan opportunities among lenders, and arrange for the return of the loaned securities upon the termination of the loan. For further discussion regarding the Funds securities lending, please see the section titled, "Investment Considerations—Lending Portfolio Securities" above. During the fiscal year ended September 30, 2025, the Funds did not engage in Securities Lending.

SHAREHOLDER SERVICING PLAN

Pursuant to a Shareholder Service Plan (the "Plan") adopted by the Trust on behalf of the Core Fund and Grizzly Fund, the Adviser is authorized to provide, or arrange for others to provide personal shareholder services relating to the servicing and maintenance of shareholder accounts not otherwise provided to the Funds ("Shareholder Servicing Activities"). Under the Plan, the Adviser may enter into shareholder service agreements with securities broker-dealers and other securities professionals ("Service Organizations") who provide Shareholder Servicing Activities for their clients invested in the Funds, including affiliates of the Adviser.

Shareholder Servicing Activities shall include one or more of the following: (1) establishing and maintaining accounts and records relating for shareholders of a Fund; (2) aggregating and processing orders involving the shares of a Fund; (3) processing dividend and other distribution payments from a Fund on behalf of shareholders; (4) providing information to shareholders as to their ownership of Fund shares or about other aspects of the operations of the Fund; (5) preparing tax reports or forms on behalf of shareholders; (6) forwarding communications from a Fund to shareholders; (7) assisting shareholders in changing a Fund's records as to their addresses, dividend options, account registrations or other data; (8) providing sub-accounting with respect to shares beneficially owned by shareholders, or the information to a Fund necessary for sub-accounting; (9) responding to shareholder inquiries relating to the services performed; (10) providing shareholders with a service that invests the assets of their accounts in shares pursuant to specific or pre-authorized instructions; and (11) providing such other similar services as the Adviser may reasonably request to the extent the Service Organization is permitted to do so under applicable statutes, rules or regulations.

As compensation for the Shareholder Servicing Activities, Leuthold Core Investment Fund's Retail Class Shares and shares of the Leuthold Grizzly Fund may pay a shareholder servicing plan fee of up to 0.25% of average daily net assets.

Shareholder Servicing Fees for the Fiscal Years Ended September 30,

Core Investment Fund	\$226,439	N/A	N/A
Grizzly Short Fund	\$30,805	N/A	N/A

DISTRIBUTION OF SHARES

Rule 12b-1 Plan

The Trust has adopted a distribution plan for the Global Fund pursuant to Rule 12b-1 under the 1940 Act (the “12b-1 Plan”). Under the 12b-1 Plan, a Fund may pay a fee to the Distributor for distribution and/or shareholder services (the “Distribution and Servicing Fee”) at an annual rate of up to 0.25% of the average daily net assets of the Leuthold Global Fund's Retail Class Shares. The 12b-1 Plan provides that the Distributor may use all or any portion of a Fund’s Distribution and Servicing Fee to finance any activity that is principally intended to result in the sale of the Fund’s shares, subject to the terms of the 12b-1 Plan, or to provide certain shareholder services. The 12b-1 Plan is intended to benefit each Fund by increasing its assets and thereby reducing the Fund’s expense ratio.

The Distribution and Servicing Fee is payable to the Distributor regardless of the distribution-related expenses actually incurred. Because the Distribution and Servicing Fee is not directly tied to expenses, the amount of distribution fees paid during any year may be more or less than actual expenses incurred pursuant to the 12b-1 Plan. For this reason, this type of distribution fee arrangement is characterized by the staff of the SEC as a “compensation” plan.

The Distributor may use the Distribution and Servicing Fee to pay for services covered by the 12b-1 Plan including, but not limited to, advertising; compensating underwriters, dealers and selling personnel engaged in the distribution of Fund shares; the printing and mailing of prospectuses, statements of additional information, and reports; the printing and mailing of sales literature pertaining to the Fund; and obtaining whatever information, analyses, and reports with respect to marketing and promotional activities that the Fund may, from time to time, deem advisable.

The 12b-1 Plan provides that it will continue from year to year upon approval by the majority vote of the Board, including a majority of the Independent Trustees cast in person at a meeting called for that purpose, provided that such trustees have made a determination that there is a reasonable likelihood that the 12b-1 Plan will benefit a Fund and its shareholders. It is also required that the Independent Trustees, select and nominate all other trustees who are not “interested persons” of the Fund. The 12b-1 Plan and any related agreements may not be amended to materially increase the amounts to be spent for distribution expenses without approval of shareholders holding a majority of a Fund’s shares outstanding. All material amendments to the 12b-1 Plan or any related agreements must be approved by a vote of a majority of the Board and the Independent Trustees, cast in person at a meeting called for the purpose of voting on any such amendment.

The 12b-1 Plan requires that the Distributor provide to the Board, at least quarterly, a written report on the amounts and purpose of any payment made under the 12b-1 Plan. The Distributor is also required to furnish the Board with such other information as may reasonably be requested in order to enable the Board to make an informed determination of whether the 12b-1 Plan should be continued.

As noted above, the 12b-1 Plan provides for the ability to use Fund assets to pay financial intermediaries (including those that sponsor mutual fund supermarkets (as discussed below) and affiliates of the Adviser), plan administrators, and other service providers to finance any activity that is principally intended to result in the sale of Fund shares (distribution services) and for the provision of personal services to shareholders. The payments made by a Fund to financial intermediaries are based primarily on the dollar amount of assets invested in the Fund through the financial intermediaries. These financial intermediaries may pay a portion of the payments that they receive from the Fund to their investment professionals. In addition to the ongoing asset-based fees paid to these financial intermediaries under the 12b-1 Plan, a Fund may, from time to time, make payments

under the 12b-1 Plan that help defray the expenses incurred by these intermediaries for conducting training and educational meetings about various aspects of the Fund for their employees. In addition, a Fund may make payments under the 12b-1 Plan for exhibition space and otherwise help defray the expenses these financial intermediaries incur in hosting client seminars where the Fund is discussed.

In addition, a Fund may participate in various “mutual fund supermarkets” in which a mutual fund supermarket sponsor (usually a broker-dealer) offers many mutual funds to the sponsor’s customers without charging the customers a sales charge. In connection with its participation in such platforms, the Distributor may use all or a portion of the Distribution and Servicing Fee to pay one or more supermarket sponsors a negotiated fee for distributing the Fund’s shares. In addition, in its discretion, the Adviser may pay additional fees to such intermediaries from its own assets.

During the fiscal years ended September 30, 2024 and 2023, pursuant to the 12b-1 Plan, the Predecessor Global Fund incurred fees of \$8,836 and \$10,800, respectively, which were used to pay selling dealers.

During the fiscal year ended September 30, 2025, pursuant to the 12b-1 Plan, the Global Fund incurred fees of \$7,465, which were used to pay selling dealers.

Financial Intermediaries

The Adviser and/or its subsidiaries or affiliates (“Adviser Entities”) may pay certain broker-dealers and other financial intermediaries (“Intermediaries”) for certain activities related to the Funds (“Payments”). Any Payments made by Adviser Entities will be made from their own assets and not from the assets of the Funds. Although a portion of Adviser Entities’ revenue comes directly or indirectly in part from fees paid by the Funds, Payments do not increase the price paid by investors for the purchase of shares of, or the cost of owning, a Fund. Adviser Entities may make Payments for Intermediaries to participate in activities that are designed to make registered representatives, other professionals and individual investors more knowledgeable about the Funds or for other activities, such as participation in marketing activities and presentations, educational training programs, the support of technology platforms and/or reporting systems. Adviser Entities may also make Payments to Intermediaries for certain printing, publishing and mailing costs associated with the Fund. In addition, Adviser Entities may make Payments to Intermediaries that make shares of the Funds available to their clients or for otherwise promoting the Funds. Payments of this type are sometimes referred to as revenue-sharing payments.

Payments to an Intermediary may be significant to the Intermediary, and amounts that Intermediaries pay to an investor’s salesperson or other investment professional may also be significant for the investor’s salesperson or other investment professional. Because an Intermediary may make decisions about which investment options it will recommend or make available to its clients or what services to provide for various products based on payments it receives or is eligible to receive, Payments create conflicts of interest between the Intermediary and its clients and these financial incentives may cause the Intermediary to recommend the Funds over other investments. The same conflict of interest exists with respect to an investor’s salesperson or other investment professional if he or she receives similar payments from his or her Intermediary firm.

Adviser Entities may determine to make Payments based on any number of metrics. For example, Adviser Entities may make Payments at year-end or other intervals in a fixed amount, an amount based upon an Intermediary’s services at defined levels or an amount based on the Intermediary’s net sales of one or more of the Funds in a year or other period, any of which arrangements may include an agreed-upon minimum or maximum payment, or any combination of the foregoing.

DETERMINATION OF NET ASSET VALUE

The net asset value (or price) per share of each Fund is determined by dividing the total value of that Fund’s investments and other assets, less any liabilities, by its number of outstanding shares. The net asset value of each Fund normally will be determined as of the close of regular trading (currently 4:00 p.m. Eastern time) on each day the New York Stock Exchange is open for trading. If the New York Stock Exchange is not open, then the Funds do not determine their net asset values, and investors may not purchase or redeem shares of the Funds. The New York Stock Exchange is open for trading Monday through Friday except New Year’s Day, Dr. Martin Luther King, Jr. Day, Washington’s Birthday, Good Friday, Memorial Day, Juneteenth National

Independence Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. Additionally, when any of the aforementioned holidays falls on a Saturday, the New York Stock Exchange will not be open for trading on the preceding Friday and when any such holiday falls on a Sunday, the New York Stock Exchange will not be open for trading on the succeeding Monday, unless unusual business conditions exist, such as the ending of a monthly or the yearly accounting period. The New York Stock Exchange also may be closed on national days of mourning or due to natural disasters or other extraordinary events or emergencies. If the New York Stock Exchange closes early on a valuation day, the Funds shall determine their net asset value as of that time.

Securities listed on a national securities exchange (other than The NASDAQ OMX Group, Inc., referred to as NASDAQ) are valued at the last sale price on the day the valuation is made. Securities that are traded on NASDAQ under one of its three listing tiers, NASDAQ Global Select Market, NASDAQ Global Market and NASDAQ Capital Market, are valued at the Nasdaq Official Closing Price. Securities Price information on listed stocks is taken from the exchange where the security is primarily traded. Securities, including securities sold short, which are listed on an exchange but which are not traded on the valuation date are valued at the mean between the bid and the asked prices. Unlisted securities for which market quotations are readily available are valued at the latest quoted bid price or, if unavailable, at prices provided by an independent pricing service. Securities sold short which are not listed on an exchange but for which market quotations are readily available are valued at the average of the current bid and asked prices. Debt securities are valued at bid prices provided by an independent pricing service approved by the Trustees that uses a matrix pricing method or other analytical pricing models. Physical metals are valued at prices provided by an independent pricing service.

Exchange traded options are valued at the last reported sale price on an exchange on which the option is traded. If no sales are reported on a particular day, the mean between the highest bid and lowest asked quotations at the close of the exchanges will be used. Non-exchange traded options also will be valued at the mean between the last bid and asked quotations. Rights and warrants that are not traded are valued at the difference between the exercise price and the closing, quoted market price of the underlying security, or at zero if the closing quoted market price is lower than the exercise price.

When market quotations are not readily available, a security or other asset is valued at its fair value as determined under fair value pricing procedures approved by the Board. The Board reviews, no less frequently than annually, the adequacy of the policies and procedures of the Fund and the effectiveness of their implementation. These fair value pricing procedures will also be used to price a security when corporate events, events in the securities market and/or world events cause the Adviser to believe that a security's last sale price may not reflect its actual market value. The intended effect of using fair value pricing procedures is to ensure that the Fund is accurately priced. The Board will regularly evaluate whether the Trust's fair value pricing procedures continue to be appropriate in light of the specific circumstances of the Fund and the quality of prices obtained through the application of such procedures.

Certain foreign securities may be valued at intraday market values in such foreign markets. Additionally, in the case of foreign securities, the occurrence of certain events (such as a significant surge or decline in the U.S. or other markets) after the close of foreign markets, but prior to the time the Fund's NAV is calculated will often result in an adjustment to the trading prices of foreign securities when foreign markets open on the following business day. If such events occur, the Fund will value foreign securities at fair value, taking into account such events, in calculating the NAV. In such cases, use of fair valuation can reduce an investor's ability to profit by estimating the Fund's NAV in advance of the time the NAV is calculated. In addition, the Fund's investments in smaller capitalization companies are more likely to require a fair value determination because they may be more thinly traded and less liquid than securities of larger companies. The Trust anticipates that the Fund's portfolio holdings will be fair valued only if market quotations for those holdings are unavailable or considered unreliable.

Physical metals are valued at prices provided by an independent pricing service. The Leuthold Core Investment Fund and the Leuthold Global Fund may invest in metals such as aluminum, copper, zinc, lead, nickel, tin, silver, palladium and other industrial and precious metals. Metals not traded on an exchange are valued at the mid-point between the closing bid and asked prices as obtained from a commonly used reputable pricing source.

REDEMPTION OF SHARES LEUTHOLD CORE INVESTMENT FUND, LEUTHOLD GLOBAL FUND AND LEUTHOLD GRIZZLY SHORT FUND

The Leuthold Core Investment Fund, the Leuthold Global Fund and the Leuthold Grizzly Short Fund expect to use a variety of resources to honor requests to redeem shares of the Funds, including available cash; short-term investments; interest, dividend income and other monies earned on portfolio investments; the proceeds from the sale or maturity of portfolio holdings; and various other techniques.

Subject to the Funds' compliance with applicable regulations and their policies and procedures, each Fund has reserved the right to pay the redemption prices of shares redeemed, either totally or partially, by a distribution in-kind of securities (instead of cash) from the Fund's portfolio. The securities so distributed would be valued at the same amount as that assigned to them in calculating the NAV for the shares redeemed. If a holder of Fund shares receives a distribution in-kind, the holder of Fund shares would incur brokerage charges when subsequently converting the securities to cash. For federal income tax purposes, redemptions in-kind are taxed in the same manner as redemptions made in cash. In addition, sales of in-kind securities may generate taxable gains.

Frequent purchases and redemptions of a Fund's shares by a shareholder may harm other shareholders of the Fund by interfering with the efficient management of the Fund's portfolio, increasing brokerage and administrative costs, and potentially diluting the value of their shares. Accordingly, frequent purchases and redemptions of shares of the Leuthold Global Fund and the Leuthold Core Investment Fund are discouraged by:

1. Reserving the right to reject any purchase order for any reason or no reason, including purchase orders from potential investors that the Funds believe might engage in frequent purchases and redemptions of Fund shares;
2. Imposing a 2% redemption fee on redemptions or exchanges that occur within five business days of the share purchase.

The redemption fee does not apply to retirement plans (if the plans request and receive a waiver of the fee), but otherwise applies to all investors in these Funds, including those who invest through omnibus accounts at intermediaries such as broker-dealers.

These Funds rely on intermediaries to determine when a redemption occurs within five business days of purchase. Shareholders purchasing shares through an intermediary should contact the intermediary or refer to their account agreement or plan document for information about how the redemption fee for transactions in the intermediary's omnibus accounts works and any differences between the Funds' redemption fee procedures and the intermediary's redemption fee procedures. The right to reject an order applies to any order, including an order placed from an omnibus account or a retirement plan.

Although the Funds identified above have taken steps to discourage frequent purchases and redemptions of Fund shares, they cannot guarantee that such trading will not occur. These Funds may, in their sole discretion, waive the redemption fee in the case of death, disability, hardship, or other limited circumstances that do not indicate market timing strategies.

In calculating whether a sale of Fund shares (including an exchange) is subject to a redemption fee, a shareholder's holdings will be viewed on a "first in/first out" basis. This means that, in determining whether any fee is due, the shareholder will be deemed to have sold the shares he or she acquired earliest. The fee will be calculated based on the current price of the shares as of the trade date of the sale or exchange.

The Grizzly Fund generally accommodates frequent purchases and redemptions of their shares notwithstanding the potential harm to the other shareholders of the Grizzly Fund. The Board of Trustees believes it likely that a significant number of investors in the Grizzly Fund are not long-term investors because of the rising stock market risk associated with short selling of the Grizzly Fund. Although the Grizzly Fund generally accommodates frequent purchases and redemptions of its shares, it reserves the right to reject any purchase order for any reason or no reason, including purchase orders from potential investors that the Fund believes might engage in potentially disruptive purchases and redemptions of their shares.

The Funds reserve the right to suspend or postpone redemptions during any period when: (a) trading on the New York Stock Exchange is restricted, as determined by the Securities and Exchange Commission, or that

the Exchange is closed for other than customary weekend and holiday closings; (b) the Securities and Exchange Commission has by order permitted such suspension; (c) an emergency, as determined by the Securities and Exchange Commission, exists, making disposal of portfolio securities or valuation of net assets of the Funds not reasonably practicable.

SYSTEMATIC WITHDRAWAL PLAN LEUTHOLD CORE INVESTMENT FUND, LEUTHOLD GLOBAL FUND AND LEUTHOLD GRIZZLY SHORT FUND

An investor who owns Retail Class Shares of the Core Fund or the Global Fund, or shares of the Grizzly Fund, worth at least \$10,000 at the current net asset value may, by completing an application which may be obtained from the Funds or U.S. Bank Global Fund Services, create a Systematic Withdrawal Plan from which a fixed sum will be paid to the investor at regular intervals. To establish the Systematic Withdrawal Plan, the investor deposits shares of a Fund with the Trust and appoints it as agent to effect redemptions of such shares held in the account for the purpose of making monthly, quarterly or annual withdrawal payments of a fixed amount to the investor out of the account. Shares of a Fund deposited by the investor in the account need not be endorsed or accompanied by a stock power if registered in the same name as the account; otherwise, a properly executed endorsement or stock power, obtained from any bank, broker-dealer or the Trust is required. The investor's signature should be guaranteed by a bank, a member firm of a national stock exchange or other eligible guarantor.

The minimum amount of a withdrawal payment is \$100. These payments will be made from the proceeds of periodic redemptions of shares in the account at net asset value. Redemptions will be made in accordance with the schedule (for example, monthly, quarterly or yearly, but in no event more than monthly) selected by the investor. If a scheduled redemption day is a weekend day or a holiday, such redemption will be made on the next business day. When establishing a Systematic Withdrawal Plan, the Funds recommend that the investor reinvest in additional Fund shares all income dividends and capital gains distributions payable by the Fund. The investor may deposit additional shares in their account at any time.

Withdrawal payments cannot be considered as yield or income on the investor's investment, since portions of each payment will normally consist of a return of capital. Depending on the size or the frequency of the disbursements requested, and the fluctuation in the value of the Fund's portfolio, redemptions for the purpose of making such disbursements may reduce or even exhaust the investor's account.

The investor may vary the amount or frequency of withdrawal payments, temporarily discontinue them, or change the designated payee or payee's address, by notifying U.S. Bank Global Fund Services in writing thirty (30) days prior to the next payment or provide a request with a signature guarantee.

AUTOMATIC INVESTMENT PLAN AND TELEPHONE PURCHASES LEUTHOLD CORE INVESTMENT FUND, LEUTHOLD GLOBAL FUND AND LEUTHOLD GRIZZLY SHORT FUND

The Core Fund, the Global Fund and the Grizzly Fund offer an automatic investment option pursuant to which money will be moved from a shareholder's bank account to the shareholder's Fund account on the schedule (for example, monthly, quarterly or yearly) the shareholder selects. The minimum transaction amount is \$50.

The Funds offer a telephone purchase option pursuant to which money will be moved from the shareholder's bank account to the shareholder's Fund account upon request. Only bank accounts held at domestic financial institutions that are Automated Clearing House (ACH) members can be used for telephone transactions. To have Fund shares purchased at the net asset value determined as of the close of regular trading on a given date, U.S. Bank Global Fund Services must receive the purchase order before the close of regular trading on such date. Most transfers are completed within three business days. The minimum amount that can be transferred by telephone is \$100.

ALLOCATION OF INVESTMENT OPPORTUNITIES

Although the Funds have differing investment objectives, there will be times when certain securities will be eligible for purchase by multiple Funds or will be contained in the portfolios of multiple Funds. Although securities of a particular company may be eligible for purchase by the Funds, the Adviser may determine at any particular time to purchase a security for one Fund, but not the another, based on each Fund's investment

objective and in a manner that is consistent with the Adviser's fiduciary duties under federal and state law to act in the best interests of each Fund.

There may also be times when a given investment opportunity is appropriate for some, or all, of the Adviser's other client accounts. It is the policy and practice of the Adviser not to favor or disfavor consistently or consciously any client or class of clients in the allocation of investment opportunities, so that to the extent practical, such opportunities will be allocated among clients, including the Funds, over a period of time on a fair and equitable basis.

If the Adviser determines that a particular investment is appropriate for more than one client account, the Adviser may aggregate securities transactions for those client accounts ("block trades"). To ensure that no client account is disadvantaged as a result of such aggregation, the Adviser has adopted policies and procedures to ensure that the Adviser does not aggregate securities transactions for client accounts unless it believes that aggregation is consistent with its duty to seek best execution for client accounts and is consistent with the applicable agreements of the client accounts for which the Adviser aggregates securities transactions. No client account is favored over any other client account in block trades, and each client account that participates in block trades participates at the average share price for all transactions in the security for which that aggregated order is placed on the day that such aggregated order is placed. Subject to minimum ticket charges, transaction costs are shared in proportion to Client Accounts' participation. On certain foreign exchanges where the Adviser purchases securities, block trades are not allowed.

It is the Adviser's general policy not to purchase a security in one Fund while simultaneously selling it in another Fund. However, there may be circumstances outside of the Adviser's control that require the purchase of a security in one portfolio and a sale in the other. For example, when one Fund experiences substantial cash inflows while another Fund experiences substantial cash outflows, the Adviser may be required to buy securities to maintain a fully invested position in one Fund, while selling securities in another Fund to meet shareholder redemptions. In such circumstances, a Fund may acquire assets from another Fund that are otherwise qualified investments for the acquiring Fund, so long as no Fund bears any markup or spread, and no commission, fee or other remuneration is paid in connection with the acquisition, and the acquisition complies with Section 17(a) of the Act and Rule 17a-7 thereunder. If the purchase and sale are not effected pursuant to Rule 17a-7, then the purchase and/or sale of a security common to both portfolios may result in a higher price being paid by a Fund in the case of a purchase than would otherwise have been paid, or a lower price being received by a Fund in the case of a sale than would otherwise have been received, as a result of a Fund's transactions affecting the market for such security. In any event, the Funds' management believes that under normal circumstances such events will have a minimal impact on a Fund's per share NAV and its subsequent long-term investment return.

When the Adviser wishes to place an order for different types of accounts (including the Funds) for which aggregation and bunching is not practicable, the Adviser may use a trade sequencing and rotation policy to determine which type of account is to be traded first. Under this policy, the Adviser may determine the length of its trade rotation period and the sequencing schedule for different categories of clients within this period provided that the trading periods and these sequencing schedules are designed to be fair and equitable over time. The Adviser identifies different categories of its clients (*e.g.*, unconstrained client accounts, the Funds, private investment funds, managed accounts, etc.) and assigns a trade placement sequence to them based on a random generator process. As a result, the Funds may trade behind other accounts. Within a given trading period, the sequencing schedule establishes when a given client category will trade first in the order of rotation. The Adviser may deviate from the predetermined sequencing schedule under certain circumstances, and the Adviser's trade sequencing and rotation policy may be amended, modified or supplemented at any time without prior notice to clients.

ALLOCATION OF PORTFOLIO BROKERAGE

In placing purchase and sale orders for portfolio securities for each Fund, it is the policy of the Adviser to seek the best execution of orders at the most favorable price in light of the overall quality of brokerage and research services provided, as described in this and the following paragraphs. Many of these transactions involve payment of a brokerage commission by a Fund. In some cases, transactions are with firms who act as principals for their own accounts. In selecting brokers to effect portfolio transactions, the determination of what is expected to result in best execution at the most favorable price involves a number of largely judgmental considerations. Among these are the Adviser's evaluation of the broker's efficiency in executing and clearing

transactions, block trading capability (including the broker's willingness to position securities) and the broker's reputation, financial strength and stability. The most favorable price to a Fund means the best net price without regard to the mix between purchase or sale price and commission, if any. Over-the-counter securities may be purchased and sold directly with principal market makers who retain the difference in their cost in the security and its selling price. In many instances, the Adviser feels that better prices are available from non-principal market makers who are paid commissions directly.

The Adviser provides market research to institutional clients for an agreed upon payment. Institutional research is also distributed through broker-dealers who may effect securities transactions for the Adviser's clients. The broker-dealers typically provide the Adviser's institutional research to their brokerage customers. The broker-dealers pay the Adviser a fee for the research that is based on the amount of the research purchased by the broker-dealer. A broker-dealer's willingness to distribute institutional research is not a factor considered by the Adviser in determining which broker-dealers it selects to effect securities transactions for its clients, including the Funds.

In allocating brokerage business for each Fund, the Adviser also takes into consideration the research, analytical, statistical and other information and services provided by the broker, such as general economic reports and information, reports or analyses of particular companies or industry groups, market timing and technical information, and the availability of the brokerage firm's analysts for consultation. While the Adviser believes these services have substantial value, they are considered supplemental to the Adviser's own efforts in the performance of its duties under the Advisory Agreements. Other clients of the Adviser may indirectly benefit from the availability of these services to the Adviser, and the Funds may indirectly benefit from services available to the Adviser as a result of transactions for other clients. The Advisory Agreements provide that the Adviser may cause the Funds to pay a broker which provides brokerage and research services to the Adviser a commission for effecting a securities transaction in excess of the amount another broker would have charged for effecting the transaction, if the Adviser determines in good faith that such amount of commission is reasonable in relation to the value of brokerage and research services provided by the executing broker viewed in terms of either the particular transaction or the Adviser's overall responsibilities with respect to the Funds and the other accounts as to which he exercises investment discretion. For 2025, the Adviser received a total of approximately \$333,650 in soft dollar benefits related to the Funds.

The Funds utilize the services of Cowen Westminster Research Associates to administer its soft dollar program. Cowen Westminster Research specializes in independent research products and services, consolidating all administration and reporting of commission management needs with one firm. By using this type of umbrella provider the Funds do not have to decide who the soft dollar provider for said product/service will be, providing the Funds with greater flexibility in managing their soft dollar policy while fulfilling the fiduciary responsibility of best execution.

	Fiscal Year Ended September 30, 2025	
	Dollar Value of Securities Traded	Related Soft Dollar Brokerage Commissions
Core Fund	\$1,016,861,809	\$275,563
Global Fund	\$34,949,532	\$11,204
Grizzly Fund	\$173,642,650	\$46,884

Each Predecessor Fund's portfolio turnover rate for the fiscal periods ended September 30, 2024, and each Fund's portfolio turnover rate for the fiscal period ended September 30, 2025, was as follows:

	2024	2025
Predecessor Core Fund	40%	N/A
Predecessor Global Fund	56%	N/A
Predecessor Grizzly Fund	0%	N/A
Core Fund	N/A	64%
Global Fund	N/A	64%
Grizzly Fund	N/A	0%

CERTAIN U.S. FEDERAL INCOME TAX CONSIDERATIONS

IN VIEW OF THE COMPLEXITIES OF U.S. FEDERAL AND OTHER INCOME TAX LAWS APPLICABLE TO REGULATED INVESTMENT COMPANIES, A PROSPECTIVE SHAREHOLDER IS URGED TO CONSULT WITH AND RELY SOLELY UPON ITS TAX ADVISORS TO UNDERSTAND FULLY THE U.S. FEDERAL, STATE, LOCAL AND FOREIGN TAX CONSEQUENCES TO THAT INVESTOR OF SUCH AN INVESTMENT BASED ON THAT INVESTOR'S PARTICULAR FACTS AND CIRCUMSTANCES. THIS SUMMARY IS NOT INTENDED TO BE, AND SHOULD NOT BE CONSTRUED AS, LEGAL OR TAX ADVICE TO ANY PROSPECTIVE INVESTOR.

The following information supplements and should be read in conjunction with the section in the Prospectus entitled "DIVIDENDS, DISTRIBUTIONS AND TAXES." The Prospectus generally describes the U.S. federal income tax treatment of distributions by the Funds. This section of the SAI provides additional information concerning U.S. federal income taxes. It is based on the Code, applicable Treasury Regulations, judicial authority, and administrative rulings and practice, all as of the date of this SAI and all of which are subject to change, including changes with retroactive effect. Except as specifically set forth below, the following discussion does not address any state, local or foreign tax matters.

A shareholder's tax treatment may vary depending upon the shareholder's particular situation. This discussion applies only to shareholders holding Fund shares as capital assets within the meaning of the Code. A shareholder may also be subject to special rules not discussed below if they are a certain kind of shareholder, including, but not limited to: an insurance company; a tax-exempt organization; a financial institution or broker-dealer; a person who is neither a citizen nor resident of the United States or entity that is not organized under the laws of the United States or political subdivision thereof; a shareholder who holds Fund shares as part of a hedge, straddle or conversion transaction; a shareholder who does not hold Fund shares as a capital asset; or an entity taxable as a partnership for U.S. federal income tax purposes and investors in such an entity.

Tax reform legislation commonly known as the Tax Cuts and Jobs Act (the "Tax Act") was enacted on December 22, 2017. The Tax Act makes significant changes to the U.S. federal income tax rules for individuals and corporations, generally effective for taxable years beginning after December 31, 2017. Most of the changes applicable to individuals are temporary and, without further legislation, will not apply after 2025. The application of certain provisions of the Tax Act is uncertain, and the changes in the act may have indirect effects on the Funds, their investments and their shareholders that cannot be predicted. In addition, legislative, regulatory or administrative changes could be enacted or promulgated at any time, either prospectively or with retroactive effect. Prospective investors should consult their tax advisors regarding the implications of the Tax Act on their investment in the Funds.

The Trust has not requested and will not request an advance ruling from the Internal Revenue Service (the "IRS") as to the U.S. federal income tax matters described below. The IRS could adopt positions contrary to those discussed below and such positions could be sustained. In addition, the following discussion and the discussions in the Prospectus applicable to each shareholder address only some of the U.S. federal income tax considerations generally affecting investments in the Funds. Prospective shareholders are urged to consult their

own tax advisers and financial planners regarding the U.S. federal tax consequences of an investment in a Fund, the application of state, local or foreign laws, and the effect of any possible changes in applicable tax laws on their investment in the Funds.

Qualification as a Regulated Investment Company

It is intended that each Fund qualify for treatment as a regulated investment company (a “RIC”) under Subchapter M of Subtitle A, Chapter 1 of the Code. Each Fund will be treated as a separate entity for U.S. federal income tax purposes. Thus, the provisions of the Code applicable to RICs generally will apply separately to each Fund even though each Fund is a series of the Trust. Furthermore, each Fund will separately determine its income, gains, losses and expenses for U.S. federal income tax purposes.

In order to qualify as a RIC under the Code, each Fund must, among other things, derive at least 90% of its gross income each taxable year generally from (i) dividends, interest, certain payments with respect to securities loans, gains from the sale or other disposition of stock, securities or foreign currencies, and other income attributable to its business of investing in such stock, securities or foreign currencies (including, but not limited to, gains from options, futures or forward contracts) and (ii) net income derived from an interest in a qualified publicly traded partnership, as defined in the Code. Future U.S. Treasury regulations may (possibly retroactively) exclude from qualifying income foreign currency gains that are not directly related to a Fund’s principal business of investing in stock, securities or options and futures with respect to stock or securities. In general, for purposes of this 90% gross income requirement, income derived from a partnership, except a qualified publicly traded partnership, will be treated as qualifying income only to the extent such income is attributable to items of income of the partnership which would be qualifying income if realized by the RIC.

In general, gold and other precious metals do not constitute qualifying assets, and gain derived from the sale of gold or other precious metals does not constitute qualifying income. To reduce the risk that a Fund’s investments in gold, silver, platinum and palladium bullion, whether held directly or indirectly, may result in the Fund’s failure to satisfy the requirements of Subchapter M, the Adviser will endeavor to manage each Fund’s portfolio so that (i) less than 10% of the Fund’s gross income each year will be derived from its investments in gold, silver, platinum and palladium bullion, and (ii) less than 50% of the value of the Fund’s assets, at the end of each quarter, will be invested in gold, silver, platinum and palladium bullion or other non-qualifying assets.

Each Fund must also diversify its holdings so that, at the end of each quarter of the Fund’s taxable year: (i) at least 50% of the fair market value of its gross assets consists of (A) cash and cash items (including receivables), U.S. government securities and securities of other RICs, and (B) securities of any one issuer (other than those described in clause (A)) to the extent such securities do not exceed 5% of the value of the Fund’s total assets and do not exceed 10% of the outstanding voting securities of such issuer, and (ii) not more than 25% of the value of the Fund’s total assets consists of the securities of any one issuer (other than those described in clause (i)(A)), the securities of two or more issuers the Fund controls and which are engaged in the same, similar or related trades or businesses, or the securities of one or more qualified publicly traded partnerships. In addition, for purposes of meeting the diversification requirement of clause (i)(B), the term “outstanding voting securities of such issuer” includes the equity securities of a qualified publicly traded partnership. The qualifying income and diversification requirements applicable to a Fund may limit the extent to which it can engage in transactions in options, futures contracts, forward contracts and swap agreements.

If a Fund fails to satisfy any of the qualifying income or diversification requirements in any taxable year, such Fund may be eligible for relief provisions if the failures are due to reasonable cause and not willful neglect and if a penalty tax is paid with respect to each failure to satisfy the applicable requirement. Additionally, relief is provided for certain *de minimis* failures of the diversification requirements where the Fund corrects the failure within a specified period. If the applicable relief provisions are not available or cannot be met, such Fund will be taxed in the same manner as an ordinary corporation, described below.

In addition, with respect to each taxable year, each Fund generally must distribute to its shareholders at least 90% of its investment company taxable income, which generally includes its ordinary income and the excess of any net short-term capital gain over net long-term capital loss, and at least 90% of its net tax-exempt interest income earned for the taxable year. If a Fund meets all of the RIC qualification requirements, it generally will not be subject to U.S. federal income tax on any of the investment company taxable income and net capital gain (*i.e.*, the excess of net long-term capital gain over net short-term capital loss) it distributes to its shareholders. For this purpose, a Fund generally must make the distributions in the same year that it realizes the income and gain, although in certain circumstances, a Fund may make the distributions in the following taxable

year. Shareholders generally are taxed on any distributions from a Fund in the year they are actually distributed. However, if a Fund declares a distribution to shareholders of record in October, November or December of one year and pays the distribution by January 31 of the following year, the Fund and its shareholders will be treated as if the Fund paid the distribution on December 31 of the first year. Each Fund intends to distribute its net income and gain in a timely manner to maintain its status as a RIC and eliminate fund-level U.S. federal income taxation of such income and gain. However, no assurance can be given that a Fund will not be subject to U.S. federal income taxation.

Moreover, a Fund may retain for investment all or a portion of their net capital gain. If a Fund retains any net capital gain, it will be subject to a tax at regular corporate rates on the amount retained, but may report the retained amount as undistributed capital gain in a written statement furnished to its shareholders, who (i) will be required to include in income for U.S. federal income tax purposes, as long-term capital gain, their shares of such undistributed amount, and (ii) will be entitled to credit their proportionate shares of the tax paid by the Fund on such undistributed amount against their U.S. federal income tax liabilities, if any, and to claim refunds to the extent the credit exceeds such liabilities. For U.S. federal income tax purposes, the tax basis of shares owned by a shareholder of the Fund will be increased by an amount equal to the difference between the amount of undistributed capital gain included in the shareholder's gross income and the tax deemed paid by the shareholder under clause (ii) of the preceding sentence. A Fund is not required to, and there can be no assurance that it will, make this designation if it retains all or a portion of its net capital gain in a taxable year.

If, for any taxable year, a Fund fails to qualify as a RIC, and is not eligible for relief as described above, it will be taxed in the same manner as an ordinary corporation without any deduction for its distributions to shareholders, and all distributions from the Fund's current and accumulated earnings and profits (including any distributions of its net tax-exempt income and net long-term capital gain) to its shareholders will be taxable as dividend income. To re-qualify to be taxed as a RIC in a subsequent year, the Fund may be required to distribute to its shareholders its earnings and profits attributable to non-RIC years reduced by an interest charge on 50% of such earnings and profits payable by the Fund to the IRS. In addition, if a Fund initially qualifies as a RIC but subsequently fails to qualify as a RIC for a period greater than two taxable years, the Fund generally would be required to recognize and pay tax on any net unrealized gain (the excess of aggregate gain, including items of income, over aggregate loss that would have been realized if the Fund had been liquidated) or, alternatively, to be subject to tax on such unrealized gain recognized for a period of ten years, in order to re-qualify as a RIC in a subsequent year.

Equalization Accounting

Each Fund may use the so-called "equalization method" of accounting to allocate a portion of its "earnings and profits," which generally equals a Fund's undistributed investment company taxable income and net capital gain, with certain adjustments, to redemption proceeds. This method permits a Fund to achieve more balanced distributions for both continuing and redeeming shareholders. Although using this method generally will not affect a Fund's total returns, it may reduce the amount that the Fund would otherwise distribute to continuing shareholders by reducing the effect of redemptions of Fund shares on Fund distributions to shareholders. However, the IRS may not have expressly sanctioned the particular equalization methods that may be used by a Fund, and thus a Fund's use of these methods may be subject to IRS scrutiny.

Capital Loss Carryforwards

For net capital losses realized in taxable years beginning before January 1, 2011, a Fund is permitted to carryforward a net capital loss to offset its capital gain, if any, realized during the eight years following the year of the loss, and such capital loss carryforward is treated as a short-term capital loss in the year to which it is carried. For net capital losses realized in taxable years beginning on or after January 1, 2011, a Fund is permitted to carryforward a net capital loss to offset its capital gain indefinitely. For capital losses realized in taxable years beginning after January 1, 2011, the excess of a Fund's net short-term capital loss over its net long-term capital gain is treated as a short-term capital loss arising on the first day of the Fund's next taxable year and the excess of a Fund's net long-term capital loss over its net short-term capital gain is treated as a long-term capital loss arising on the first day of the Fund's next taxable year. If future capital gain is offset by carried-forward capital losses, such future capital gain is not subject to fund-level U.S. federal income tax, regardless of whether it is distributed to shareholders. Accordingly, the Funds do not expect to distribute any such offsetting capital gain. The Funds cannot carryback or carryforward any net operating losses.

At September 30, 2025, the Funds had the following capital loss carryforwards.

	Leuthold Core Investment Fund	Leuthold Global Fund	Grizzly Short Fund
Unlimited Short-Term	\$—	\$—	\$(388,410,472)
Unlimited Long-Term	—	—	—

If a Fund engages in a reorganization, either as an acquiring fund or acquired fund, its capital loss carryforwards (if any), its unrealized losses (if any), and any such losses of other funds participating in the reorganization may be subject to severe limitations that could make such losses, in particular losses realized in taxable years beginning before January 1, 2011, substantially unusable. The Funds have engaged in reorganizations in the past and/or may engage in reorganizations in the future.

Excise Tax

If a Fund fails to distribute by December 31 of each calendar year at least the sum of 98% of its ordinary income for that year (excluding capital gains and losses), 98.2% of its capital gain net income (adjusted for certain net ordinary losses) for the 12-month period ending on October 31 of that year, and any of its ordinary income and capital gain net income from previous years that was not distributed during such years, the Fund will be subject to a nondeductible 4% U.S. federal excise tax on the undistributed amounts (other than to the extent of its tax-exempt interest income, if any). For these purposes, a Fund will be treated as having distributed any amount on which it is subject to corporate level U.S. federal income tax for the taxable year ending within the calendar year. Each Fund generally intends to actually, or be deemed to, distribute substantially all of its ordinary income and capital gain net income, if any, by the end of each calendar year and thus expects not to be subject to the excise tax. However, no assurance can be given that a Fund will not be subject to the excise tax. Moreover, each Fund reserves the right to pay an excise tax rather than make an additional distribution when circumstances warrant (for example, the amount of excise tax to be paid by a Fund is determined to be *de minimis*).

Taxation of Investments

In general, realized gains or losses on the sale of securities held by a Fund will be treated as capital gains or losses, and long-term capital gains or losses if the Fund has held the disposed securities for more than one year at the time of disposition.

Certain of a Fund's investment practices are subject to special and complex U.S. federal income tax provisions (including mark-to-market, constructive sale, straddle, wash sale, short sale and other rules) that may, among other things, (i) disallow, suspend or otherwise limit the allowance of certain losses or deductions, including the dividends received deduction, (ii) convert lower taxed long-term capital gains or qualified dividend income into higher taxed short-term capital gains or ordinary income, (iii) convert ordinary loss or a deduction into capital loss (the deductibility of which is more limited), (iv) cause the Fund to recognize income or gain without a corresponding receipt of cash, (v) adversely affect the time as to when a purchase or sale of stock or securities is deemed to occur, (vi) adversely alter the characterization of certain complex financial transactions and (vii) produce income that will not be "qualified" income for purposes of the 90% annual gross income requirement described above. These U.S. federal income tax provisions could therefore affect the amount, timing and character of distributions to common shareholders. Each Fund intends to monitor its transactions and may make certain tax elections and may be required to dispose of securities to mitigate the effect of these provisions and prevent disqualification of the Fund as a RIC. Additionally, the Fund may be required to limit its activities in derivative instruments in order to enable it to maintain its RIC status.

A Fund may invest a portion of its net assets in below investment grade securities, commonly known as "junk" securities. Investments in these types of securities may present special tax issues for the Fund. U.S. federal income tax rules are not entirely clear about issues such as when the Fund may cease to accrue interest, original issue discount or market discount, when and to what extent deductions may be taken for bad debts or worthless securities, how payments received on obligations in default should be allocated between principal and income and whether modifications or exchanges of debt obligations in a bankruptcy or workout context are

taxable. These and other issues could affect a Fund's ability to distribute sufficient income to preserve its status as a RIC or to avoid the imposition of U.S. federal income or excise tax.

If a Fund purchases a debt obligation with original issue discount ("OID") (generally, a debt obligation with a purchase price at original issuance less than its principal amount, such as a zero-coupon bond), which generally includes "payment-in-kind" or "PIK" bonds, the Fund generally is required to annually include in its taxable income a portion of the OID as ordinary income, even though the Fund may not receive cash payments attributable to the OID until a later date, potentially until maturity or disposition of the obligation. A portion of the OID includible in income with respect to certain high-yield corporate discount obligations may be treated as a dividend for U.S. federal income tax purposes. Similarly, if a Fund purchases a debt obligation with market discount (generally a debt obligation with a purchase price after original issuance less than its principal amount (reduced by any OID)), the Fund generally is required to annually include in its taxable income a portion of the market discount as ordinary income, even though the Fund may not receive cash payments attributable to the market discount until a later date, potentially until maturity or disposition of the obligation. A Fund generally will be required to make distributions to shareholders representing the OID or market discount income on debt obligations that is currently includible in income, even though the cash representing such income may not have been received by a Fund. Cash to pay such distributions may be obtained from sales proceeds of securities held by the Fund which a Fund otherwise might have continued to hold; obtaining such cash might be disadvantageous for the Fund.

If a Fund invests in debt obligations that are in the lowest rating categories or are unrated, including debt obligations of issuers not currently paying interest or who are in default, special tax issues may exist for the Fund. U.S. federal income tax rules are not entirely clear about issues such as when a Fund may cease to accrue interest, OID, or market discount, when and to what extent deductions may be taken for bad debts or worthless securities, and how payments received on obligations in default should be allocated between principal and income. These and other related issues will be addressed by a Fund when, as, and if it invests in such securities, in order to seek to ensure that it distributes sufficient income to preserve its status as a RIC and does not become subject to U.S. federal income or excise tax.

If an option granted by a Fund is sold, lapses or is otherwise terminated through a closing transaction, such as a repurchase by the Fund of the option from its holder, the Fund will realize a short-term capital gain or loss, depending on whether the premium income is greater or less than the amount paid by the Fund in the closing transaction. Some capital losses realized by a Fund in the sale, exchange, exercise, or other disposition of an option may be deferred if they result from a position that is part of a "straddle," discussed below. If securities are sold by a Fund pursuant to the exercise of a covered call option granted by it, the Fund generally will add the premium received to the sale price of the securities delivered in determining the amount of gain or loss on the sale. If securities are purchased by a Fund pursuant to the exercise of a put option granted by it, the Fund generally will subtract the premium received from its cost basis in the securities purchased.

Some regulated futures contracts, certain foreign currency contracts, and non-equity, listed options used by a Fund will be deemed "Section 1256 contracts." A Fund will be required to "mark-to-market" any such contracts held at the end of the taxable year by treating them as if they had been sold on the last day of that year at market value. Sixty percent of any net gain or loss realized on all dispositions of Section 1256 contracts, including deemed dispositions under the "mark-to-market" rule, generally will be treated as long-term capital gain or loss, and the remaining 40% will be treated as short-term capital gain or loss, although certain foreign currency gains and losses from such contracts may be treated as ordinary income or loss (as described below). These provisions may require a Fund to recognize income or gains without a concurrent receipt of cash. Transactions that qualify as designated hedges are exempt from the mark-to-market rule and the "60%/40%" rule and may require the Fund to defer the recognition of losses on certain futures contracts, foreign currency contracts and non-equity options.

Foreign currency gains and losses realized by a Fund in connection with certain transactions involving foreign currency-denominated debt obligations, certain options, futures contracts, forward contracts, and similar instruments relating to foreign currency, foreign currencies, or payables or receivables denominated in a foreign currency are subject to Section 988 of the Code, which generally causes such gains and losses to be treated as ordinary income or loss and may affect the amount and timing of recognition of the Fund's income. Under future U.S. Treasury regulations, any such transactions that are not directly related to a Fund's investments in stock or securities (or its options contracts or futures contracts with respect to stock or securities) may have to be limited in order to enable the Fund to satisfy the 90% income test described above. If the net foreign currency loss exceeds a Fund's net investment company taxable income (computed without regard to such loss)

for a taxable year, the resulting ordinary loss for such year will not be deductible by the Fund or its shareholders in future years.

Offsetting positions held by a Fund involving certain derivative instruments, such as financial forward, futures, and options contracts, may be considered, for U.S. federal income tax purposes, to constitute “straddles.” “Straddles” are defined to include “offsetting positions” in actively traded personal property. The tax treatment of “straddles” is governed by Section 1092 of the Code which, in certain circumstances, overrides or modifies the provisions of Section 1256 of the Code, described above. If a Fund is treated as entering into a “straddle” and at least one (but not all) of the Fund’s positions in derivative contracts comprising a part of such straddle is governed by Section 1256 of the Code, then such straddle could be characterized as a “mixed straddle.” A Fund may make one or more elections with respect to “mixed straddles.” Depending upon which election is made, if any, the results with respect to a Fund may differ. Generally, to the extent the straddle rules apply to positions established by a Fund, losses realized by the Fund may be deferred to the extent of unrealized gain in any offsetting positions. Moreover, as a result of the straddle rules, short-term capital loss on straddle positions may be recharacterized as long-term capital loss, and long-term capital gain may be characterized as short-term capital gain. In addition, the existence of a straddle may affect the holding period of the offsetting positions. As a result, the straddle rules could cause distributions that would otherwise constitute qualified dividend income (defined below) to fail to satisfy the applicable holding period requirements (described below) and therefore to be taxed as ordinary income. Furthermore, the Fund may be required to capitalize, rather than deduct currently, any interest expense and carrying charges applicable to a position that is part of a straddle, including any interest expense on indebtedness incurred or continued to purchase or carry any positions that are part of a straddle. Because the application of the straddle rules may affect the character and timing of gains and losses from affected straddle positions, the amount which must be distributed to shareholders, and which will be taxed to shareholders as ordinary income or long-term capital gain, may be increased or decreased substantially as compared to the situation where a Fund had not engaged in such transactions.

If a Fund enters into a “constructive sale” of any appreciated financial position in stock, a partnership interest, or certain debt instruments, the Fund will be treated as if it had sold and immediately repurchased the property and must recognize gain (but not loss) with respect to that position. A constructive sale of an appreciated financial position occurs when a Fund enters into certain offsetting transactions with respect to the same or substantially identical property, including: (i) a short sale; (ii) an offsetting notional principal contract; (iii) a futures or forward contract; or (iv) other transactions identified in future U.S. Treasury regulations. The character of the gain from constructive sales will depend upon a Fund’s holding period in the appreciated financial position. Losses realized from a sale of a position that was previously the subject of a constructive sale will be recognized when the position is subsequently disposed of. The character of such losses will depend upon a Fund’s holding period in the position and the application of various loss deferral provisions in the Code. Constructive sale treatment does not apply to certain closed transactions, including if such a transaction is closed on or before the 30th day after the close of the Fund’s taxable year and the Fund holds the appreciated financial position unhedged throughout the 60-day period beginning with the day such transaction was closed.

The amount of long-term capital gain a Fund may recognize from certain derivative transactions with respect to interests in certain pass-through entities is limited under the Code’s constructive ownership rules. The amount of long-term capital gain is limited to the amount of such gain a Fund would have had if the Fund directly invested in the pass-through entity during the term of the derivative contract. Any gain in excess of this amount is treated as ordinary income. An interest charge is imposed on the amount of gain that is treated as ordinary income.

In addition, a Fund’s transactions in securities and certain types of derivatives (e.g., options, futures contracts, forward contracts, and swap agreements) may be subject to other special tax rules, such as the wash sale rules or the short sale rules, the effect of which may be to accelerate income to the Fund, defer losses to the Fund, cause adjustments to the holding periods of the Fund’s securities, convert long-term capital gains into short-term capital gains, and/or convert short-term capital losses into long-term capital losses. These rules could therefore affect the amount, timing, and character of distributions to shareholders.

Rules governing the U.S. federal income tax aspects of derivatives, including swap agreements, are in a developing stage and are not entirely clear in certain respects. Accordingly, while each Fund intends to account for such transactions in a manner it deems to be appropriate, the IRS might not accept such treatment. If it did not, the status of a Fund as a RIC might be jeopardized. Certain requirements that must be met under the Code in order for a Fund to qualify as a RIC may limit the extent to which a Fund will be able to engage in derivatives transactions.

A Fund may invest in real estate investment trusts (“REITs”). Investments in REIT equity securities may require a Fund to accrue and distribute income not yet received. To generate sufficient cash to make the requisite distributions, the Fund may be required to sell securities in its portfolio (including when it is not advantageous to do so) that it otherwise would have continued to hold. A Fund’s investments in REIT equity securities may at other times result in the Fund’s receipt of cash in excess of the REIT’s earnings. If the Fund distributes these amounts, these distributions could constitute a return of capital to Fund shareholders for U.S. federal income tax purposes. Dividends received by the Fund from a REIT generally will not constitute qualified dividend income and will not qualify for the dividends-received deduction. Under recent legislation, certain income distributed by pass through entities is allowed up to a 20% deduction; however, it is unclear at this time whether a RIC (such as a Fund) can pass on such deduction on REIT distributions to shareholders.

A Fund may invest directly or indirectly in residual interests in real estate mortgage investment conduits (“REMICs”) or in other interests that may be treated as taxable mortgage pools (“TMPs”) for U.S. federal income tax purposes. Under IRS guidance, a Fund must allocate “excess inclusion income” received directly or indirectly from REMIC residual interests or TMPs to its shareholders in proportion to dividends paid to such shareholders, with the same consequences as if the shareholders had invested in the REMIC residual interests or TMPs directly.

In general, excess inclusion income allocated to shareholders (i) cannot be offset by net operating losses (subject to a limited exception for certain thrift institutions), (ii) constitutes unrelated business taxable income to Keough, 401(k) and qualified pension plans, as well as individual retirement accounts and certain other tax exempt entities, thereby potentially requiring such an entity, which otherwise might not be required to file a tax return, to file a tax return and pay tax on such income, and (iii) in the case of a foreign shareholder, does not qualify for any reduction, by treaty or otherwise, in the 30% U.S. federal withholding tax. In addition, if at any time during any taxable year a “disqualified organization” (as defined in the Code) is a record holder of a share in a Fund, then the Fund will be subject to a tax equal to that portion of its excess inclusion income for the taxable year that is allocable to the disqualified organization, multiplied by the highest federal corporate income tax rate. To the extent permitted under the 1940 Act, a Fund may elect to specially allocate any such tax to the applicable disqualified organization, and thus reduce such shareholder’s distributions for the year by the amount of the tax that relates to such shareholder’s interest in the Fund. A Fund may or may not make such an election.

Passive foreign investment companies (“PFICs”) are generally defined as foreign corporations with respect to which at least 75% of their gross income for their taxable year is income from passive sources (such as interest, dividends, certain rents and royalties, or capital gains) or at least 50% of their assets on average produce, or are held for the production of, such passive income. If a Fund acquires any equity interest in a PFIC, the Fund could be subject to U.S. federal income tax and interest charges on “excess distributions” received from the PFIC or on gain from the sale of such equity interest in the PFIC, even if all income or gain actually received by the Fund is timely distributed to its shareholders. Excess distributions will be characterized as ordinary income even though, absent the application of PFIC rules, some excess distributions may have been classified as capital gain.

A Fund will not be permitted to pass through to its shareholders any credit or deduction for taxes and interest charges incurred with respect to PFICs. Elections may be available that would ameliorate these adverse tax consequences, but such elections could require a Fund to recognize taxable income or gain without the concurrent receipt of cash. Investments in PFICs could also result in the treatment of associated capital gains as ordinary income. The Funds may attempt to limit and/or manage their holdings in PFICs to minimize their tax liability or maximize their returns from these investments but there can be no assurance that they will be able to do so. Moreover, because it is not always possible to identify a foreign corporation as a PFIC in advance of acquiring shares in the corporation, a Fund may incur the tax and interest charges described above in some instances. Dividends paid by a Fund attributable to income and gains derived from PFICs will not be eligible to be treated as qualified dividend income.

If a Fund owns 10% or more of either the voting power or value of the stock of a “controlled foreign corporation” (a “CFC”), such corporation will not be treated as a PFIC with respect to the Fund. In general, the Fund may be required to recognize dividends from a CFC before actually receiving any dividends. There may also be a tax imposed on a U.S. shareholder’s aggregate net CFC income that is treated as global intangible low-taxed income. As a result of the foregoing, the Fund may be required to recognize income sooner than it otherwise would.

In addition to the investments described above, prospective shareholders should be aware that other investments made by a Fund may involve complex tax rules that may result in income or gain recognition by the Fund without corresponding current cash receipts. Although the Funds seek to avoid significant non-cash income, such non-cash income could be recognized by the Funds, in which case the Funds may distribute cash derived from other sources in order to meet the minimum distribution requirements described above. In this regard, the Funds could be required at times to liquidate investments prematurely in order to satisfy their minimum distribution requirements.

Notwithstanding the foregoing, under the Tax Act, accrual method taxpayers required to recognize gross income under the “all events test” no later than when such income is recognized as revenue in an applicable financial statement (e.g., an audited financial statement which is used for reporting to partners). This new rule may require the Fund to recognize income earlier than as described above.

Taxation of Distributions

Distributions paid out of a Fund’s current and accumulated earnings and profits (as determined at the end of the year), whether paid in cash or reinvested in the Fund, generally are deemed to be taxable distributions and must be reported by each shareholder who is required to file a U.S. federal income tax return. Dividends and other distributions on a Fund’s shares are generally subject to U.S. federal income tax as described herein to the extent they do not exceed the Fund’s realized income and gains, even though such dividends and distributions may economically represent a return of a particular shareholder’s investment. Such distributions are likely to occur in respect of shares acquired at a time when the Fund’s net asset value reflects gains that are either unrealized, or realized but not distributed. For U.S. federal income tax purposes, a Fund’s earnings and profits, described above, are determined at the end of the Fund’s taxable year and are allocated pro rata to distributions paid over the entire year. Distributions in excess of a Fund’s current and accumulated earnings and profits will first be treated as a return of capital up to the amount of a shareholder’s tax basis in the shareholder’s Fund shares and then as capital gain. A Fund may make distributions in excess of its earnings and profits, from time to time.

For U.S. federal income tax purposes, distributions of investment income are generally taxable as ordinary income, and distributions of gains from the sale of investments that a Fund owned for one year or less will be taxable as ordinary income. Distributions properly reported in writing by a Fund as capital gain dividends will be taxable to shareholders as long-term capital gain (to the extent such distributions do not exceed the Fund’s net capital gain for the taxable year), regardless of how long a shareholder has held Fund shares, and do not qualify as dividends for purposes of the dividends-received deduction or as qualified dividend income. Each Fund will report capital gain dividends, if any, in a written statement furnished to its shareholders after the close of the Fund’s taxable year.

Each Fund intends to distribute annually to its shareholders substantially all of its investment company taxable income and any net realized long-term capital gains in excess of net realized short-term capital losses (including any capital loss carryovers). However, if a Fund retains for investment an amount equal to all or a portion of its net long-term capital gains in excess of its net short-term capital losses (including any capital loss carryovers), it will be subject to a corporate tax (at a flat rate of 21%) on the amount retained. In that event, the Fund will designate such retained amounts as undistributed capital gains in a notice to its shareholders who (a) will be required to include in income for U.S. federal income tax purposes, as long-term capital gains, their proportionate shares of the undistributed amount, (b) will be entitled to credit their proportionate shares of the tax paid by the Fund on the undistributed amount against their U.S. federal income tax liabilities, if any, and to claim refunds to the extent their credits exceed their liabilities, if any, and (c) will be entitled to increase their tax basis, for U.S. federal income tax purposes, in their Shares by an amount equal to the excess of the amount in clause (a) over the amount in clause (b). Organizations or persons not subject to U.S. federal income tax on such capital gains will be entitled to a refund of their *pro rata* share of such taxes paid by the Fund upon filing appropriate returns or claims for refund with the IRS.

If an individual receives a regular dividend qualifying for the long-term capital gains rates and such dividend constitutes an “extraordinary dividend,” and the individual subsequently recognizes a loss on the sale or exchange of stock in respect of which the extraordinary dividend was paid, then the loss will be long-term capital loss to the extent of such extraordinary dividend. An “extraordinary dividend” on common stock for this purpose is generally a dividend (i) in an amount greater than or equal to 10% of the taxpayer’s tax basis (or trading value) in a share of stock, aggregating dividends with ex-dividend dates within an 85-day period, or (ii)

in an amount greater than 20% of the taxpayer's tax basis (or trading value) in a share of stock, aggregating dividends with ex-dividend dates within a 365-day period.

Investors considering buying shares just prior to a dividend or capital gain distribution should be aware that, although the price of shares purchased at that time may reflect the amount of the forthcoming distribution, such dividend or distribution may nevertheless be taxable to them. If a Fund is the holder of record of any security on the record date for any dividends payable with respect to such security, such dividends will be included in the Fund's gross income not as of the date received but as of the later of (a) the date such security became ex-dividend with respect to such dividends (*i.e.*, the date on which a buyer of the security would not be entitled to receive the declared, but unpaid, dividends); or (b) the date the Fund acquired such security. Accordingly, in order to satisfy its income distribution requirements, the Fund may be required to pay dividends based on anticipated earnings, and shareholders may receive dividends in an earlier year than would otherwise be the case.

Fluctuations in foreign currency exchange rates may result in foreign exchange gain or loss on transactions in foreign currencies, foreign currency-denominated debt obligations, and certain foreign currency options, futures contracts and forward contracts. Such gains or losses are generally characterized as ordinary income or loss for tax purposes. A Fund must make certain distributions in order to qualify as a RIC, and the timing of and character of transactions such as foreign currency-related gains and losses may result in the fund paying a distribution treated as a return of capital. Such distribution is nontaxable to the extent of the recipient's basis in its shares.

Some states will not tax distributions made to individual shareholders that are attributable to interest a Fund earned on direct obligations of the U.S. government if the Fund meets the state's minimum investment or reporting requirements, if any. Investments in GNMA or FNMA securities, bankers' acceptances, commercial paper and repurchase agreements collateralized by U.S. government securities generally do not qualify for state-tax-free treatment. This exemption may not apply to corporate shareholders.

Sales and Exchanges of Fund Shares

If a shareholder sells, pursuant to a cash or in-kind redemption, or exchanges the shareholder's Fund shares, subject to the discussion below, the shareholder generally will recognize a taxable capital gain or loss on the difference between the amount received for the shares (or deemed received in the case of an exchange) and the shareholder's tax basis in the shares. This gain or loss will be long-term capital gain or loss if the shareholder has held such Fund shares for more than one year at the time of the sale or exchange, and short-term otherwise.

If a shareholder sells or exchanges Fund shares within 90 days of having acquired such shares and if, before January 31 of the calendar year following the calendar year of the sale or exchange, as a result of having initially acquired those shares, the shareholder subsequently pays a reduced sales charge on a new purchase of shares of the Fund or a different RIC, the sales charge previously incurred in acquiring the Fund's shares generally shall not be taken into account (to the extent the previous sales charges do not exceed the reduction in sales charges on the new purchase) for the purpose of determining the amount of gain or loss on the disposition, but generally will be treated as having been incurred in the new purchase. Also, if a shareholder recognizes a loss on a disposition of Fund shares, the loss will be disallowed under the "wash sale" rules to the extent the shareholder purchases substantially identical shares within the 61-day period beginning 30 days before and ending 30 days after the disposition. Any disallowed loss generally will be reflected in an adjustment to the tax basis of the purchased shares.

If a shareholder receives a capital gain dividend with respect to any Fund share and such Fund share is held for six months or less, then (unless otherwise disallowed) any loss on the sale or exchange of that Fund share will be treated as a long-term capital loss to the extent of the capital gain dividend. If such loss is incurred from the redemption of shares pursuant to a periodic redemption plan then U.S. Treasury regulations may permit an exception to this six-month rule. No such regulations have been issued as of the date of this SAI.

Corporate Shareholders

Subject to limitation and other rules, a corporate shareholder of a Fund may be eligible for the FATCA deduction on Fund distributions attributable to dividends received by the Fund from domestic corporations,

which, if received directly by the corporate shareholder, would qualify for such a deduction. For eligible corporate shareholders, the dividends-received deduction may be subject to certain reductions, and a distribution by a Fund attributable to dividends of a domestic corporation will be eligible for the deduction only if certain holding period and other requirements are met. These requirements are complex; therefore, corporate shareholders of the Funds are urged to consult their own tax advisers and financial planners.

U.S. Federal Income Tax Rates

Noncorporate Fund shareholders (*i.e.*, individuals, trusts and estates) are taxed at a maximum rate of 37% on ordinary income and 20% on net capital gain.

In general, “qualified dividend income” realized by noncorporate Fund shareholders is taxable at the same rate as net capital gain. Generally, qualified dividend income is dividend income attributable to certain U.S. and foreign corporations, as long as certain holding period requirements are met. In general, if less than 95% of a Fund’s income is attributable to qualified dividend income, then only the portion of the Fund’s distributions that are attributable to qualified dividend income and reported in writing as such in a timely manner will be so treated in the hands of individual shareholders. Payments received by a Fund from securities lending, repurchase, and other derivative transactions ordinarily will not qualify. The rules attributable to the qualification of Fund distributions as qualified dividend income are complex, including the holding period requirements. Individual Fund shareholders therefore are urged to consult their own tax advisers and financial planners.

The maximum stated corporate U.S. federal income tax rate applicable to ordinary income and net capital gain is 21%. Actual marginal tax rates may be higher for some shareholders, for example, through reductions in deductions. Distributions from a Fund may qualify for the “dividends-received deduction” applicable to corporate shareholders with respect to certain dividends. Naturally, the amount of tax payable by any taxpayer will be affected by a combination of tax laws covering, for example, deductions, credits, deferrals, exemptions, sources of income and other matters.

In addition, a noncorporate Fund shareholder generally will be subject to an additional 3.8% tax on its “net investment income,” which ordinarily includes taxable distributions received from the corresponding Fund and taxable gain on the disposition of Fund shares if the shareholder meets a taxable income test.

Under the Foreign Account Tax Compliance Act, or “FATCA,” U.S. federal income tax withholding at a 30% rate will be imposed on dividends and proceeds of redemptions in respect of Fund shares received by Fund shareholders who own their shares through foreign accounts or foreign intermediaries if certain disclosure requirements related to U.S. accounts or ownership are not satisfied. The Funds will not pay any additional amounts in respect to any amounts withheld.

Backup Withholding

A Fund is generally required to withhold and remit to the U.S. Treasury, subject to certain exemptions (such as for certain corporate or foreign shareholders), an amount equal to 28% of all distributions and redemption proceeds (including proceeds from exchanges and redemptions in-kind) paid or credited to a Fund shareholder if (i) the shareholder fails to furnish the Fund with a correct taxpayer identification number (“TIN”), (ii) the shareholder fails to certify under penalties of perjury that the TIN provided is correct, (iii) the shareholder fails to make certain other certifications, or (iv) the IRS notifies the Fund that the shareholder’s TIN is incorrect or that the shareholder is otherwise subject to backup withholding. Backup withholding is not an additional tax imposed on the shareholder. The shareholder may apply amounts withheld as a credit against the shareholder’s U.S. federal income tax liability and may obtain a refund of any excess amounts withheld, provided that the required information is furnished to the IRS. If a shareholder fails to furnish a valid TIN upon request, the shareholder can also be subject to IRS penalties. A shareholder may generally avoid backup withholding by furnishing a properly completed IRS Form W-9. State backup withholding may also be required to be withheld by the Funds under certain circumstances.

Foreign Shareholders

For purposes of this discussion, “foreign shareholders” include: (i) nonresident alien individuals, (ii) foreign trusts (*i.e.*, a trust other than a trust with respect to which a U.S. court is able to exercise primary supervision over administration of that trust and one or more U.S. persons have authority to control substantial

decisions of that trust), (iii) foreign estates (*i.e.*, the income of which is not subject to U.S. tax regardless of source), and (iv) foreign corporations.

Generally, distributions made to foreign shareholders will be subject to non-refundable U.S. federal income tax withholding at a 30% rate (or such lower rate provided under an applicable income tax treaty) even if they are funded by income or gains (such as portfolio interest, short-term capital gain, or foreign-source dividend and interest income) that, if paid to a foreign person directly, would not be subject to such withholding.

Under legislation that has been available from time to time, a Fund could report in writing to its shareholders certain distributions made to foreign shareholders that would not be subject to U.S. federal income tax withholding where the distribution is attributable to specific sources (such as “portfolio interest” and short-term capital gain), certain requirements are met and the Fund makes appropriate designations to pay such “exempt” distributions. Even if a Fund realizes income from such sources, no assurance can be made the Fund would meet such requirements or make such designations. Where Fund shares are held through an intermediary, even if a Fund makes the appropriate designation, the intermediary may withhold U.S. federal income tax.

Capital gains dividends and gains recognized by a foreign shareholder on the redemption of Fund shares generally will not be subject to U.S. federal income tax withholding, provided that certain requirements are satisfied.

Under FATCA, a withholding tax of 30% will be imposed on dividends on, and the gross proceeds of a disposition of, Fund shares paid to certain foreign shareholders unless various information reporting requirements are satisfied. Such withholding tax will generally apply to non-U.S. financial institutions, which are generally defined for this purpose as non-U.S. entities that (i) accept deposits in the ordinary course of a banking or similar business, (ii) are engaged in the business of holding financial assets for the account of others, or (iii) are engaged or hold themselves out as being engaged primarily in the business of investing, reinvesting, or trading in securities, partnership interests, commodities, or any interest in such assets. Prospective foreign shareholders are encouraged to consult their tax advisors regarding the implications of FATCA on their investment in a Fund.

Before investing in a Fund’s shares, a prospective foreign shareholder should consult with its own tax advisors, including whether the shareholder’s investment can qualify for benefits under an applicable income tax treaty.

Tax-Deferred Plans

Shares of the Funds may be available for a variety of tax-deferred retirement and other tax-advantaged plans and accounts. Prospective investors should contact their tax advisers and financial planners regarding the tax consequences to them of holding Fund shares through such plans and/or accounts.

A 1.4% excise tax is imposed on the net investment income of certain private colleges and universities. This tax would only apply to private institutions with endowment valued at \$500,000 per full-time student or more, subject to other limitations. Tax-exempt shareholders should contact their tax advisers and financial planners regarding the tax consequences to them of an investment in the Fund.

Any investment in residual interests of a collateralized mortgage obligation that has elected to be treated as a REMIC can create complex U.S. federal income tax consequences, especially if a Fund has state or local governments or other tax-exempt organizations as shareholders.

Special tax consequences apply to charitable remainder trusts (“CRTs”) (as defined in Section 664 of the Code) that invest in RICs that invest directly or indirectly in residual interests in REMICs or equity interests in TMPs. CRTs are urged to consult their own tax advisers and financial planners concerning these special tax consequences.

Tax Shelter Reporting Regulations

Generally, under U.S. Treasury regulations, if an individual shareholder recognizes a loss of \$2 million or more, or if a corporate shareholder recognizes a loss of \$10 million or more, with respect to Fund shares, the shareholder must file with the IRS a disclosure statement on Form 8886. Direct shareholders of securities are in

many cases exempt from this reporting requirement, but under current guidance, shareholders of a RIC are not exempt. Future guidance may extend the current exemption from this reporting requirement to shareholders of most or all RICs. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer's treatment of the loss is proper. Shareholders should consult their own tax advisers to determine the applicability of these regulations in light of their individual circumstances.

Cost Basis Reporting

In general, each Fund must report "cost basis" information to its shareholders and the IRS for redemptions of "covered shares." Fund shares purchased on or after January 1, 2012 are generally treated as covered shares. By contrast, Fund shares purchased before January 1, 2012 or shares without complete cost basis information are generally treated as noncovered shares. Fund shareholders should consult their tax advisors to obtain more information about how these cost basis rules apply to them and determine which cost basis method allowed by the IRS is best for them.

Recently Enacted Tax Legislation

The full effects of the Tax Act are not certain and may cause the Fund and its shareholders to be taxed in a manner different than as described above. Prospective shareholders also should recognize that the present U.S. federal income tax treatment of the Fund and their shareholders may be modified by legislative, judicial or administrative actions at any time, which may be retroactive in effect. The rules dealing with U.S. federal income taxation are constantly under review by Congress, the IRS and the Treasury Department, and statutory changes as well as promulgation of new regulations, revisions to existing statutes, and revised interpretations of established concepts occur frequently. You should consult your advisors concerning the status of legislative proposals that may pertain to holding Shares.

The foregoing summary should not be considered to describe fully the income and other tax consequences of an investment in the Fund. Fund investors are strongly urged to consult with their tax advisors, with specific reference to their own situations, with respect to the potential tax consequences of an investment in the Fund.

DESCRIPTION OF SECURITIES RATINGS

The Core Fund and the the Global Fund (or a registered investment company in which such Fund invests) may invest in bonds and debentures assigned ratings of either Standard & Poor's Corporation ("Standard & Poor's") or Moody's Investors Service, Inc. ("Moody's"). As also set forth below, the Core Fund and Global Fund may invest in commercial paper and commercial paper master notes rated by Standard & Poor's or Moody's. A brief description of the ratings symbols and their meanings follows.

Standard & Poor's Debt Ratings. A Standard & Poor's corporate or municipal debt rating is a current opinion of the creditworthiness of an obligor with respect to a specific financial obligation. It takes into consideration the creditworthiness of guarantors, insurers or other forms of credit enhancement on the obligation.

The debt rating is not a recommendation to purchase, sell or hold a security, inasmuch as it does not comment as to market price or suitability for a particular investor.

The ratings are based on current information furnished by the issuer or obtained by Standard & Poor's from other sources it considers reliable. Standard & Poor's does not perform any audit in connection with any rating and may, on occasion, rely on unaudited financial information. The ratings may be changed, suspended or withdrawn as a result of changes in, or unavailability of, such information, or for other circumstances.

The ratings are based, in varying degrees, on the following considerations:

- I. Likelihood of default - capacity and willingness of the obligor to meet its financial commitment on an obligation in accordance with the terms of the obligation;
- II. Nature of and provisions of the obligation;

III. Protection afforded by, and relative position of, the obligation in the event of bankruptcy, reorganization or other arrangement under the laws of bankruptcy and other laws affecting creditors' rights.

The issue ratings definitions are expressed in terms of default risk. As such they pertain to senior obligations of such entity. Junior obligations are typically rated lower than senior obligations, to reflect the lower priority in bankruptcy.

AAA - Debt rated AAA has the highest rating assigned by Standard & Poor's. Capacity to pay interest and repay principal is extremely strong.

AA - Debt rated AA has a very strong capacity to pay interest and repay principal and differs from the higher rated issues only in small degree.

A - Debt rated A has a strong capacity to pay interest and repay principal although it is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than debt in the higher rated categories.

BBB - Debt rated BBB is regarded as having an adequate capacity to pay interest and repay principal. Whereas it normally exhibits adequate protection parameters, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to pay interest and repay principal for debts in this category than in higher rated categories.

BB, B, CCC, CC, C - Debt rated BB, B, CCC, CC and C is regarded, on balance, as predominantly speculative with respect to capacity to pay interest and repay principal in accordance with the terms of the obligation. BB indicates the lowest degree of speculation and C the highest degree of speculation. While such debt will likely have some quality and protective characteristics, these are outweighed by large uncertainties or major risk exposures to adverse conditions.

Moody's Bond Ratings.

Moody's ratings are opinions, not recommendations to buy or sell, and their accuracy is not guaranteed.

Aaa - Bonds which are rated Aaa are judged to be the best quality. They carry the smallest degree of investment risk and are generally referred to as "gilt edged." Interest payments are protected by a large, or by an exceptionally stable margin and principal is secure. While the various protective elements are likely to change, such changes as can be visualized are most unlikely to impair the fundamentally strong position of such issues.

Aa - Bonds which are Aa are judged to be of high quality by all standards. Together with the Aaa group they comprise what are generally known as high-grade bonds. They are rated lower than the best bonds because margins of protection may not be as large as in Aaa securities or fluctuation of protective elements may be of greater amplitude, or there may be other elements present which make the long-term risks appear somewhat larger than in Aaa securities.

A - Bonds which are rated A possess many favorable investment attributes and are to be considered as upper medium grade obligations. Factors giving security to principal and interest are considered adequate, but elements may be present which suggest a susceptibility to impairment sometime in the future.

Baa - Bonds which are rated Baa are considered to be medium-grade obligations (namely, they are neither highly protected nor poorly secured). Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and in fact have speculative characteristics as well.

Ba - Bonds which are rated Ba are judged to have speculative elements; their future cannot be considered as well-assured. Often the protection of interest and principal payments may be very moderate, and thereby not well safeguarded during both good and bad times over the future. Uncertainty of position characterizes bonds in this class.

B - Bonds which are rated B generally lack characteristics of the desirable investment. Assurance of interest and principal payments or of maintenance of other terms of the contract over any long period of time may be small.

Caa - Bonds which are rated Caa are of poor standing. Such issues may be in default or there may be present elements of danger with respect to principal or interest.

Ca - Bonds which are rated Ca represent obligations which are speculative in a high degree. Such issues are often in default or have other marked shortcomings.

C - Bonds which are rated C are the lowest rated class of bonds, and issues so rated can be regarded as having extremely poor prospects of ever attaining any real investment standing.

Moody's applies numerical modifiers 1, 2 and 3 in each generic rating classification from Aa to B. The modifier 1 indicates that the company ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates that the company ranks in the lower end of its generic rating category.

Standard & Poor's Commercial Paper Ratings. A Standard & Poor's commercial paper rating is a current assessment of the likelihood of timely payment of debt considered short-term in the relevant market. Ratings are graded into several categories, ranging from A-1 for the highest quality obligations to D for the lowest. The categories rated A-3 or higher are as follows:

A-1. This highest category indicates that the degree of safety regarding timely payment is strong. Those issuers determined to possess extremely strong safety characteristics are denoted with a plus sign (+) designation.

A-2. Capacity for timely payment on issues with this designation is satisfactory. However, the relative degree of safety is not as high as for issuers designed "A-1."

A-3. Issues carrying this designation have adequate capacity for timely payment. They are, however, more vulnerable to the adverse effects of changes in circumstances than obligations carrying the higher designation.

Moody's Short-Term Debt Ratings. Moody's short-term debt ratings are opinions of the ability of issuers to repay punctually senior debt obligations which have an original maturity not exceeding one year. Obligations relying upon support mechanisms such as letters-of-credit and bonds of indemnity are excluded unless explicitly rated.

Moody's employs the following three designations, all judged to be investment grade, to indicate the relative repayment ability of rated issuers:

Prime-1. Issuers rated Prime-1 (or supporting institutions) have a superior ability for repayment of senior short-term debt obligations. Prime-1 repayment ability will often be evidenced by many of the following characteristics:

- Leading market positions in well-established industries.
- High rates of return on funds employed.
- Conservative capitalization structure with moderate reliance on debt and ample asset protection.
- Broad margins in earnings coverage of fixed financial charges and high internal cash generation.
- Well-established access to a range of financial markets and assured sources of alternate liquidity.

Prime-2. Issuers rated Prime-2 (or supporting institutions) have a strong ability for repayment of senior short-term debt obligations. This will normally be evidenced by many of the characteristics cited above but to a lesser degree. Earnings trends and coverage ratios, while sound, may be more subject to variation. Capitalization characteristics, while still appropriate, may be more affected by external conditions. Ample alternate liquidity is maintained.

Prime-3. Issuers rated Prime-3 (or supporting institutions) have an acceptable ability for repayment of senior short-term obligations. The effect of industry characteristics and market compositions may be more pronounced. Variability in earnings and profitability may result in changes in the level of debt protection measurements and may require relatively high financial leverage. Adequate alternate liquidity is maintained.

FINANCIAL STATEMENTS

The Funds' [Form N-CSR](#) for the fiscal year ended September 30, 2025 is a separate document and the financial statements, accompanying notes and report of the independent registered public accounting firm appearing therein are incorporated by reference into this SAI.
